EB-2023-0335
Excluding:
EB-2023-0062
EB-2022-0285

Issues:

Pollution Probe represents a consumer interest related to the Leave to Construct issues list for this proceeding, including:
- Project Need

- Project Cost and Economics
- Project Routing and alternatives (including environmental and socio-economic impacts)

Enbridge has indicated a desire for confidential treatment of certain information in its application, including Confidential Treatment of information in E-1-1 related to project load profiles, energy usage and billing. The OEB will need to assess this specific information since it forms a primary basis for the need and design of the proposed pipeline. Although there could be a confidential process added to the proceeding to deal with these issues, there is insufficient basis to consider this information confidential and it is recommended that the OEB not provide confidential treatment for the information in E-1-1.

Policy Interests:

Pollution Probe represents a policy interest related to the LTC issues list applicable to this proceeding. Specific project issues include:

- Project need and alignment with relevant policy
- Environmental Impacts
- Socio-economic and environmental policy and other requirements under the OEB's Environmental Guidelines applicable to this specific project.
- Mitigation of environmental and socio-economic impacts in accordance with regulations.

In alignment with the 2024-2028 Rebasement proceeding, Pollution Probe expects a significant number of RNG supply pipelines similar to this one to be requested in Ontario in the near future and consideration of this application will inform how those future applications are to be considered.

Hearings:

Pollution Probe supports a written hearing process.

Evidence:

At this time Pollution Probe does not intend to commission expert evidence. However, based on the issues outlined in the application Pollution Probe may provide relevant materials to the OEB during the proceeding to enhance the public record.

Coordination with Other Intervenors:

Pollution Probe has been an active and valuable participant in OEB proceedings and will continue to coordinate its activities with impacted consumers, intervenors, project stakeholders and other parties as appropriate.

Cost Awards:

Pollution Probe respectfully requests your acceptance of this request to participate and confirmation that it will be eligible for its costs.

Pollution Probe is a not-for-profit charitable organization. We receive individual donations as well as funding for consumer and research projects. Without the prospect of an award of costs, Pollution Probe's ability to participate in the consultation process would not be possible.

Language Preference:
