Dear Ms. Yeates:

**Re: Alectra Utilities Corporation (Alectra Utilities)  
Ontario Energy Board File Number: EB-2022-0013  
Errata for December 21, 2022 Final Rate Order**

Schedule A to the Final Rate Order issued on December 21, 2022 in this proceeding contained a Tariff of Rates and Charges (referred to below as the Tariff) for each of the Enersource Rate Zone (ERZ) and the PowerStream Rate Zone (PRZ), respectively.

In its letter dated October 11, 2023, Alectra Utilities notified the OEB that it had identified a typographical error in the PRZ's Tariff for the Sentinel Lighting Service Classification. The unit charge for the 'Rate Rider for Recovery of Incremental Capital (2023) – in effect until the effective date of the next cost of service base rate order' is currently presented as a \$/kWh charge and should be presented as a \$/kW charge. This error was first presented as part of the Draft Rate Order filed by Alectra Utilities on December 12, 2022, which was then reflected in the Final Rate Order.

Alectra Utilities confirmed in its letter that it correctly bills the rate rider on a \$/kW basis for the Sentinel Lighting class, and therefore there is no revenue impact to the errata. No issues were identified for the ERZ Tariff.

Pursuant to its powers under Rule 41.02 of the Ontario Energy Board (OEB)'s *Rules of Practice and Procedure*, the OEB may at any time, without notice or a hearing of any kind, correct a typographical error, error of calculation or similar error made in its orders or decisions.

The OEB has amended the Final Rate Order to reflect the correct Tariff. The revised Final Rate Order is attached. This revised Final Rate Order supersedes and replaces

the previously issued Final Rate Order. The Final Rate Order does not change the OEB's findings, nor any of the dates in the previous Rate Order. The only change contained in the Final Rate Order is the change to the unit charge to the rate rider for incremental capital (2023) in the Sentinel Lighting Service Classification for the PRZ from \$/kWh to \$/kW.

Yours truly,

Nancy Marconi  
Registrar
