Dear Ms. Marconi:

Re: Ultra-Low Overnight (“ULO”) Price Plan Implementation (EB-2022-0160)

Amendments to Ontario Regulation 95/05 (Classes of Consumers and Determination of Rates) under the Ontario Energy Board Act, 1998 were filed on November 1, 2022, and came into force on January 1, 2023, permitting eligible Regulated Price Plan (“RPP”) consumers the option to elect to be charged on the basis of a new Ultra-Low Overnight price plan by November 1, 2023, at latest, and as early as May 1, 2023.

On December 14, 2022, the Ontario Energy Board (“OEB”) gave notice to electricity distributors of the requirement to implement the ULO price plan through amendments to the Standard Supply Service Code (“SSSC”) and RPP Manual.

On March 21, 2023, the OEB issued a letter introducing a reporting requirement related to ULO implementation. Licensed distributors are required to notify the OEB in writing of the date on which eligible RPP consumers are permitted to elect to switch to the ULO price plan. Distributors must provide Notice no later than five business days after allowing consumers to elect the ULO price plan.

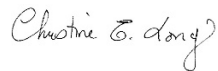

By way of this letter, Alectra Utilities is providing confirmation to the OEB that it has successfully made the necessary changes to its billing system infrastructure to accommodate the Ultra-Low Overnight price plan for all of its five rate zones. Alectra Utilities began allowing eligible RPP consumers to elect to switch to the ULO price plan on September 25, 2023.

Rate Option Selection forms have been posted to the websites of Alectra Utilities and Alectra Utilities' predecessor, Guelph Hydro. Links to each can be found below:
