Ms. Nancy Marconi, Registrar Ontario Energy Board 2300 Yonge Street, 27th Floor Toronto, ON M4P 1E4

Re: PUC Distribution Inc. (License ED-2002-0546) 2024 IRM Rate Application, EB-2023-0048

Please find attached PUC Distribution Inc.'s ("PUC") 2024 IRM Rate Application ("Application") under the Price Cap IR pursuant to the Ontario Energy Board's ("OEB") 4th Generation Incentive Rate-Setting Mechanism.

PUC's Application will be filed electronically through the OEB's Regulatory Electronic Submission System ("RESS") web portal, consisting of:

- Complete copy the Application in searchable/unrestricted PDF format
- Excel version of the 2024 IRM Rate Generator model
- Excel version of the 2024 GA Analysis Workform
- Excel version of the 2024 IRM Checklist

PUC has also participated in the IRM Online model filing process for its 2024 rate application filing. PUC's Application can also be viewed on its website at www.ssmpuc.com.

Please contact the undersigned if you have any questions.

Respectfully submitted,

Pina Pacione, CPA, CGA

Manager, Regulatory & Customer Affairs

Filed: October 11, 2023

1. Overview

The Applicant is PUC Distribution Inc. ("PUC"). PUC is an Ontario corporation with its office in the City of Sault Ste. Marie. PUC carries on the business of distributing electricity in its service territory which includes most of the City of Sault Ste. Marie, Batchewana First Nation (Rankin Reserve), Prince Township and parts of Dennis Township. PUC delivers electricity to approximately 33,865 customers.

 PUC hereby applies to the Ontario Energy Board (the "OEB") pursuant to section 78 of the Ontario Energy Board Act, 1998, as amended, for approval of its proposed distribution rates and other charges, to be effective May 1, 2024. This application is prepared in accordance with the OEB's Price Cap Incentive Rate -setting methodology ("Price Cap IR").

PUC has followed the instructions provided in Chapter 3 of the Filing Requirements for Electricity Distribution Rate Applications – 2023 Edition for 2024 Rate Applications ("the Filing Requirements") issued June 15, 2023; the Report of the Board on Electricity Distributors' Deferral and Variance Account Review Initiative ("the EDDVAR Report") issued July 31, 2009 [EB-2008-0046]; and the Electricity Distribution Retail Transmission Service Rates Guideline G-2008-0001, Revision 4.0, issued June 28, 2012¹ ("RTSR Guidelines").

PUC has verified the accuracy of the billing determinates that were pre-populated in the models. In addition,

i. PUC has provided a Certificate of Evidence, Certification Regarding Personal Information and Certification of Deferral and Variance Account Balances as Appendix A.

ii. PUC's current 2023 Tariff of Rates and Charges, for rates effective May 1, 2023, is included as Appendix B.

iii. PUC's proposed 2024 Tariff of Rates and Charges, for rates effective May 1, 2024, is included as Appendix C.

iv. PUC has completed the 2024 IRM Rate Generator Model which is filed in both Excel and PDF format, in Appendix D.

v. PUC has completed the 2024 GA Analysis Workform Model which is filed in both Excel and PDF format, in Appendix E.

¹ Originally issued October 22, 2008

vi. PUC has completed the 2024 IRM Checklist which is filed in both Excel and PDF format, Appendix F.

vii. PUC has included a previous 2023 Cost of Service ("COS") decision supporting the Rate Rider for the Sault Smart Grid Project Recovery Mechanism, in Appendix G.

Specifically, PUC's Application hereby applies for an Order or Orders approving distribution rates updated and adjusted in accordance with the Chapter 3 Requirements as follows:

- 1. Rate Order Implementation with an Effective date of May 1, 2024, using the Annual Adjustment Mechanism of 4.50% applied to existing distribution rates determined by the OEB's calculated inflation factor for incentive rate-setting under the Price Cap IR Price Escalator of 4.80%, reduced by a Productivity Factor of 0%, and PUC's Stretch Factor of 0.30%:
- 2. Adjustment to the Retail Transmission Service Rates ("RTSRs") as provided in Guideline (G-2008-0001) Electricity Distribution Retail Transmission Service Rates (dated October 22, 2008) and subsequent revisions and updates to the Uniform Transmission Rates ("UTRs") and as supported by the completion of the related sections of the OEB issued 2024 IRM Rate Generator Model.
- 3. Continuation of the Wholesale Market Service Rate, Capacity Based Recovery (CBR) Class B, Rural Rate Protection Charge, the Standard Supply Service Charge, Specific Service Charges, MicroFIT Service Charge, Retail Service Charges, the Smart Metering Entity Charge and Loss Factors as approved in PUC's 2023 COS Application (EB-2022-0059). PUC understands that OEB Staff will update the 2024 IRM Rate Generator Model for adjusted Retail Transmission Service Rates and parameters for determining the Annual Adjustment Mechanism when established by the Board.
- 4. Rate Riders for the disposition of Group 1 DVA account balances as of December 31, 2022 (including Account 1595 (2018), plus carrying charges to the end of April 30, 2024.
- 5. Rate Riders for Sault Smart Grid Project Recovery (2024) as approved in the 2023 COS Application [EB-2022-0059].
 - 6. Rate Riders for Embedded Generation Adjustment as approved in the 2023 COS Application [EB-2022-0059].

PUC will post its 2024 IRM Application and related information as required by the OEB on its website www.ssmpuc.com.

This Application will affect all ratepayers in PUC's service territory. PUC requests that, pursuant to Section 34.01 of the Board's Rules of Practice and Procedure, this proceeding be conducted by way of written hearing. In the event that the Board is unable to provide a Decision and Order

1 in this Application for implementation by the Applicant as of May 1, 2024, PUC requests that

2 the Board issue an Interim Rate Order declaring the current Distribution Rates and Specific

3 Service Charges as interim until such time as the 2024 rates are approved. In the event that the

effective date does not coincide with the Board's decided implementation date for 2024

Distribution Rates and Charges, PUC requests to be permitted to recover the incremental

revenue from the effective date to the implementation date.

Table 1 below summarizes PUC's 2024 proposed distribution rates, as compared to current approved rates.

Table 1 – 2024 Proposed Distribution Rates

Rate Class	Current MFC (\$)		Current olumetric rge (\$/kWh)	Price Cap Index		Proposed MFC (\$)		Proposed olumetric rge (\$/kWh)
Residential	\$ 38.35	\$	-	4.50%	\$	40.08	\$	-
General Service Less than 50 kW	\$ 22.32	\$	0.0319	4.50%	\$	23.32	\$	0.0333
General Service 50 to 4,999 kW	\$ 123.27	\$	8.3565	4.50%	\$	128.82	\$	8.7325
Unmetered Scattered Load	\$ 13.67	\$	0.0476	4.50%	\$	14.29	\$	0.0497
Sentinel Lighting	\$ 4.35	\$	40.611	4.50%	\$	4.55	\$	42.438
Street Lighting	\$ 1.67	\$	10.938	4.50%	\$	1.75	\$	11.4300

2. Annual Adjustment Mechanism

PUC seeks to increase its rates, effective May 1, 2024, based on a mechanistic rate adjustment using the OEB-approved inflation minus X-factor formula applicable to Price Cap IR applications. On June 29, 2023, the OEB issued the GDP-IPI inflation factor of 4.8% to be used in the 2024 IRM Rate Generator model. In addition, on July 18, 2023 the OEB issued the Incentive Rate Setting: 2022 Benchmarking Update for Determination of 2023 Stretch Factor Rankings to be used in the 2024 IRM Rate applications (EB-2010-0379). Each year, the OEB benchmarks electricity distributors' total cost performance. The rankings from the benchmarking results for the current year's electricity distributors are used to assign stretch factors. The stretch factor forms part of the annual IRM process and is used to determine whether a distributor's rates will be adjusted. The benchmarking update using 2022 data determines the stretch factor assignments to be used in the 2024 rate-setting process.

In the most recent stretch factor rankings, PUC has been assigned to Cohort III, therefore, PUC has populated the IRM Rate Generator Model using the inflation factor of 4.8%, productivity factor of 0.00% and a stretch factor of 0.30% for a total price index adjustment of 4.50%.

The annual adjustment mechanism will apply to distribution rates (fixed and variable charges) uniformly across customer rate classes, the specific charge for access to the power poles – per pole/year, and the Retailer Service Charges, which are adjusted for the inflation factor each year.

3. Revenue-to-Cost Ratio Adjustment

The Revenue-to-Cost Ratios approved by the Board in PUC's 2023 Cost of Service Application (EB-2022-0059) were within the Board's target ranges, therefore, PUC is not applying for any adjustments to its Revenue-to-Cost Ratios in this Application.

4. Rate Design for Residential Electricity Customers

PUC transitioned to a 100% fixed monthly distribution charge for Residential customers in its
 2020 IRM Rate Application.

5. Retail Transmission Service Rates

PUC is applying for an increase in the network service rates. The increase is calculated using the 2024 IRM Rate Generator Model issued by the OEB that applies historical wholesale and retail consumption to current and future wholesale and retail rates.

For clarity, the RTSR's only include the Network Service Rate . PUC's customers are not subject to the Transformation Connection Service Rate as PUC owns the transformation stations connected to Hydro One's network.

On September 28, the OEB issued a letter regarding 2024 Preliminary Uniform Transmission Rates (UTRs). The OEB directed distributors to update their 2024 application with the updated rates. PUC has updated the 2024 rates in the 2024 IRM Rate Generator Model.

Table 2 below summarizes PUC's 2024 proposed RSTR - Network rates, as compared to current approved rates.

Table 2 – Current and Proposed Retail Transmission Service Rates

Rate Class		rrent RTSR -	•			
nate Class	Ne	etwork (\$)	Network (\$)			
Residential (kWh)	\$	0.0092	\$	0.0093		
General Service <50 kW (kWh)	\$	0.0086	\$	0.0087		
General Service > 50kW (kW)	\$	3.4567	\$	3.5087		
General Service >50 kW Interval Metered (KW)	\$	4.3474	\$	4.4128		
Unmetered Scattered Load (kWh)	\$	0.0086	\$	0.0087		
Sentinel Lighting (kW)	\$	2.6202	\$	2.6596		
Street Lighting (kW)	\$	2.6073	\$	2.6465		

6. Review and Disposition of Group 1 Deferral and Variance Account Balances

The following Table 3 provides the variances identified in the Rate Generator model in "Tab 3. Continuity Schedule".

Table 3 – Reconciliation of Deferral and Variance Account Balances

Reconciliation of 2.1.7 RRR to DVA Continuity Schedule

Account Descriptions	USoA #	otal Principal ecember 31, 2022)	otal Interest ecember 31, 2022)	tal Principal nd Interest		2.1.7 RRR Balances (December 31, 2022)		Balances (December 31,		Balances (December 31,		ariance
Smart Metering Entity Charge Variance Account	1551	\$ (109,907)	\$ (945)	\$ (110,852)	\$	(110,852)	\$	0				
RSVA - Wholesale Market Service Charge	1580	\$ 2,828,436	\$ 27,484	\$ 2,855,920	\$	2,691,789	\$	164,131				
Variance WMS – Sub-account CBR Class B	1580	\$ (160,873)	\$ (3,258)	\$ (164,131)	\$	-	\$	(164,131)				
RSVA - Retail Transmission Network Charge	1584	\$ 705,466	\$ 12,987	\$ 718,453	\$	718,453	\$	0				
RSVA - Power	1588	\$ (1,198,405)	\$ (52,963)	\$ (1,251,368)	\$	(1,251,368)	\$	(0)				
RSVA - Global Adjustment	1589	\$ (126,536)	\$ 12,619	\$ (113,917)	\$	(113,917)	\$	(0)				
1595 Disposition (2018)	1595	\$ 99,481	\$ (73,670)	\$ 25,811	\$	25,811	\$	-				
1595 Disposition (2019)	1595	\$ 103,267	\$ (127,752)	\$ (24,485)	\$	(24,485)	\$	-				
1595 Disposition (2021)	1595	\$ 10,230	\$ 1,884	\$ 12,114	\$	12,114	\$	0				
1595 Disposition (2022)	1595	\$ 174,672	\$ 19,619	\$ 194,291	\$	194,291	\$	(0)				
Total - Group 1 Accounts		\$ 2,325,831	\$ (183,996)	\$ 2,141,836	\$	2,141,836	\$	(0)				
LRAM	1568	\$ 165,614	\$ 33,100	\$ 198,714	\$	525	\$	198,189				
Total - DVAs		\$ 2,491,445	\$ (150,896)	\$ 2,340,550	\$	2,142,361	\$	198,189				

The variance for the RSVA – Wholesale Market Service Charge is not a difference between the continuity and the RRRs – the IRM Model is double counting the CBR Class B balance in the RSVA – Wholesale Market Service Charge. It is included in the main account and the subaccount.

The variance for the Lost Revenue Adjustment Mechanism ("LRAM") account is due to the approved disposition amount from the claim in PUC's 2023 COS Application not being recorded in the DVA general ledger Account 1568 until 2023. PUC is not claiming any amounts for this account in the 2024 IRM Application.

With the exception of the above noted variances, all balances agree to the RRR balances filed for December 31, 2022.

Proposed Disposition of Deferral and Variance Accounts

PUC's Group 1 Deferral and Variance Account balances filed in this 2024 IRM Application total a debit balance of \$2,057,294 equivalent to \$0.0033 per kWh, as calculated in "Tab 4. Billing Det. For Def-Var" in the 2024 IRM Rate Generator Model. The Threshold Test calculation outlined in

the EDDVAR Report is +/- \$0.001 per kWh. PUC's total Group 1 Deferral and Variance Account balances meet the threshold test; and PUC is requesting to dispose of the Group 1 DVA balances and recover the amounts through a rate rider based on the default period of one year.

PUC confirms that no adjustments were made to its Group 1 DVA Account balances that were previously approved by the OEB on a final basis.

The following Table 4 provides the variances identified in the Rate Generator model of "Tab 3. Continuity Schedule".

Table 4 – Proposed Disposition of Group 1 Deferral and Variance Accounts

Group 1 Accounts	USoA#	A	Principal Balances djusted for Disposition luring 2023		otal Interest (Projected)		Total Claim for Disposition
Smart Metering Entity Charge Variance Account	1551	\$	(93,204)	\$	(6,862)	\$	(100,066)
RSVA - Wholesale Market Service Charge	1580	\$	1,854,559	\$	126,980	\$	1,981,539
RSVA - Retail Transmission Network Charge	1584	\$	267,857	\$	16,310	\$	284,167
RSVA - Power (excluding Global Adjustment)	1588	\$	(45,023)	\$	(21,484)	\$	(66,507)
RSVA - Global Adjustment	1589	\$	(45,435)	\$	2,270	\$	(43,165)
1595 Disposition (2018)	1595	\$	99,481	\$	(73,670)	\$	25,811
1595 Disposition (2019)	1595	\$	103,267	\$	(127,752)	\$	(24,485)
Total Group 1 Account		Ś	2.141.502	Ś	(84.208)	Ś	2.057.294

Total Claim (including Account 1568)	\$ 2,057,294
Total Claim for Threshold Test (All Group 1 Account)	\$ 2,057,294
Threshold Test (Total Claim ner kWh)	\$ 0 0033

PUC last claimed Group 1 Account Balances in its 2023 COS Application. The proposed dispositions are adjusted for these amounts. PUC is requesting disposition of Group 1 Deferral and Variance Account balances, including 1589. PUC meets the threshold test of 0.001\$/kWh.

PUC has used the same allocation methodology as used in previous proceedings to assign Group 1 balances to its rate classes. In consideration of the recommendation outlined in the Filing Requirements along with assessing bill impacts, PUC has proposed a one-year disposition period. Rate rider calculations can be found in Table 5, 6 and 7 and the electronic copy of the 2024 IRM Rate Generator Model that has been submitted with this Application. A pdf version of the Model has been provided in Appendix D to this Application.

Projected interest was determined using OEB's prescribed interest rates.

The following Table 5 provides the calculated Rate Riders for Group 1 DVAs as identified in the Rate Generator model at "Tab 3. Continuity Schedule".

Table 5 – Proposed Group 1 Deferral and Variance Account Rate Riders

Group 1 Deferral and Variance Account Rate Riders												
Rate Class	Unit	Total Metered kWh	Total Metered kW	Gro	Allocation of oup 1 Account alances to All Classes	_	ferral/Variance Account Rate Rider

Total		614,991,299	545,282	\$	2,207,954		•					

Class A and Class B Customers

PUC settles GA costs with Class A customers on the basis of actual GA prices. Class A customers are billed their share of the actual GA charges by the IESO based on their percentage contribution to the top five peak Ontario demand hours (i.e., peak demand factor) over a one-year period. Accordingly, PUC has not allocated any of the GA variance balance to these customers for the period that they were designated Class A.

For non-RPP Class B customers, the RSVAGA captures the difference between the amounts billed by the distributor using the IESO's Global Adjustment 1st estimate and the actual amount paid by the distributor to the IESO for those customers. The manner in which the balance in the RSVAGA is disposed of is dependent on whether a customer was a non-RPP Class B customer for the full year the RSVAGA balance relates to or whether they transitioned between Class A and Class B during that year.

PUC has not had any customer transition between Class A and Class B during this period.

Commodity Accounts 1588 and 1589

On February 21, 2019, the OEB released a letter entitled Accounting Guidance related to Accounts 1588 Power and 1589 RSVA Global Adjustment as well as the related accounting guidance.

PUC confirmed in its 2021 IRM application that it has fully implemented the OEB's February 21, 2019, guidance effective from January 1, 2019. In its 2023 COS application PUC provided confirmation that the historical balances were reviewed and a summary of the Settlement process was provided. PUC's Accounts 1588 RSVA Power and 1589 RSVA GA balances were last

approved for disposition on a final basis for December 31, 2021, balances in PUC's 2023 COS

2 Application (EB-2022-0059).3

In this current application, PUC is requesting disposition of its 2022 commodity pass through accounts.

7. Global Adjustment Workform

The GA Analysis Workform ("GA Workform") is provided as Appendix E and is filed as a live excel file. The GA Workform compares the principal activity in the general ledger for the RSVAGA to the expected principal balance based on monthly GA volumes, revenue, and costs. The GA Workform provides a tool to assess if the principal activity in the RSVAGA in a specific year is reasonable.

In 2022, the principal activity recorded in the RSVAGA was a debit balance of \$223,095 excluding dispositions. The principal activity, adjusted for known adjustments of a credit of \$268,527 from a prior year adjustment resulted in a credit balance of \$45,432. This is compared to the expected principal balance in the RSVAGA of a credit balance in the amount of \$105,094, which results in an unreconciled difference of \$59,662 debit. This represents 0.7% of PUC's 2022 IESO purchases which is within the OEB's threshold (+/- 1% of IESO purchases).

The following table provides the calculated rate riders for the Global Adjustment return to customers.

Table 6 – Proposed Global Adjustment Rate Riders

Global Adjustment Rate Riders												
Rate Class	Total Metered Non-Ri Unit 2022 Consumption excluding WMP		Total Metered 2022 Consumption for Class A Customers that were Class A for the entire period GA balance accumulated	Non-RPP Metered 2022 Consumption for Current Class B Customers (Non- RPP Consumption excluding WMP, Class A and Transition Customers' Consumption)	Total GA \$ allocated to Current Class B Customers	GA	Rate Rider (kWh)					
RESIDENTIAL SERVICE CLASSIFICATION	kWh	3,180,884	-	3,180,884	\$ (849)	\$	(0.0003)					
GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION	kWh	14,768,511	-	14,768,511	\$ (3,941)	\$	(0.0003)					
GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION	kW	177,907,446	36,406,873	141,500,573	\$ (37,764)	\$	(0.0003)					
STREET LIGHTING SERVICE CLASSIFICATION	kW	2,288,349	-	2,288,349	\$ (611)	\$	(0.0003)					
Total		198,145,190	36,406,873	161,738,317	\$ (43,165)							

8. Disposition of Account 1595

As per Chapter 3 Filing Requirements, Distributors are expected to request disposition of residual balances in Account 1595 for each vintage year only once, on a final basis. Distributors only become eligible to seek disposition of these residual balances two years after the expiry of the rate rider and the balance has been externally audited.

PUC has completed its review of Account 1595 balances and has identified two sub-accounts that are eligible for disposition in this rate proceeding; Account 1595 (2018) and Account 1595

- 1 (2019) rate rider sunset date December 31, 2020. Variances in the 1595 disposal accounts are
- 2 due to the difference between the billing determinates used in these respective years for the
- 3 rate rider and the actual consumption incurred.

9. Wholesale Market Participants

5 6

7

8

9

10

4

A Wholesale Market Participant ("WMP") refers to any entity that participates directly in any of the Independent Electricity System Operator ("IESO") administered markets; and therefore, should not be allocated balances related to transmission network and connection charges and disposition/refund of regulatory balances. PUC confirms that none of its customers are WMPs and therefore separate rate riders do not apply.

10. Capacity Based Recovery

111213

14

PUC has followed the approach identified in the Filing Requirements to address the disposition of CBR variances. A separate rate rider has been calculated in Tab 6.2.CBR B in the Rate Generator model to dispose the balance over the period of one year.

15 16 17

Table 7 – Proposed CBR Class B Rate Riders

11. LRAM Variance Account (LRAMVA)

2223

24

25

26

21

The Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) is a retrospective adjustment designed to account for differences between forecast revenue loss attributable to Conservation and Demand Management (CDM) activity embedded due to the impacts of CDM programs. The OEB established Account 1568 as the LRAMVA to capture the difference between the OEB-approved CDM forecast and actual results at the customer rate class level.

2728

PUC is not requesting disposition of any LRAMVA balance in this Application, with all lost revenues to end 2021 having been approved for disposition in its 2023 Cost of Service Application (EB-2022-0059).

12. Rate Rider for PUC Sault Smart Grid Project Recovery Mechanism

As part of PUC's 2023 COS Application (EB-2022-0059), the OEB approved a SSG Project Recovery Mechanism for all rate classes. The full detail of the mechanism is outlined in Appendix G – 2023 COS - Sault Smart Grid Project (EB-2022-0059, pg60-69). PUC is required to true-up for the period of May 1, 2023, to April 30, 2028, the net recovery for the SSG Project during this period after considering the lower of:

a) total rate riders collected from May 1, 2023, to April 30, 2028

 b) the sum of 2023 to 2027 revenue requirements, where the annual revenue requirement is the lower of i) the recalculated revenue requirement based on the actual SSG Project capital costs and in-service dates, and ii) the settled forecasted revenue requirement used to calculate the SSG Recovery Mechanism Rate Rider.

PUC is proposing to use the Rate Riders calculated and approved in the 2023 COS Application [EB2022-0059] for Sault Smart Grid Project for the May 1, 2024, to April 30, 2025, period.

Table 8 – Smart Grid Rate Riders

2024 (effective from May 1, 2024 to April 30, 2025)													
	Billi	ng Determinants			Rate	Riders							
Customer Class	# of Customers	Consumption	unit	Fixe	ed Rate	Volumetric Rate							
Residential	30340	282,922,375		\$	3.54	-							
GS < 50 kW	3400	86,539,469	kWh	\$	2.06	0.0029							
GS >50 to 4,999 kW	344	575,372	kW	\$	11.39	0.7612							
Street Lighting	8037	7,200	kW	\$	0.15	1.0105							
Sentinel Lighting	317	566	kW	\$	0.40	3.7518							
Unmetered and Scattered	25	878,528	kWh	\$	1.26	0.0044							
Total													

13. Rate Rider for Embedded Generation

As part of PUC's 2023 COS Application (EB-2022-0059), the OEB approved an embedded generation rate rider refund of (\$.0004/kWh) for all rate classes. This rate rider was to address the systematic over collection of the WMS and RRRP from customers relative to the obligation to the Independent Electricity System Operator ("IESO"). The over collection is driven, in part, by embedded generation for which PUC is not required to pay the WMS or RRRP to the IESO. The rate rider is calculated by calculating the forecasted energy from embedded generation.

PUC is proposing to continue the Rate Rider for Embedded Generation Adjustment as approved in the 2023 COS Application [EB-2022-0059]. As this is related to Regulatory charges, the annual adjustment mechanism will not be applied.

14. Tax Changes

In its Supplemental Report of the Board on 3rd Generation Incentive Regulation for Ontario's Electricity Distributors [EB-207-0673], the OEB determined a 50/50 sharing of the impact of currently known legislation tax changes as applied to the tax level reflected in the Board-approved base rates for distributors is appropriate. The tax allocation will be allocated to customer rate classes based on the last Board approved COS distribution revenue. The Board has determined that currently known tax changes from the level reflected in the Board-approved base rates will be reflected in the IRM adjustments.

PUC has completed the OEB's 2024 IRM Rate Generator Model (Tab "8. STS-Tax Change" and Tab "9. Shared Tax-Rate Rider") and calculated annual tax changes allocated to customer rate classes based on the 2023 Board Approved billing determinants and distribution rates (2023 COS file number EB-2022-0059). As there are no applicable legislated tax changes since its last rebasing application (EB2022-0059), there are no amounts for allocation to customer rate classes.

15. Regulatory Charges

 PUC's current 2023 approved Tariff of Rates and Charges includes several rates to be charged to customers to cover the costs associated with various programs and wholesale market services. The rates are each a component of the "Regulatory Charge" on a customer's bill and established by the OEB annually through a separate generic rate order. Regulatory rates to be charged include:

• The current 2023 RRRP rate of \$0.0007 per kWh was set by the OEB on December 8, 2022. The RRRP charge is a source of revenue for identified rural and remote electricity distributors to allow them to reduce the amount of revenue they would otherwise have to charge some of their customers to distribute electricity.

• The current rates for WMS, billed to Class A and B customers, and for CBR, billed to Class B customers are \$0.0041 per kWh and \$0.0004 per kWh, respectively. Distributors bill Class A customers their share of the actual CBR charge based on their contribution to peak demand.

Wholesale market service (WMS) charges are designed for distributors to recover costs
charged by the Independent Electricity System Operator (IESO) for the operation of the
IESO-administered markets and the operation of the IESO-controlled grid, as well as the
costs of the IESO's CBR initiative. Electricity distributors recover the WMS charges from
customers through the WMS rate.

The current generic regulatory rates have been included in PUC's proposed 2024 Tariff of Rates and Charges in Appendix B.

Specific Service Charges, Retail Service Charges, Allowances, and Loss Factors

16. Other Rate and Charges

PUC's Tariff includes energy retailer charges. Energy retailer service charges refer to the charges that recover the cost of services provided by electricity distributors to electricity retailers or to customers, related to the supply of competitive electricity. In accordance with OEB's energy retailer service charges report, generic retailer service charges for rate-regulated electricity distributors are to be adjusted by an annual inflation factor. Energy retailer service charges have been adjusted by the known 2024 inflationary factor of 4.80% by the IRM Generator Model and appear in the proposed 2024 Tariff of Rates and Charges. The OEB issued EB-2023-0193 inflationary adjustment effective January 1, 2024 that confirms these rates.

In accordance with OEB's Wireline Pole Attachment Charges Report generic wireline pole attachment charges for rate-regulated electricity distributors are to be adjusted by an annual inflation factor. Wireline pole attachment charges have been adjusted by the known 2024 inflationary factor of 4.80% by the IRM Generator Model and appears in the proposed 2024 Tariff of Rates and Charges. The OEB issued EB-2023-0194 - Distribution Pole Attachment Charge for 2024, dated September 26, 2023, which confirms the rate of \$37.78 per attacher, per year, per pole.

MicroFIT Generator Rate

Each year, the OEB reviews the province-wide fixed monthly service charge related to the microFIT Generator Service Classification to ensure that it continues to reflect actual costs. It was last reviewed January 26, 2022. PUC's 2023 approved Tariff of Rates and Charges includes this microFIT province-wide generator rate with a monthly service charge of \$4.55.

 PUC is applying for the continuation of this rate at the province-wide uniform fixed monthly service charge currently set at \$4.55. This rate and charge amount has been included in PUC's proposed 2024 Tariff of Rates and Charges in Appendix C. Rate Rider for Smart Metering Entity Charge PUC's 2023 approved Tariff of Rates and Charges includes a Rate Rider for Smart Metering Entity Charge (SMC) of \$0.42 per smart meter per month applicable to all Residential and General Service less than 50kW customers. On September 8, 2022, the OEB approved the application by the Independent Electricity System Operator ("IESO"), in its capacity as the Smart Metering Entity (SME), for a SMC of \$0.42 per smart meter per month for the 2023-2027 period (EB- 2022-0137). The OEB also issued a letter to all licensed electricity distributors outlining that the SMC is a pass-through amount to be charged by distributors to all applicable customers in the Residential and General Service <50kW classes. The SMC of \$0.42 has been included on PUC's proposed 2024 Tariff of Rates and Charges in Appendix C. 17. Z-Factor Claims and Incremental Capital Module (ICM) PUC is not requesting a Z-Factor claim or an ICM in this proceeding. 18. Treatment of Costs for "eligible investments" PUC submitted its 5-year Distribution System Plan ("DSP") with its 2023 Cost of Service Rate Application (EB-2022-0059). As referenced within Section 2.3.9 of the DSP, PUC's distribution system is capable of accommodating REG and no capital investments are needed for capacity upgrades to facilitate the connection of renewable energy generation plant at this time. Therefore, no requirement to establish deferral accounts for these types of costs or recovery of costs is requested or required. 19. Conservation and Demand Management Costs for Distributors PUC's CDM programs are funded through the IESO and therefore confirms that no CDM costs are included in distribution rates. 20. Specific Exclusions from IRM Applications PUC confirms that it is not seeking items specifically excluded from the IRM rate application

process, in this application.

PUC Distribution Inc. 2024 IRM Application EB-2023-0048 Filed: October 11, 2024 Page 17 of 17

21. Bill Impacts

Bill impacts were derived for each rate class using the 2024 IRM Rate Generator Bill Impact calculation in Sheet 20. A detailed listing of customer bill impacts is set out under Sheet 21 of the 2024 IRM Rate Generator Model.

No rate mitigation plans are necessary as a result of the bill impacts.

Table 9 – Bill Impact Summary

Rate Class	RPP/Non-RPP	Avg Monthly Volume			Total Current		Total Proposed Total Bill Impact		Total Bill		
		kWh	kW		Bill		Bill		(\$)	Impact (%)	
Residential	RPP	750	-	\$	126.41	\$	132.97	\$	6.56	5.2%	
General Service Less than 50 kW	RPP	2,000	-	\$	314.98	\$	333.81	\$	18.83	6.0%	
General Service 50 to 4,999 kW	Non-RPP	57,220	145	\$	9,738.29	\$	10,114.26	\$	375.97	3.9%	
Unmetered Scattered Load	RPP	3,600	-	\$	601.76	\$	635.01	\$	33.25	5.5%	
Sentinel Lighting	RPP	50	1	\$	55.07	\$	61.21	\$	6.14	11.1%	
Street Lighting	Non-RPP	199,852	585	\$	52,355.21	\$	56,877.37	\$	4,522.16	8.6%	

22. Conclusion

In summary, total bill impacts are well below the rate mitigation threshold and PUC considers the proposed distribution rates and applicable disposition to be both reasonable and prudent. PUC respectfully requests that the Board approve the relief sought in this Application.

CERTIFICATIONS

Certification of Evidence

As Vice President, Corporate Services of PUC Distribution Inc., I certify that, to the best of my knowledge, the evidence filed in support of this Application is accurate and complete; and complies with Chapter 1 and 3 of the Board's Filing Requirements for Electricity Distribution Rate Applications – 2023 Edition for 2023 Rate Applications issued on June 15, 2024.

Certification Regarding Personal Information

As Vice President, Corporate Services of PUC Distribution Inc., I certify that, to the best of my knowledge, that the evidence filed in this Application does not include any personal information, as defined in the Freedom of Information and Protection of Privacy Act, that is not otherwise redacted in accordance with Rule 9A of the OEB's Rules of Practice and Procedure.

Certification Regarding Personal Information

As Vice President, Corporate Services of PUC Distribution Inc., I certify that, to the best of my knowledge, PUC has robust processes and internal controls in place for the preparation, review, verification and oversight of the deferral and variance account balances.

Respectfully submitted,

K. Mark Faught, CPA, CMA

Vice President, Corporate Services

Dated at Sault Ste. Marie, Ontario, this 11th of October 2023

Appendix B

2023 Current Tariff of Rates and Charges (2023 Rate Order EB-2022-0059)

Effective and Implementation Date May 1, 2023

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2022-0059

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a single family unit, non-commercial. This can be a separately metered living accommodation, town house, apartment, semi-detached, duplex, triplex or quadruplex with residential zoning. Class B consumers are defined on accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2022-0059

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly peak demand used for billing purposes over the past 12 months is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined on accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2022-0059

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined on accordance with O. Reg. 429/04. Further servicing details are available in the Distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2022-0059

SENTINEL LIGHTING SERVICE CLASSIFICATION

This classification applies to safety/security lighting with a Residential or General Service customer. This is typically exterior lighting, and unmetered. Consumption is estimated based on the equipment rating and estimated hours of use. Class B consumers are defined on accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a single family unit, non-commercial. This can be a separately metered living accommodation, town house, apartment, semi-detached, duplex, triplex or quadruplex with residential zoning. Class B consumers are defined on accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly peak demand used for billing purposes over the past 12 months is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined on accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

Effective and Implementation Date May 1, 2024

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB2023-0048

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

microFIT SERVICE CLASSIFICATION

PUC Distribution Inc. TARIFF OF RATES AND CHARGES

Effective and Implementation Date May 1, 2024

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB2023-0048

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$ 4.55

ALLOWANCES

Transformer Allowance for Ownership - per kW of billing demand/month	\$/kW	(0.60)
Primary Metering Allowance for transformer losses - applied to measured demand and energy	%	(1.00)

SPECIFIC SERVICE CHARGES

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule

No charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RETAIL SERVICE CHARGES (if applicable)

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	117.02
Monthly fixed charge, per retailer	\$	46.81
Monthly variable charge, per customer, per retailer	\$/cust.	1.16
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.69
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.69)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.59
Processing fee, per request, applied to the requesting party	\$	1.16
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail		
Settlement Code directly to retailers and customers, if not delivered electronically through the		
Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	4.68
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$	2.34

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

l otal Loss Factor - Secondary Metered Customer < 5,000 kW	1.0462
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0357

Assigned EB Number EB2023-0048
Name of Contact and Title Pina Pacione, Manager Regulatory & Customer Affair
Phone Number 705-971-7886
Email Address pina.pacione@ssmpuc.com
Rate Effective Date May 1, 2024
Rate-Setting Method Price Cap IR
1. Select the last Cost of Service rebasing year.
To determine the first year the continuity schedules in tab 3 will be generated for input, answer the following questions: For all the the responses below, when selecting a year, select the year relating to the account balance. For example, if the 2021 balances that reviewed in the 2023 rate application were to be selected, select 2021.
2. For Accounts 1588 and 1589, please indicate the year of the account balances that the accounts were last disposed on a final basis for information purposes.
Determine whether scenario a or b below applies, then select the appropriate year.
a) If the account balances were last approved on a final basis, select the year of the year- end balances that were last approved for disposition on a final basis.
b) If the account balances were last approved on an interim basis, and
i) there are no changes to the previously approved interim balances, select the year of the year-end balances that were last approved for diposition on an interim basis. ii) there are changes to the previously approved interim balances, select the year of the year-end balances that were last approved for disposition on a final basis.
3. For the remaining Group 1 DVAs, please indicate the year of the account balances that were last disposed on a final basis Determine whether scenario a or b below applies, then select the appropriate year.
a) If the account balances were last approved on a final basis, select the year of the year- end balances that the balance was were last approved on a final basis.
b) If the accounts were last approved on an interim basis, and
i) there are no changes to the previously approved interim balances, select the year of the year-end balances that were last approved for diposition on an interim basis.
ii) If there are changes to the previously approved interim balances, select the year of the year-end balances that were last approved for disposition on a final basis.
4. Select the earliest vintage year in which there is a balance in Account 1595. (e.g. If 2017 is the earliest vintage year in which there is a balance in a 1595 sub-account, select 2017.)
5. Did you have any Class A customers at any point during the period that the Account 1589 balance accumulated (i.e. from the year the balance selected in #2 above to the year requested for disposition)?
6. Did you have any Class A customers at any point during the period where the balance in Account 1580, Sub-account CBR Class B accumulated (i.e. from the year selected in #3 above to the year requested for disposition)?
7. Retail Transmission Service Rates: PUC Distribution Inc. is: Transmission Connected
8. Have you transitioned to fully fixed rates?
9. Do you want to update your low voltage service rate?
<u>Legend</u>
Pale green cells represent input cells.
Pale blue cells represent drop-down lists. The applicant should select the appropriate item from the drop-down list.
Red cells represent flags to identify either non-matching values or incorrect user selections.
Pale grey cells represent auto-populated RRR data.
White cells contain fixed values, automatically generated values or formulae.

Please complete the following continuity schedule for the following Deferral/Variance Accounts. Enter information into green cells only. Please see instructions tab for detailed instructions on how to complete tabs 3 to 7. Column BV has been prepopulated from the latest 2.1.7 RRR filing.

Please refer to the footnotes for further instructions.

ata on this worksheet has been populated using your most recent RRR filing. f you have identified any issues, please contact the OEB. Have you confirmed the accuracy of the data below?

If a distributor uses the actual GA price to bill non-RPP Class B customers for an entire rate class, it must exclude these customers from the allocation of the GA balance and the calculation of the resulting rate riders. These rate classes are not to be charged/refunded the general GA rate rider as they did not contribute to the GA balance.

lease contact the UEB to make adjustments to the IKM rate generator for this ituation.

Total Claim (including Account 1568 and 1509) Total Claim for Threshold Test (All Group 1 Accounts) Threshold Test (Total claim per kWh) ² \$2,057,294 \$2,057,294 \$0.0033

Currently, the threshold test has been met and the default is that Group 1 account balances will be disposed. If you are requesting not to dispose of the Group 1 account balances, please select NO and provide detailed reasons in the manager's summary.

YES

¹ Residual Account balance to be allocated to rate classes in proportion to the recovery share as established when rate riders were implemented.

The Threshold Test does not include the amount in 1568.
 The proportion of customers for the Residential and GS<50 Classes will be used to allocate Account 1551.

No input required. This worksheet allocates the deferral/variance account balances (Group 1 and Account 1568) to the appropriate classes as per EDDVAR dated July 31, 2009.

^{**} Used to allocate Account 1551 as this account records the variances arising from the Smart Metering Entity Charges to Residential and GS<50 customers.

customers in each rate class for each year, including any transition customer's consumption identified in table 3a above that were Class A customers for the full year before/after the transition year (E.g. If a customer transitioned from Class B to A in 2021, exclude this customer's consumption for 2021 but include this customer's consumption in 2022 as

they were a Class A customer for the full year).

Incentive Rate-setting Mechanism Rate Generator for 2024 Filers

The year Account 1589 GA was last disposed 2021 The year Account 1580 CBR Class B was last disposed Note that the sub-account was established in 2015. Did you have any customers who transitioned between Class A and Class (If you received approval to dispose of the GA account balance as B (transition customers) during the period the Account 1589 GA balance No at December 31, 2019, the period the GA variance accumulated accumulated (i.e. from the year after the balance was last disposed per #1a would be 2020 to 2022.) above to the current year requested for disposition)? Did you have any customers who transitioned between Class A and Class (If you received approval to dispose of the CBR Class B account B (transition customers) during the period the Account 1580, sub-account No balance as at December 31, 2019, the period the CBR Class B CBR Class B balance accumulated (i.e. from the year after the balance was variance accumulated would be 2020 to 2022.) last disposed per #1b above to the current year requested for disposition)? Enter the number of rate classes in which there were customers who were Class A for the full year during the period the Account 1589 GA or Account 1580 CBR B balance accumulated (i.e. from the year after the balance was last disposed per #1a/1b above to the current year requested for disposition). In the table, enter the total Class A consumption for full year Class A

Rate Classes with Class A Customers - Billing Determinants by Rate Class

	Rate Class		2022	2021
Rate Class 1	GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION	kWh	36,406,873	38,085,805
		kW	85,963	98,940

The purpose of this tab is to calculate the GA rate riders for all current Class B customers who did not transition between Class A and B in the period since the Account 1589 GA was last disposed. Calculations in this tab will be modified upon completion of tab 6.1a, which allocates a portion of the GA balance to transition customers, if applicable.

Effective January 2017, the billing determinant and all rate riders for the disposition of GA balances will be calculated on an energy basis (kWhs) regardless of the billing determinant used for distribution rates for the particular class (see Chapter 3. Filing Requirements)

Notes

2. The OEB's proxy for taxable capital is rate base.

^{1.} The appropriate Federal and Ontario small business rates are calculated in the Income/PILs Workform. The Federal and Ontario small business deduction:

a. is applicable if taxable capital is below \$10 million.

b. is phased out with taxable capital of more than \$10 million.

c. is completely eliminated when the taxable capital is \$50 million or more.

This is effective for taxation years starting in 2022. Prior to 2022, the small business deduction was completely eliminated when taxable capital was \$15 million or more.

Calculation of Rebased Revenue Requirement and Allocation of Tax Sharing Amount. Enter data from the last OEB-approved Cost of Service application in columns C through H.

As per Chapter 3 Filing Requirements, shared tax rate riders are based on a 1 year disposition.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed. If any of the Hydro One Sub-transmission rates (column E, I and My are highlighted in red, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancy in rates.

*** subject to change pending OEB order on miscellaneous service charges

In the Green Cells below, enter all proposed rate riders/rates.
In column A, select the rate rider descriptions from the drop-down list in the blue cells. If the rate description cannot be found, enter the rate rider descriptions in the green cells. The rate rider description must begin with "Rate Rider for".
In column B, choose the associated unit from the drop-down menu.
In column C, enter the rate. All rate riders with a "\$" unit should be rounded to 2 decimal places and all others rounded to 4 decimal places.
In column C, enter the rate. All rate riders with a "\$" unit should be rounded to 2 decimal places and all others rounded to 4 decimal places.
In column C, enter the expiry date (e.g., April 30, 2025) or description of the expiry date in text (e.g. the effective date of the next cost of service-based rate order).
In column G, a sub-total (A or B) should already be assigned to the rate rider unless the rate description was entered into a green cell in column A. In these particular cases, from the dropdown list in column G, also set the appropriate sub-total (a Or B). Sub-total A refers to rates/rate riders that Not considered as pass through costs (eg: LRAMVA and ICM/ACM rate riders). Sub-total B refers to rates/rate riders that are considered pass through costs.

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. Those distributors that are still in the process of moving to fully fixed residential rates should refer to section 3.2.3 of Chapter 3 of the Filing Requirements for Incentive Rate-Setting Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA of \$0.1076/kWh (IESO's Monthly Market Report for May 2023) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
- 2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

2024 GA Analysis Workform

Ontario Energy Board

GA Analysis Workform for 2024 Rate Applications

Input cells Drop down cells		
Utility Name	PUC Distribution Inc.	

For Account 1589 and Account 1588, determine if a or b below applies and select the appropriate year related to the account balance in the

drop-down box to the right.

a) If the account balances were last approved on a final basis, select the year-end balances that were last approved on a final basis.

basis.
b) if the account balances were last approved on an interim basis, and
i) there are no changes to the previously approved interim balances, select the year of the year-end balances that were last approved
for diposition on an interim basis. OR
ii) there are changes to the previously approved interim balances, select the year of the year-end balances that were last approved for
disposition on a final basis. An explanation should be provided to explain the reason for the change in the previously approved interim

(e.g. If the 2021 balances that were reviewed in the 2023 rate application were to be selected, select 2021)

INSUCCIONS:

1) Determine which scenario above applies (a, bi or bii). Select the appropriate year to generate the appropriate GA Analysis Workform tabs, and information in the Principal Adjustments tab and Account 1588 tab.

For example:

• Scenario a -If 2021 balances were last approved on a final basis - Select 2021 and a GA Analysis Workform for 2022 will be generated. The input cells required in the Principal Adjustment and Account 1588 tabs will be generated accordingly as well.

• Scenario bi - If 2021 balances were last approved on an interim basis and there are no changes to 2021 balances - Select 2021 and a GA Analysis Workform for 2022 will be generated. The input cells required in the Principal Adjustment and Account 1588 tabs will be enerated accordingly as well.

• Scenario bii - If 2021 balances were last approved on an interim basis, there are changes to 2021 balances, and 2020 balances w

• Scenario bii - II 2021 balances were last approved on an interim basis, there are changes to 2021 balances, and 2020 balances were last approved for disposition - Select 2020 and 6A Analysis Workforms for 2021 and 2022 will be generated. The input cells required in the Principal Adjustment and Account 1588 tabs will be generated accordingly as well.
2) Complete the GA Analysis Workform for each year generated.
3) Complete the Account 1588 tab. Note that the number of years that require the reasonability test to be completed are shown in the Account 1588 tab, depending on the year selected on the Information Sheet.
4) Complete the Principal Adjustments tab. Note that the number of years that require principal adjustment reconciliations are all shown in the one Principal Adjustments tab, depending on the year selected on the Information Sheet.

See the separate document GA Analysis Workform Instructions for detailed instructions on how to complete the Workform and examples of

Most Recent Approved Loss Factor for Secondary Metered	
Customer < 5,000kW	1.0462
Difference	0.0108

a) Please provide an explanation in the text box below if columns G and H for unbilled consumption are not used in the table above.

PUC is able to obtain actual billed usage from its Customer Information System that is prorated into the proper month based on the meter read start and end date. Therefore, actual usage applicable to each calendar month is able to be obtained and there is not a need to adjust for the provious or current month's unbilled estimates in columns G and H.

) Please provide an explanation in the text box below if the difference in loss factor is greater than 1%

Year	Transactions ¹	Adjustments ¹	Year	Purchased	Account 4705
2022	- 313,550	268,527	- 45,023	63,731,011	-0.1%
Cumulative	- 313,550	268,527	- 45,023	63,731,011	-0.1%

Notes

1) The transactions should equal the "Transaction" column in the DVA Continuity Schedule. This is also expected to equal the transactions in the general ledger (excluding transactions relating to the removal of approved disposition amounts as that is shown in a separate column in the DVA Continuity Schedule) 2) Principal adjustments should equal the "Principal Adjustments" column in the DVA Continuity Schedule. Principal adjustments adjust the transactions in the general ledger to the amount that should be requested for disposition.

3.2.7.1 Disposition of the LRAMVA and Rate Riders for Previously Approved LRAM-Eligible Amounts			
3.2.7.1 Disposition of the LRAMVA and Rate Riders for	The 2021 CDM Guidelines require distributors filing an application for 2023 rates to seek disposition of all outstanding LRAMVA balances related to previously established LRAMVA thresholds	Not applicable	

2024 IRM Checklist

PUC Distribution Inc. EB-2023-0048

Date: October 11, 2023

iling Requirement Section/Page Reference	IRM Requirements	Evidence Reference Notes
16	A distributor with a zero balance in the LRAMVA should indicate this fact in its application and advise that it is not requesting any disposition. If a distributor with zero balance in the LRAMVA is requesting rate rider(s) for 2024 rates to recover an LRAM-eligible amount approved in a previous proceeding, the distributor should reference the previous OEB decision where the base LRAM-eligible amount for 2024 (i.e., the amount prior to the mechanistic adjustment) was approved, and provide the calculations used to generate the requested LRAM-eligible rate riders (i.e., the mechanistic adjustment and the allocation to rate classes). Distributors are to input the resulting rate rider(s) in Tab 19 – Additional Rates of the IRM Rate Generator Model. Distributors in this circumstance do not need to file the LRAMVA workform or any additional documentation.	Application: Manager's Summary, p.12
r Distributors with non-zero balance in the LRAMVA	Completed latest version of LRAMVA Workform (ideally Version 1.2) in a working Excel file when making LRAMVA requests for	
17	remaining amounts related to CFF activity	Not applicable
17	Final Verified Annual Reports if LRAMVA balances are being claimed from CDM programs delivered in 2017 or earlier. Participation and Cost reports in Excel format, made available by the IESO, provided to support LRAMVA balances for programs for the period of January 1, 2018 to April 15, 2019. These reports should be filed in Excel format, similar to the previous Final Verified Annual Reports from 2015 to 2017. To support savings claims for projects completed after April 15, 2019, distributors should provide similar supporting evidence	Not applicable
17	File other supporting evidence with an explanation and rationale should be provided to justify the eligibility of any other savings from a program delivered by a distributor through the Local Program Fund that was part of the Interim Framework after April 15, 2019.	Not applicable
17	Meet the OEB's requirements related to personal information and commercially sensitive information as stated in the Filing Requirements	Not applicable
18	Statement identifying the year(s) of new lost revenues and prior year savings persistence claimed in the LRAMVA disposition	Not applicable
18	Statement confirming LRAMVA based on verified savings results supported by the distributors final CDM Report and Persistence Savings Report (both filed in Excel format) and a statement indicating use of most recent input assumptions when calculating lost	Not applicable
18	revenue Summary table with principal and carrying charges by rate class and resulting rate riders	Not applicable
18	Statement confirming the period of rate recovery Statement providing the proposed disposition period; rationale provided for disposing the balance in the LRAMVA if significant	Not applicable
18	rate rider is not generated for one or more customer classes	Not applicable
18	File details related to the approved CDM forecast savings from the distributor's last rebasing application Rationale confirming how rate class allocations for actual CDM savings were determined by class and program (Tab 3-A of	Not applicable
18	LRAMVA Work Form)	Not applicable
18	Statement confirming whether additional documentation was provided in support of projects that were not included in distributor's final CDM Annual Report (Tab 8 of LRAMVA Work Form as applicable)	Not applicable
18	File in support of a previous LRAMVA application, distributors should provide Participation and Cost Reports and detailed project level savings files made available by the IESO and/or other supporting evidence to support the clearance of energy- and/or demand-related LRAMVA balances where final verified results from the IESO are not available. These reports should be filed in Excel format, similar to the previous Final Verified Annual Reports from 2015 to 2017	Not applicable
	For a distributor's streetlighting project(s) which may have been completed in collaboration with local municipalities, the following must be provided: Explanation of the methodology to calculate streetlighting savings; Confirmation whether the streetlighting savings were calculated in accordance with OEB-approved load profiles for streetlighting projects; Confirmation whether the streetlighting project(s) received funding from the IESO and the appropriate net-to-gross assumption used to calculate streetlighting savings.	
18 - 19	For the recovery of lost revenues related to demand savings from street light upgrades, distributors should provide the following information: o Explanation of the forecast demand savings from street lights, including assumptions built into the load forecast from the last CoS application o Confirmation that the street light upgrades represent incremental savings attributable to participation in the IESO program, and that any savings not attributable to the IESO program have been removed (for example, other upgrades under normal asset management plans) o Confirmation that the associated energy savings from the applicable IESO program have been removed from the LRAMVA workform so as not to double count savings (for example, if requesting lost revenue recovery for the demand savings from a street light upgrade program, the associated energy savings from the Retrofit program have been subtracted from the Retrofit total) o Confirmation that the distributor has received reports from the participating municipality that validate the number and type of bulbs replaced or retrofitted through the IESO program o A table, in live excel format, that shows the monthly breakdown of billed demand over the period of the street light upgrade project, (including data on number of bulbs, type of bulb replaced or retrofitted, average demand per bulb)	Not applicable
19	For the recovery of lost revenues related to demand savings from other programs that are not included in the monthly Participation and Cost Reports of the IESO (for example Combined Heat and Power projects), distributors should provide the following information: o The third party evaluation report that describes the methodology to calculate the demand savings achieved for the program year. In particular, if the proposed methodology is different than the evaluation approaches used by the IESO, an explanation must be provided explaining why the proposed approach is more appropriate o Rationale for net-to-gross assumptions used o Breakdown of billed demand and detailed level calculations in live excel format	Not applicable
19 - 20 Continuing Use of the LRAMVA for New CDM Activities	For program savings for projects completed after April 15, 2019, distributors should provide the following: o Related to CFF programs: an explanation must be provided as to how savings have been estimated based on the available data (i.e. IESO's Participation and Cost Reports) and/or rationale to justify the eligibility of the program savings. o Related to programs delivered by the distributor through the Local Program Fund under the Interim CDM Framework: an explanation and rationale should be provided to justify the eligibility of the additional program savings.	Not applicable
21	Statement whether it is requesting an LRAMVA for one or more of these activities, if this request has not been addressed in a	Not applicable
3.2.8 Tax Changes	previous application.	approadio
21	Tabs 8 and 9 of Rate Generator model are completed, if applicable If a rate rider to the fourth decimal place is not generated for one or more customer classes, the entire sharing tax amount is be	Not applicable
21 - 22	transferred to Account 1595 for disposition at a future date	Not applicable
3.2.9 Z-Factor Claims 22	Eligible Z-factor cost amounts are recorded in Account 1572, Extraordinary Event Costs. Carrying charges are calculated using simple interest applied to the monthly opening balances in the account and recorded in a separate sub-accounts of this account	Not applicable
23	To be eligible for a Z-factor claim, a distributor must demonstrate that its achieved regulatory return on equity (ROE), during its most recently completed fiscal year, does not exceed 300 basis points above its deemed ROE embedded in its base rates	Not applicable
3.2.9.1 Z-Factor Filing Guidelines	Evidence that costs incurred meet criteria of causation, materiality and prudence	Not applicable
23		Not applicable
23	In addition, the distributor must: - Notify OEB by letter of all Z-Factor events within 6 months of event - Apply to OEB to recover costs recorded in the OEB-approved deferral account claimed under Z-Factor treatment - Demonstrate that distributor could not have been able to plan or budget for the event and harm caused is genuinely incremental - Demonstrate that costs incurred within a 12-month period and are incremental to those already being recovered in rates as part of ongoing business risk	Not applicable

2024 IRM Checklist

PUC Distribution Inc. EB-2023-0048

Date: October 11, 2023

Filing Requirement Section/Page Reference	IRM Requirements	Evidence Reference, Notes	
3.2.9.2 Recovery of Z-Factor Costs			
23	Description of manner in which distributor intends to allocate incremental costs, including rationale for approach and merits of alternative allocation methods	Not applicable	
23	Specification of whether rate rider(s) will apply on fixed or variable basis, or combination; length of disposition period and rational for proposal	Not applicable	
23	Residential rate rider to be proposed on fixed basis	Not applicable	
23	Detailed calculation of incremental revenue requirement and resulting rate rider(s)	Not applicable	
3.2.10 Off-Ramps			
24	If a distributor whose earnings are in excess of the dead band nevertheless applies for an increase to its base rates, it needs to substantiate its reasons for doing so	Not applicable	
24	A distributor is expected to file its regulated ROE, as was filed for 2.1.5.6 of the RRR. However, if in the distributor's view this ROE has been affected by out-of-period or other Items (for example, revenues or costs that pertain to a prior period but recognized in a subsequent one), it may also file a proposal to normalize its achieved regulated ROE for those impacts, for consideration by the OEB.	Not applicable	
3.3.1 Advanced Capital Module			
5	Capital Module applicable to ACM and ICM, for an incremental or pre-approved Advanced Capital Module (ICM/ACM) cost recovery and associated rate rider(s)	Not applicable	
25	Evidence of passing "Means Test"	Not applicable	
25	Information on relevant project's (or projects') updated cost projections, confirmation that the project(s) are on schedule to be completed as planned and an updated ACM/ICM module in Excel format	Not applicable	
25	If proposed recovery differs significantly from pre-approved amount, a detailed explanation is required	Not applicable	
3.3.2 Incremental Capital Module			
26	If updated cost projects are 30% greater than pre-approved amount, distributor must treat project as new ICM, re-filed business case and other relevant material required	Not applicable	
27	Evidence of passing "Means Test"	Not applicable	
3.3.2.1 ICM Filing Requirements		• • • • • • • • • • • • • • • • • • • •	
• •	The following should be provided when filing for incremental capital:	Not applicable	
5	Capital Module applicable to ACM and ICM, for an incremental or pre-approved Advanced Capital Module (ICM/ACM) cost recovery and associated rate rider(s)	Not applicable	
28	An analysis demonstrating that the materiality threshold test has been met and that the amounts will have a significant influence on the operation of the distributor	Not applicable	
28	Justification that the amounts to be incurred will be prudent - amounts represents the most cost-effective option (but not necessarily the least initial cost) for ratepayers	Not applicable	
28	Justification that amounts being sought are directly related to the cause, which must be clearly outside of the base upon which current rates were derived	Not applicable	
28	Evidence that the incremental revenue requested will not be recovered through other means (e.g., it is not, in full or in part, included in base rates or being funded by the expansion of service to include new customers and other load growth)	Not applicable	
28	Details by project for the proposed capital spending plan for the expected in-service year	Not applicable	
28	Description of the proposed capital projects and expected in-service dates	Not applicable	
28	Calculation of the revenue requirement (i.e. the cost of capital, depreciation, and PILs) associated with each proposed incremental capital project	Not applicable	
28	Description of the actions the distributor would take in the event that the OEB does not approve the application	Not applicable	
28	Calculation of a rate rider to recover the incremental revenue from each applicable customer class. The distributor must identify and provide a rationale for its proposed rider design, whether variable, fixed or a combination of fixed and variable riders. As discussed at section 3.23, any new rate rider for the residential class must be applied on a fixed basis	Not applicable	
3.3.2.3 ICM Filing Requirements	discussed at section 6.2.0, any new rate main for the reconstitutions simulation applied of a likely basis		
29	Calculate the maximum allowable capital amount.	Not applicable	
43	овіонівте те талітит впомаріе саріта вточті.	тчот аррисарте	

Appendix G

2023 COS – SAULT SMART GRID PROJECT (EB-2022-0059)

5.3 Are the amounts proposed for inclusion in rate base for the Incremental Capital Module approved in EB-2018-0219/EB-2020-0249 and the proposed treatment of the associated true-up appropriate?

Complete Settlement:

As part of the pre-settlement clarification responses, PUC revised its 2022 SSG Project cost estimate due to the delay in completion of the project. As set out below, the Parties have agreed to the revised value for the SSG Project, comprised of 2022 net book value and 2023 capital additions, that until its next rebasing application will be recovered outside of base rates through the SSG Project Recovery Mechanism.

Table 5.3A

Sault Smart Grid Project Recovery Mechanism ("SSG Project Recovery Mechanism")

On April 29, 2021, PUC received approval from the OEB for the amended and restated Incremental Capital Module ("ICM") application for new rates effective May 1, 2022 in EB-2020-0249/EB-2018-0219. The Sault Smart Grid Project ("SSG Project") is a proposed community wide smart grid which will cover PUC's entire service territory. The SSG Project is expected to transform PUC's entire distribution system through an integrated project implementing various technologies such as Voltage/VAR Optimization, Distribution Automation and Advanced Metering Infrastructure.

The SSG Project carries a total net capital spend of \$24.5 million and represents approximately 1/4th of PUC's total rate base. The SSG Project was initially expected to be fully completed and in

service by December 31, 2022, however due to unforeseen circumstances² PUC updated the estimate of project spending during the pre-settlement clarification responses which outlined a net project spend of \$9M in 2022 and the remaining \$15.5M in 2023. The 2023 SSG Project additions represents 14.6% of PUC's average net fixed assets.

In its pre-settlement clarification responses, PUC also brought forth an SSG Foregone Revenue Requirement Accounting Order intended to make PUC whole for the revenue requirement on the \$15.5 million of 2023 SSG additions due to application of the half-year rule to additions placed in service in the test year. Without the proposed account, PUC noted that it would be foregoing revenue requirement each year which could put the utility in an under earnings situation beginning in 2024 and substantially impair its cash flow. The Parties agreed that some form of mechanism was required to help PUC make up some of the shortfall in revenue requirement as a result of the SSG Project delay given its size and the fact the OEB has approved the project.

The SSG Project Recovery Mechanism is of unprecedented nature and one of a kind considering the large value the SSG Project itself, which was previously approved as ICM in EB-2020-0249/EB-2018-0219. The Parties agreed that the SSG Project Recovery Mechanism is not meant to be precedent and is being agreed to in the context of a full settlement, and is appropriate because of the SSG Project size, unique circumstances related to the project delay, and the previous approvals in EB-2020-0249/EB-2018-0219.

As noted above, it was agreed upon between PUC and intervenors that some mechanism was required to allow PUC to recover the revenue requirement for the \$15.5 million 2023 investment in the SSG Project as a result of delays PUC incurred in completing all SSG capital additions in 2022. The Parties agreed to the SSG Project Recovery Mechanism, which removes the entire SSG Project (comprised of 2022 net book value and 2023 capital additions) from PUC's rate base and calculates separate rate riders to recover the SSG revenue requirement until rebasing in 2028. The SSG Model shows the revenue requirement components including depreciation, PILs with the associated CCA (excluding 2022 CCA on 2022 additions which has been captured in the tax loss carry forwards and the ICM true-up calculation), and Return on Rate Base. The model then uses the 2023 Cost of Service Rate Application information (as adjusted by any relevant agreed upon changes in this settlement proposal) to allocate revenue requirement to each rate class and the same Fixed/Variable split for calculating the rate riders to be collected from customers. The following describes each component in detail.

- 1) SSG Project In Service Additions For the purposes of calculating the rate rider, PUC will use a net project spend of \$9,026,457 for 2022 in service additions and \$15,521,823 for 2023 in service additions.
- **2) Depreciation** A straight line method is used for calculating depreciation which is in line with current PUC practices. 2023 Depreciation will be on a half year basis for the 2023 in service additions and full year basis for the 2022 in-service additions. In years 2024-2027 depreciation is

² For further explanation, please refer to Pre-Settlement Clarification Question CCC-55 in Appendix F.

set at an amount of \$687,641/year. The depreciation total is net of amortization of contributed capital.

3) CCA - The CCA calculation tab calculates actual CCA in each respective year to reflect the amount of CCA that PUC would deduct from its taxable income on its tax return from 2022 (the first year where there is CCA on the SSG Project) to 2027. The 2022 CCA is excluded from the SSG Recovery Mechanism as it has been accounted for through other mechanisms. In 2022, PUC will deduct approximately \$1,083,675 in CCA. Of this amount, \$361,075 has already been included as a deduction in the PILs of the ICM true up calculation outlined above. The remaining \$722,117 has been included in PUC's tax loss carry forward total that is to be refunded to customers as outlined in Issue 4.3 above. Therefore, the SSG Project Recovery Mechanism only considers the 2023 to 2027 PILs impact. Table E summarizes the total CCA for the SSG Project and where the amounts have been allocated.

Table E – CCA Calculation for SSG Project

Total CCA from 2022 to 2027	9,527,652
2022 CCA included in ICM True up	361,058
2022 CCA included in tax loss carry forward refund	722,117
Revised Total of CCA for SSG Project Recovery Mechanism	8,444,477
Smoothed Yearly	1,688,895

It has been agreed upon that the 2022-2027 aggregate of \$8,444,477 will be smoothed across 2023-2027 to help balance the impacts of accelerated CCA.

- **4)** Cost of Capital Parameters The parties have agreed to use PUC's 2023 cost of capital parameters for calculating the return on rate base.
- **5) Incremental Revenue Requirement** The yearly incremental revenue requirement to calculate the basis of the rate rider is presented in Table F below.

Table F: Yearly Revenue Requirement¹

Incremental Revenue Requirement	2023	2024	2025	2026	2027
Return on Rate Base - Total	\$ 1,042,866	\$ 1,498,849	\$ 1,455,189	\$ 1,411,530	\$ 1,367,870
Amortization Expense - Total	\$ 470,691	\$ 687,641	\$ 687,641	\$ 687,641	\$ 687,641
Grossed-Up Taxes/PILs	\$ (217,497)	\$ (42,332)	\$ (51,615)	\$ (60,897)	\$ (70,179)
Incremental Revenue Requirement with CCA	\$ 1,296,060	\$ 2,144,158	\$ 2,091,216	\$ 2,038,274	\$ 1,985,332

- 1 The calculation of 2024-2027 revenue requirement will change once the SSG Project actual spending is reconciled.
- 6) Rate Design PUC is proposing to collect SSG revenue requirement from customers in the same proportion as distribution revenue collected as from customers pursuant to the Settlement Proposal. The percentage allocations are shown in the Table G below reflect the as settled revenue requirement percentages that are applicable to the SSG Project.

Table G - Rate Design

Customer Class	Rev Requirement %
Residential	60.2%
GS < 50 kW	15.8%
GS >50 to 4,999 kW	22.6%
Street Lighting	1.0%
Sentinel Lighting	0.2%
Unmetered and Scattered	0.2%
Total	100.0%

7) Fixed/Volumetric Split – PUC is proposing a fixed/volumetric split that matches the splits agreed to in this Settlement Proposal for distribution revenue, as presented in Table H below for the 2023 Rate Year

Table H – Fixed/Volumetric Split

2023											
Customer Class	opini go opini initiani

- **8) 2028 COS True up Calculation** The SSG Project Recovery Mechanism will be subject to an asymmetrical true-up mechanism for the period of May 1, 2023 to April 30, 2028, to the benefit of ratepayers, that will be tracked in the new variance account, Account 1508, Sub-account SSG Project Recovery Mechanism Variance Account. PUC's net recovery for the SSG Project during this period after considering this sub-account will be the lower of
 - a. total rate riders collected from May 1, 2023 to April 30, 2028
 - b. the sum of 2023 to 2027 revenue requirements, where the annual revenue requirement is the lower of i) the recalculated revenue requirement based on actual SSG Project capital costs and in-service dates, and ii) the settled forecasted revenue requirement used to calculate the SSG Recovery Mechanism Rate Rider.

The full details of the true up calculation is outlined in Accounting Order attached as Appendix I – 2023 Cost of Service Application – The Sault Smart Grid Project Recovery Mechanism Variance Account.

As the revenue requirement included in the SSG Project Recovery Mechanism is intended to allow recovery of the costs of the SSG Project set out in Table D.1 above, but through a different recovery

mechanism than if the amount had been included in base rates, the Parties agree that PUC will make appropriate adjustments in its historical fixed assets continuity schedules so that the remaining net book value of the SSG Project related costs that should be added to PUC's rate base at its next rebasing is equal to the actual costs up to a maximum of the forecasted costs in Table D.1 under the Summary section. Any increase in costs from what has been forecasted in Table D.1, which will not be recovered through the SSG Project Recovery Mechanism, will be subject to a prudence review, if PUC seeks to add that additional amount to rate base at its next rebasing.
