File No. 021902.000017

October 13, 2023

DELIVERED BY EMAIL & RESS

Nancy Marconi, Registrar Ontario Energy Board PO Box 2319, 27th Floor 2300 Yonge Street Toronoto, ON M4P 1E4

Dear Ms. Marconi

Re: InnPower Corporation – 2024 Cost of Service Application

OEB File No. EB-2023-0033

Settlement Proposal

Pursuant to the OEB's letter dated October 3, 2023, please find the enclosed Settlement Proposal for the above-noted Proceeding. The Parties would like to express their appreciation for the OEB's accommodation in granting the extension requests.

Please contact the undersigned with any questions.

Yours Truly,

Cole Byle

Colm Boyle

cc. All Intervenors

IN THE MATTER OF the *Ontario Energy Board Act,* 1998, S.O. 1998, c. 15, (Schedule B);

AND IN THE MATTER OF an application by InnPower Corporation for an order approving just and reasonable rates and other charges for electricity distribution beginning January 1, 2024.

INNPOWER CORPORATION

SETTLEMENT PROPOSAL

InnPower Corporation ("InnPower") EB-2023-0033 Settlement Proposal

Filed with OEB: October 13, 2023

SUMMARY

In reaching this complete settlement, the Parties (as defined below) have been guided by the Filing Requirements for 2024 rates, the approved issues list attached as Schedule A to the Ontario Energy Board's (the "OEB") Decision on Issues List of July 11, 2023 ("Approved Issues List") and the Report of the OEB titled *Renewed Regulatory Framework for Electricity Distributors: A Performance-Based Approach* dated October 18, 2012 ("RRFE").

Capitalized terms used in this summary but not otherwise defined herein have the meaning ascribed to such terms elsewhere in this Settlement Proposal.

This Settlement Proposal reflects a complete settlement of the issues in this proceeding. Table A is a summary of the settlement on the issues in the Approved Issues List.

Table A – Issues List Summary

| Issue | | Status | Supporting Parties | Parties taking no position |
|-------|--|------------------------|-----------------------|----------------------------------|
| 1.1 | Capital and In-Service Additions | Complete Settlement | SEC, VECC | HONI |
| 1.2 | Rate Base and Depreciation | Complete Settlement | SEC, VECC | HONI |
| 2.1 | OM&A | Complete Settlement | SEC, VECC | HONI |
| 2.2 | Shared Services Cost Allocation Methodology | Complete Settlement | SEC, VECC | HONI |
| 3.1 | Cost of Capital and Capital Structure | Complete Settlement | SEC, VECC | HONI |
| 3.2 | PILs | Complete Settlement | SEC, VECC | HONI |
| 3.3 | Other Revenue | Complete Settlement | SEC, VECC | HONI |
| 3.4 | Impacts of Accounting Changes | Complete Settlement | SEC, VECC | HONI |
| 3.5 | Revenue Requirement Determination | Complete Settlement | SEC, VECC | HONI |
| 4.1 | Load Forecast | Complete Settlement | SEC, VECC | HONI |
| 5.1 | Cost Allocation | Complete Settlement | SEC, VECC | HONI |
| 5.2 | Rate Design, including fixed/variable splits | Complete Settlement | SEC, VECC | HONI |

| 5.3 | Retail Transmission Service Rates and Low Voltage Service Rates | Complete Settlement | SEC, VECC | HONI |
|-----|---|------------------------|-----------|------|
| 5.4 | Loss Factor | Complete Settlement | SEC, VECC | HONI |
| 5.5 | Specific Service Charges, Retail Service Charges | Complete Settlement | SEC, VECC | HONI |
| 5.6 | Rate Mitigation | Complete Settlement | SEC, VECC | HONI |
| 5.7 | New Embedded Distributor Rate Class | Complete Settlement | All | None |
| 6.1 | Deferral and Variance Accounts | Complete Settlement | SEC, VECC | HONI |
| 6.2 | BATU Deferral Account | Complete Settlement | SEC, VECC | HONI |
| 7.1 | Effective Date | Complete Settlement | SEC, VECC | HONI |
| 7.2 | Responding to all Relevant OEB Directions from Previous Proceedings | Complete Settlement | SEC, VECC | HONI |

As a result of this Settlement Proposal, InnPower has made changes to the Revenue Requirement as depicted below in Table B.

Table B: Revenue Requirement Summary

| Category | Item | Original Application | Interrogatory Response | Change | Settlement Proposal | Change | OEB Rate Update | Change | Total Change |
|------------------------|---------------------------------------|-------------------------|---------------------------|-------------|------------------------|---------------|--------------------|-------------|---------------|

The impact of the Settlement Proposal with regards to capital expenditures and OM&A expenses results in an estimated efficiency assessment of 12.3% below predicted costs using the PEG forecasting model provided by the OEB as can be seen in Table D.

Table D: Summary of Cost Benchmarking Results

| Year | Status | Total Cost | % Difference from Predicted | 3-Year Average Performance | Efficiency Assessement |
|------------------|----------|---------------|-----------------------------|-------------------------------|---------------------------|
| 2021 | Actuals | \$ 15,145,732 | -2.2% | | 3 |
| 2022 | Actuals | \$ 16,842,121 | -6.8% | | 3 |
| 2023 Bridge Year | Forecast | \$ 19,602,023 | -7.8% | -5.6% | 3 |
| 2024 Test Year | Forecast | \$ 20,082,877 | -12.3% | -9.0% | 2 |

This Settlement Proposal also incorporates the Regulated Price Plan pricing from the OEB's Regulated Price Plan Price Report for November 1, 2022 to October 31, 2023 (Released October 20, 2022). This Settlement Proposal also incorporates the updated Cost of Capital Parameters which were issued by the Ontario Energy Board on October 20, 2022. The Revenue Requirement in Table B incorporates all of the settled issues including the RPP and Cost of Capital Updates. For information purposes only, the following tables E and F illustrate the revenue requirement on initial application and upon settlement respectively.

Table E: Revenue Requirement Summary (Initial Application/Interrogatory updates)

This Settlement Proposal is the culmination of extensive discussion and consideration by the Parties which represent an array of interests affected by InnPower's Application for electricity distribution rates. Based on the foregoing, and the evidence and rationale provided below, the Parties agree that this Settlement Proposal is appropriate and recommend its acceptance by the OEB. Refer to Appendix E for the Proposed Tariff of Rates and Charges resulting if this Settlement Proposal is accepted by the OEB.

Finally, the Parties accept that InnPower is compliant with the OEB's required outcomes as defined by the RRFE.

BACKGROUND

InnPower filed a Cost of Service application with the OEB on May 12, 2023 under section 78 of the *Ontario Energy Board Act*, 1998, S.O. 1998, c. 15, (Schedule B) (the "Act"), seeking approval for changes to the rates that InnPower charges for electricity distribution, to be effective January 1, 2024 (OEB Docket Number EB-2023-0033) (the "Application").

The OEB issued and published a Notice of Hearing dated June 1, 2023, and Procedural Order No. 1 on June 23, 2023, the latter of which required the parties to the proceeding to develop a proposed issues list.

On June 28, 2023, pursuant to Procedural Order No. 1, OEB Staff submitted a proposed issues list as agreed to by the parties. OEB Staff also advised the OEB that "parties may wish to raise additional matters for inclusion on the Issues List after the responses to the interrogatories are received." On July 11, 2023, the OEB issued its Decision on Issues List, approving the list submitted by OEB Staff. This Settlement Proposal is filed with the OEB in connection with the Application and is organized in accordance with the Approved Issues List

Procedural Order No. 1 scheduled the Settlement Conference for August 21 to 23, 2023. InnPower filed most of its Interrogatory Responses with the OEB on August 8, 2023 and requested an extension until August 10, 2023 to file the remainder of the Interrogatory Responses. The OEB granted the extension request on August 9, 2023. InnPower filed the remainder of its Interrogatory Responses on August 10, 2023, pursuant to which InnPower updated several models and submitted them to the OEB as Excel documents.

A Settlement Conference was convened between August 21 to 23, 2023 in accordance with the OEB's *Rules of Practice and Procedure* (the "Rules") and the OEB's *Practice Direction on Settlement Conferences* (the "Practice Direction").

Sarah Daitch acted as facilitator for the Settlement Conference which lasted for three days.

InnPower and the following Intervenors (the "Intervenors"), participated in the Settlement Conference:

Hydro One Networks Inc. ("HONI") School Energy Coalition ("SEC"); and Vulnerable Energy Consumers Coalition ("VECC").

InnPower and the Intervenors are collectively referred to below as the "Parties".

OEB Staff also participated in the Settlement Conference. The role adopted by OEB Staff is set out in page 5 of the Practice Direction. Although OEB Staff is not a party to this Settlement Proposal, as noted in the Practice Direction, OEB Staff who did participate in the Settlement Conference are bound by the same confidentiality requirements that apply to the Parties to the proceeding.

¹ The outstanding responses included 1-Staff-1, 4-Staff-56, 8-Staff-64 and 8-VECC-32.

This document is called a "Settlement Proposal" because it is a proposal by the Parties to the OEB to settle the issues in this proceeding. It is termed a proposal as between the Parties and the OEB. However, as between the Parties, and subject only to the OEB's approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and binding and enforceable in accordance with its terms. As set forth later in this Preamble, this agreement is subject to a condition subsequent, that if it is not accepted by the OEB in its entirety, then unless amended by the Parties, it is null and void and of no further effect. In entering into this Agreement, the Parties understand and agree that, pursuant to the Act, the OEB has exclusive jurisdiction with respect to the interpretation and enforcement of the terms hereof.

The Parties acknowledge that the Settlement Conference is privileged and confidential in accordance with the Practice Direction. The Parties understand that confidentiality in that context does not have the same meaning as confidentiality in the OEB's Practice Direction on Confidential Filings and the rules of that latter document do not apply. Instead, in the Settlement Conference, and in this Agreement, the Parties have interpreted "confidential" to mean that the documents and other information provided during the course of the Settlement Conference, the discussion of each issue, the offers and counter-offers, and the negotiations leading to the settlement - or not - of each issue during the Settlement Conference are strictly privileged and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception, the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal. Further, the Parties shall not disclose those documents or other information to persons who were not attendees at the Settlement Conference. However, the Parties agree that "attendees" is deemed to include, in this context, persons who were not in attendance via video conference at the Settlement Conference but were a) any persons or entities that the Parties engage to assist them with the Settlement Conference, and b) any persons or entities from whom they seek instructions with respect to the negotiations; in each case provided that any such persons or entities have agreed to be bound by the same confidentiality provisions.

This Settlement Proposal provides a brief description of each of the settled and partially settled issues, as applicable, together with references to the evidence. The Parties agree that references to the "evidence" in this Settlement Proposal shall, unless the context otherwise requires, include (a) additional information included by the Parties in this Settlement Proposal; (b) the Appendices to this document; and (c) the evidence filed concurrently with this Settlement Proposal titled "Responses to Pre-Settlement Clarification Questions" ("Clarification Responses"). The supporting Parties for each settled issue, as applicable, agree that the evidence in respect of that settled or partially settled issue, as applicable, is sufficient in the context of the overall settlement to support the proposed settlement, and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance by the OEB of this Settlement Proposal.

There are Appendices to this Settlement Proposal which provide further support for the proposed settlement. The Parties acknowledge that the Appendices were prepared by InnPower. While the Intervenors have reviewed the Appendices, the Intervenors are relying on the accuracy of those Appendices and the underlying evidence in entering into this Settlement Proposal.

Outlined below are the final positions of the Parties following the Settlement Conference. For ease of reference, this Settlement Proposal follows the format of the final Approved Issues List for the Application attached to the Decision on Issues List dated July 11, 2023.

The Parties are pleased to advise the OEB that they have reached a complete agreement with respect to the settlement of all of the issues in this proceeding. Specifically:

| "Complete Settlement" means an issue for which complete settlement was reached by all Parties, and if this Settlement Proposal is accepted by the OEB, none of the Parties (including Parties who take no position on that issue) will adduce any evidence or argument during the oral hearing in respect of the specific issue. | # issues settled: ALL |
|---|----------------------------------|
| "Partial Settlement" means an issue for which there is partial settlement, as InnPower and the Intervenors who take any position on the issue were able to agree on some, but not all, aspects of the particular issue. If this Settlement Proposal is accepted by the OEB, the Parties (including Parties who take no position on the Partial Settlement) will only adduce evidence and argument during the hearing on the portions of the issue for which no agreement has been reached. | # issues partially settled: None |
| "No Settlement" means an issue for which no settlement was reached. InnPower and the Intervenors who take a position on the issue will adduce evidence and/or argument at the hearing on the issue. | # issues not settled: None |

According to the Practice Direction (p. 2), the Parties must consider whether a Settlement Proposal should include an appropriate adjustment mechanism for any settled issue that may be affected by external factors. These adjustments are specifically set out in the text of the Settlement Proposal.

The Parties have settled the issues as a package and none of the parts of this Settlement Proposal are severable. If the OEB does not accept this Settlement Proposal in its entirety, then there is no settlement (unless the Parties agree in writing that any part(s) of this Settlement Proposal that the OEB does accept may continue as a valid settlement without inclusion of any part(s) that the OEB does not accept).

In the event that the OEB directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties agree to use reasonable efforts to discuss any potential revisions, but no Party will be obligated to accept any proposed revision. The Parties agree that all of the Parties who took a position on a particular issue must agree with any revised Settlement Proposal as it relates to that issue, or decide to take no position on the issue, prior to its resubmission to the OEB.

Unless stated otherwise, the settlement of any particular issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of Parties to raise the same issue and/or to take any position thereon in any other proceeding, whether or not InnPower is a party to such proceeding.

Where in this Settlement Proposal, the Parties "accept" the evidence of InnPower, or the Parties or any of them "agree" to a revised term or condition, including a revised budget or forecast, then unless the Settlement Proposal expressly states to the contrary, the words "for the purpose of settlement of the issues herein" shall be deemed to qualify that acceptance or agreement.

1. Capital Spending and Rate Base

1.1 Are the proposed capital expenditures and in-service additions appropriate?

Complete Settlement: Subject to the adjustments expressly noted in this Settlement Proposal, the Parties accept that the 2023 in-service additions, 2024 capital expenditures and 2024 in-service additions, set out in Clarification Response SEC-1, are appropriate.

InnPower applied for \$11.96 million in 2023 net CAPEX. As part of the response to Interrogatory 2-Staff-4, InnPower updated the Chapter 2 Appendices, including Appendix 2-AA, to account for updates to the work schedule since the application was filed. While the overall 2023 net CAPEX remained at \$11.96 million, revisions were made to estimated costs for allocation of capital between individual projects. As part of Clarification Response SEC-1, InnPower made further revisions to the forecasts of in-service additions and work in progress for certain projects (IPCSS11 – InnPower TS Pre-Works and IPCSS18 – 44kV Line Extension from Barrie) to reflect updates to the work schedule. Again, the 2023 net CAPEX remained at \$11.96 million following Clarification Response SEC-1.

InnPower applied for \$9.12 million in 2024 net in-service additions. As part of Clarification Responses SEC-1 and 6-Staff-82, the 2024 net in-service additions were updated to \$10.49 million to account for changes in InnPower's work schedule and depreciation, which included the addition of the Enterprise Resource Planning Software (\$160,000) to project "IPCGP05 - FINANCE IT", new wholesale meters (\$185,000) to project "IPCSA05 - METERING", and a new project "IPCSS18 - 44kV Line Extension from Barrie" (\$1,020,730) in Appendix 2-AA.

Also, as part of Clarification Response SEC-1, InnPower revised its 2024 capital expenditure forecast, the details of which are appended to the Clarification Responses.

For the purposes of settlement, the Parties agree to the following adjustments:

1. InnPower will reduce its capital expenditures and in-service additions in the 2024 Test Year by \$400,000. The total net capital expenditures in the 2024 Test Year shall be \$17.86 million, as further detailed in Table 1.1A. The total net in-service additions in the 2024 Test Year shall be \$10.09 million, as further detailed in Table 1.1B.

Table 1.1A Summary of Capital Expenditures

2023 Bridge Year

1.2 Are the proposed rate base and depreciation amounts appropriate?

Complete Settlement: The Parties accept that the updated rate base and depreciation amounts, adjusted to reflect various aspects of the settlement, are appropriate.

The Parties agree that the working capital calculations have been appropriately determined in accordance with OEB policies and practices. InnPower utilizes the OEB's default allowance for working capital, which is set at 7.5% of the sum of the Cost of Power and OM&A under section 2.2.5 of the OEB's Chapter 2 Filing Requirements for 2024 Rate Applications, as shown in Table 1.2B below.

2. OM&A

2.1 Are the proposed OM&A expenditures appropriate?

Complete Settlement: The Parties agree that InnPower will reduce its proposed OM&A expenses in the 2024 Test Year by \$750,000. The revised proposed amount of \$7,706,798 (including property tax) in the 2024 Test Year is appropriate.

The Parties also agree that InnPower will manage its OM&A budget as it and specific adjustments to InnPower's OM&A plans have not been finalized and may change. InnPower notes that it has applied the \$750,000 reduction in the tables throughout this settlement document and the live excel models as an envelope adjustment.

As shown in Table 2.1A below, Total 2024 Settlement Test Year OM&A Expenses have increased by 26% compared to December 31, 2017, Actuals (representing an annual growth rate of approximately 3.7% per year). During that period (from 2017 actuals to 2024 forecast), InnPower will see a customer growth rate of 32.2% for Residential, GS<50 and GS>50 customers. It is expected that InnPower will move to the Group 2 productivity rating in 2024. Table 2.1B below is a Summary of OM&A expenses with variance. InnPower confirms that this level of spending is sufficient to maintain a safe and reliable distribution system.

3. Cost of Capital, PILs, and Revenue Requirement

3.1 Is the proposed cost of capital (interest on debt, return on equity) and capital structure appropriate?

Complete Settlement: Subject to the adjustments expressly noted in this Settlement Proposal, the Parties agree that the proposed cost of capital and capital structure are appropriate. Specifically:

Cost of Capital (see Tables 3.1A and 3.1B below): The Parties accept that the cost of capital calculations have been appropriately determined in accordance with OEB policies and practices. InnPower has agreed to update cost of short term debt and the return on equity capital once the OEB releases the 2024 "Cost of Capital Parameter Updates". The Draft Rate Order attached at Appendix E uses the 2023 Cost of Capital Parameters. The Parties agree that InnPower will file an updated Draft Rate Order for approval, along with the updated models, once both the 2024 "Cost of Capital Parameter Updates" and 2024 Regulated Price Plan electricity rates (see section 3.5 below) have been released.

With respect to the long-term debt ("LTD") rate, and as set out in Table 3.1A below, the Parties agree that:

- a) the forecasted interest rate for all loans with a 2024 start date in Table 3.1A below will be set at 5% for the applicable period in 2024 based on the start date;
- b) the interest rate for the 2023 CAPEX LOAN shall be prorated based on the start date; and
- c) the principal balance for the TD-20 LOAN and TD-21 LOAN shall be prorated based on the start date since these loans are scheduled to be renewed in 2024.

3.3 Is the proposed Other Revenue forecast appropriate?

Complete Settlement: The Parties accept that the other revenue forecast, as updated, is appropriate. In accordance with 4-Staff-53 and Clarification Response VECC-48, InnPower made certain corrections to Account 4375 and 4380 (-\$591,951). The Parties have agreed to make adjustment to Account 4245 to reflect the increased amortized deferred revenue consistent with corrections made as part of Clarification Question SEC-1 (+162,286).

The updated forecast of total Other Revenue is \$3,567,620, a decrease of \$369,863 relative to the amount included in the original application, as shown in Table 3.3A below.

Table 3.3A Other Revenue

| Other Revenue | Account | Original Applicatio n | Interrogat ory Response | Change | Settlement Proposal | Change | OEB Rate Change | Change | Total Change |

Clarification Responses: N/A

Supporting Parties: SEC, VECC.

3.5 Is the proposed calculation of the Revenue Requirement appropriate?

Complete Settlement: The Parties accept that the proposed Revenue Requirement has been accurately determined based on the elements of this Settlement Proposal. A summary of the adjusted Base Revenue Requirement of \$13,874,693, reflecting adjustments and settled issues, is presented in Table 3.5A below. Table 3.5B identifies the agreed upon elements for the cost of power.

InnPower has agreed to update the Cost of Power once the OEB releases the 2024 Regulated Price Plan electricity rates. The Draft Rate Order attached at Appendix E uses the 2024 Regulated Price Plan electricity rates. The Parties agree that InnPower will file an updated Draft Rate Order for approval, along with the updated models, once both the 2024 "Cost of Capital Parameter Updates" (see section 3.1 above) and 2024 Regulated Price Plan electricity rates have been released.

4. Load Forecast

4.1 Is the proposed load forecast methodologies and the resulting load forecasts appropriate?

Complete Settlement: Subject to the adjustments expressly noted in this Settlement Proposal, the Parties accept that the customer forecast, load forecast, conservation and demand management adjustments and the resulting billing determinants are an appropriate forecast of the energy and demand requirements of InnPower's customers, consistent with OEB policies and practices.

For the purposes of settlement, the Parties agreed to the following adjustments and update the load forecast accordingly:

• The Parties accept that InnPower will increase its forecast for residential customer connections in 2024 by 100 customers to a total of 20,736, resulting in a corresponding increase of 738,527 kWh. The load forecast in Table 4.1A below has been updated accordingly.

The billing determinants are reproduced below as Table 4.1A:

Table 4.1A Billing Determinants

| Rate Class | Item | Application | Interrogatory Response | Change | Settlement Proposal | Change | Total Change |
|-------------------|-----------|-------------|---------------------------|-------------|------------------------|---------|-----------------|
| Residential | Customers | 19,957 | 20,636 | 679 | 20,736 | 100 | 779 |
| Residential | kWh | 190,211,161 | 195,560,391 | 5,349,230 | 196,515,750 | 955,359 | 6,304,589 |

5. Cost Allocation, Rate Design, and Other Charges

5.1 Are the proposed cost allocation methodology, allocations, and revenue-to cost ratios, appropriate?

Complete Settlement: Subject to the adjustments expressly noted in this Settlement Proposal, the Parties agree that InnPower's proposals on cost allocation methodology, allocations, and revenue-to-cost ratios are appropriate.

For the purposes of settlement, the Parties agreed to the following commitment:

• The Parties agree that InnPower will update its load profile for its next rebasing application.

The revenue-to-cost ratios are reproduced below in Table 5.1A.

Table 5.1A Revenue to Cost Ratios

| Rate Class | Revenue to Cost Ratios Resulting from Cost Allocation Model | Ratio | OEB Target Low | OEB Target High |
|--------------------------|--|---------|----------------|--------------------|
| Residential | 103.15% | 103.15% | 85% | 115% |
| GS<50 kW | 88.14% | 88.14% | 80% | 120% |
| GS 50 to 4999 kW | 73.72% | 81.33% | 80% | 120% |

5.2 Is the proposed rate design, including fixed/variable splits, appropriate?

Complete Settlement: Subject to the adjustments expressly noted in this Settlement Proposal, the Parties accept that InnPower's proposal for rate design, including fixed/variable splits, is appropriate.

For the purposes of settlement, the Parties agreed to make the following adjustments and update rate design accordingly:

For GS<50 and GS to 4999 kw rate class, the 2024 monthly service charge will remain at the approved 2023 level. The Parties agree that maintaining the fixed service charge is not meant to be precedent, and is being agreed to in the context of a full settlement and shall not bind the Parties in any future proceedings.

The fixed-variable splits and the resultant proposed fixed and variable charges are reproduced below in Tables 5.2A and 5.2B.

Table 5.2A Fixed Variable Split

| Rate Class | Allocated Base Revenue Requirement | Percentage from Fixed | Percentage from Variable | Revenue | Variable Component of Revenue Requirement | Transformer Allowance |
|--------------------------|--|--------------------------|-----------------------------|---------------|--|--------------------------|
| Residential | \$ 11,409,280 | 100.00% | 0.00% | \$ 11,409,280 | \$ - | \$ - |

5.3 Are the proposed Retail Transmission Service Rates and Low Voltage Service Rates appropriate?

Complete Settlement: Subject to the commitment expressly noted in this Settlement Proposal, the Parties agree that the proposed Retail Transmission Service Rates and Low Voltage Rates are appropriate.

For the purposes of settlement, the Parties agreed to the following commitment:

• InnPower shall apply to the OEB prior to the next rebasing application to update its low voltage rates to reduce large balances from accumulating.

The draft rate order attached at Appendix E uses the 2024 Preliminary Uniform Transmission Rates issued on September 28, 2023, under EB-2023-0222. The Retail Transmission Service Rates and Low Voltage Rates have been reproduced below in Tables 5.3A and 5.3B.

Table 5.3A Retail Transmission Service Rates (RTSR)

| Rate Class | Billing Units | Line and Transformation Connection Service Rate | | Netw | ork Service Rate |
|-----------------------------|---------------|--|--------|------|---------------------|
| Residential | kWh | \$ | 0.0101 | \$ | 0.0078 |

5.4 Are the proposed loss factors appropriate?

Complete Settlement: Subject to the commitments expressly noted in this Settlement Proposal, the Parties agree that the proposed loss factors are appropriate.

For the purposes of settlement, the Parties agreed to the following commitments:

- InnPower will use reasonable efforts to file the line loss study, referred to in 8-Staff-66(a), in this proceeding by January 1, 2024. The Parties agree there is currently insufficient data available for a full and accurate analysis of line losses.
- InnPower will investigate and use reasonable efforts to implement cost effective, technically feasible, reliable and safe measures to reduce line losses and report back at the next rebasing application.

The loss factor calculation is reproduced below as Table 4.1B:

Table 4.1B Loss Factor Appendix 2R

| | | | | listorical Years | 5 | | 5-Year Average |
|------|---|-------------|-------------|------------------|-------------|-------------|----------------|

5.5 Are the Specific Service Charges and Retail Service Charges appropriate?

Complete Settlement: Subject to the adjustment expressly noted in this Settlement Proposal, the Parties agree that InnPower's proposed Specific Service Charges and Retail Service Charges are appropriate as shown in the Tariff Schedule and Bill Impacts Model.

For the purposes of settlement, the Parties agreed to the following adjustment:

• InnPower shall not charge residential customers a service charge for reconnecting service after hours for an emergency disconnection. "Emergency" shall be interpreted to mean the same as it is defined under section 1.2 of the Distribution System Code. The residential customer is limited to one no-charge after hours reconnection per emergency disconnection event, and only after the emergency disconnection event has been resolved.

The draft rate order attached at Appendix E uses the 2024 Retail Service Charges issued on September 26, 2023, under EB-2023-0193.

6. Deferral and Variance Accounts

Are the proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition, requests for new accounts, requests for discontinuation of accounts, and the continuation of existing accounts, appropriate?

Complete Settlement: Subject to the adjustments expressly noted in this Settlement Proposal, the Parties agree that InnPower's proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition, requests for new accounts, requests for discontinuation of accounts, and the continuation of existing accounts, are appropriate.

For the purposes of settlement, the Parties agreed to the following treatment of a deferral and variance account:

• InnPower shall dispose of Account 1592 up until the end of December 31, 2023, over a one-year period using the forecasted balances in 9-SEC-41 and updated for any changes that result from this Settlement Proposal.

Table 6.1A below sets out the Deferral and Variance Account balances as updated to reflect this Settlement Proposal. Table 6.1B below details proposed rate riders. Table 6.1C below details what Deferral and Variance Accounts will continue, discontinue or will be new as of January 1, 2024.

6.2 Is InnPower's request to use a deferral account to track the capital contributions made for the Barrie Area Transformer Upgrade project between 2025-2027 appropriate? In the alternative, if the deferral account is not approved, is InnPower's request to use the Advanced Capital Module to recover the capital contributions made for the Barrie Area Transformer Upgrade project between 2025-2027 appropriate?

Complete Settlement: In the context of a complete settlement on all of the issues in this proceedings, and specifically the agreed-upon changes to the proposed revenue requirement, and the uncertainty on the final costs of the project, subject to the conditions and adjustments expressly noted in this Settlement Proposal, the Parties agree to a modified approach to InnPower's request to use a deferral account to track a portion of the capital contributions made for the Barrie Area Transformer Upgrade (BATU) project between 2025-2027.

Background

On April 3, 2020, HONI received approval from the OEB in EB-2018-0117 for leave to construct transmission facilities that will increase transmission and transformation capacity to accommodate load growth in the Barrie/Innisfil area of Ontario. The transmission line and station work are collectively referred to as the BATU Project.

The capital contribution installment payments to HONI are for the incremental costs relative to the cost of the avoided sustainment work that HONI was originally planning to undertake on these facilities. At the time of the OEB decision, the total cost estimate of the BATU project was \$91M, and InnPower's total capital contribution was set at \$14.1M. HONI requested to the extend the capital contribution payment period from five years to 15 years in which InnPower would have made installment payments to HONI for the BATU Project. For the reasons set out in Exhibit B, Tab 9, Schedule 1 of HONI's application in EB-2018-0117, this loan methodology was estimated to save ratepayers over \$2 million over the fifteen-year capital contribution payable period. The loan methodology was summarized by the OEB as follows:

The Loan Methodology will record the net cost (excluding the full capital contribution) of the BATU Project in Hydro One's rate base once in-service, while InnPower will record its capital contribution payments in its rate base as it is paid. The deferral of the capital contribution payment from InnPower will be treated as a loan – a position OEB staff agreed with in its submission.

The OEB rejected the 15-year request and accepted a five-year capital contribution installment period at page 14 of Decision and Order EB-2018-0117 (April 23, 2020):

Although the five-year term for capital contribution does not require OEB approval in accordance with section 6.3.19 of the TSC, the OEB makes note that the OEB accepts the five-year capital contribution installment period in light of consideration of a 15 year term in the original application.

On June 30, 2022, HONI filed a letter in EB-2018-0117 providing an update to the BATU Project's schedule and forecast cost. HONI advised the OEB that the BATU Project is now expected to be in-service December 2023 and total forecast cost was revised to \$125.0M. As a result, InnPower's capital contribution increased to an estimated \$20.6 million. The capital contribution estimate is based on April 2022 cost estimates provided by the Hydro One contractor.

The capital contribution associated the BATU project accounts for approximately 82% of InnPower's proposed net System Service costs over the 2024-2028 forecast period

Payments will be made annually to HONI with interest at the OEB construction work-in-progress rate, over five (5) years after energization.

BATU Installment Account

InnPower proposed a BATU Installment Deferral Account to capture the revenue requirement associated with its capital contribution installments paid to HONI for its proportionate share of the BATU Project as approved, and subsequently updated, in EB-2018-0117. The account would not capture the capital contribution installment paid in 2023 and the portion of the 2024 capital contribution installment paid which has been entered into rate base in the 2024 Test Year in accordance with the Half-Year Rule.

The BATU Installment Deferral Account only concerns incremental revenue requirement associated with capital contribution installment payments paid by InnPower for the BATU Project for: (i) a half year in 2024 due to the OEB half year rule; and (ii) 2025 to 2027 (Incentive Period Payments). It is currently estimated that the total value of the Incentive Period Payments will total \$14,420,000. Installment payments in 2023 and half of the payment in 2024 have been incorporated into InnPower's rate base in the 2024 Test Year and are currently estimated at \$6,180,000.

As part of this settlement, the Parties agree to a modified BATU Instalment Deferral Account which would record for later final disposition: (i) 50% of the revenue requirement for the Incentive Period Payments; (ii) 50% of the revenue requirement for actual installment payments as a result of variances in actual and estimated BATU Project costs; (iii) 100% of the revenue requirement impact of any BATU Project delays; and (iv) differences between the rate rider revenue collected and the approved amount for disposition. For clarity, the Parties agree that InnPower's collection of 50% of the revenue requirement does not indicate the prudence of the capital contribution installments paid to HONI for its proportionate share of the BATU Project, which will be assessed on final disposition.

Parties agree to the creation of the modified BATU Installment Deferral Account, subject to the following additional conditions and adjustments:

• InnPower shall dispose of the BATU Installment Deferral Account on an interim basis at each IRM proceeding until the next rebasing to avoid accumulation of a significant debit balance and result in significant future rate impacts. The BATU Installment Deferral Account will be reviewed and disposed of on a final basis at the next rebasing. If any BATU capital contributions paid to Hydro One, including those include in base rates, are or should have, been delayed as a result of the in-service date of the BATU Project being in 2024 or later, then the BATU Installment Account will credit customers the full revenue requirement impact of that delay. To the degree timing delays result in such credits being made to the BATU Installment Deferral Account, review and disposition of these amounts will take place when the BATU Installment Deferral Account is reviewed and disposed of on a final basis.

Operation of BATU Installment Deferral Account

The sub-accounts in the BATU Installment Deferral Account will operate as follows to allow InnPower to recover from customers 50% of the revenue requirement associated with the capital contribution installment payments paid by InnPower for the BATU project for a half year in 2024, due to the OEB half year rule, and for the period between 2025 to 2027:

- 1. On an annual basis, a revenue requirement will be calculated associated with Incentive Period Payments. To complete this calculation, InnPower will rely on the net book value calculated in (3) to calculate revenue requirement. Depreciation expense, interest, return on equity, and PILs will be determined using parameters consistent with those approved in EB-2023-0033. Please refer to Schedule A in the Accounting Order for the calculation of the incremental revenue requirement impact;
- 2. 50% of the revenue requirement calculation in the above will be debited to the Revenue Requirement Impact sub-account for future recovery from ratepayers and credit Account 4080 Distribution Revenue Account;
- 3. As balances accumulate in the Revenue Requirement Impact sub-account, interest will be calculated using the OEB's "Approved Deferral and Variance Accounts Prescribed Interest Rate" issued quarterly and debited to sub-account Carrying Charges;
- 4. Beginning as early as 2026 rates, InnPower will apply for interim disposition of amounts in the Revenue Requirement Impact and Carrying Charges sub-accounts. The disposition amounts will be used to inform rate riders for collection of amounts owed to InnPower. As BATU rate rider revenues are collected, such amounts will be credited to the Rate Rider Revenues sub-account;
- 5. Balances in the Rate Rider Revenues sub-account will incur interest at the OEB's "Approved Deferral and Variance Accounts Prescribed Interest Rate" issued quarterly, and such interest will be recorded in sub-account Carrying Charges;
- 6. As part of InnPower's next Cost of Service application, the utility will request final disposition of amounts recorded to date in the Revenue Requirement Impact sub-account. These amounts would have previously received only interim approval from the OEB;
- 7. On recovery of all balances in the Revenue Requirement Impact and Carrying Charges sub-accounts, which may be as late as the 2030 rate year, InnPower will seek disposition of any

- variance between the combined balances of Revenue Requirement Impact, Rate Rider Revenues, and Carrying Charges, such that amounts owed to InnPower (or to ratepayers) are equal to amounts collected via rate riders.
- 8. At the next rebasing InnPower shall provide a detailed accounting true-up of all BATU installment payments to allow for a full reconciliation.

The RRWF has been enhanced commencing with 2017 rate applications to provide estimated base distribution rates. The enhanced RRWF is not intended to replace a utility's formal rate generator model which should continue to be the source of the proposed rates as well as the final ones at the conclusion of the proceeding. The load forecasting addition made to this model is intended to be demonstrative only and does not replace the information filed in the utility's application. In an effort to minimize the incremental work required from utilities, the cost allocation and rate design additions to this model do in fact replace former appendices that were required to be filed as part of the cost of service (Chapter 2) filing requirements.

For 2023 filers, the RRWF has been enhanced with an additional column, so that two stages of processing of an application (e.g. interrogatory responses and settlement agreement) between the initial application filing and the OEB decision and draft rate order ("Per Board Decision") can be used. Functionality of the RRWF is the same as in previous versions of the RRWF. (May 2022)

Notes:

General Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

Some Applicants may have a unique rate as a result of a lead-lag study. The default rate for 2024 cost of service applications is 7.5%, per the letter issued by the Board on June 3, 2015.

- Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
- (3) Net of addbacks and deductions to arrive at taxable income.
- (4) Average of Gross Fixed Assets at beginning and end of the Test Year
- (5) Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- Select option from drop-down list by clicking on cell M12 or U12. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected. Beginning for 2023, two intermediate stages can be shown (e.g., Interrogatory Responses and Settlement Agreement).
- Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
 4.0% unless an Applicant has proposed or been approved another amount.
- (9) The default Working Capital Allowance factor is **7.5%** (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study with supporting rationale could be provided.

(2) Percentage Change Relative to Initial Application

Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-I** should be incorporated into the entries. The inputs should correspond with the summary of the Load Forecast for the Test Year in **Appendix 2-IB** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth andf trends from historical actuals to the Bridge and Test Year forecasts.

| | Stage in Process: | Sett | lement Agreement | | | | | | | | | | |

Notes:

Input kW or kVA for those customer classes for which billing is based on demand (kW or kVA) versus energy consumption (kWh)

Cost Allocation and Rate Design

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

Stage in Application Process: Settlement Agreement

A) Allocated Costs

| Name of Customer Class ⁽³⁾ From Sheet 10. Load Forecast | | Allocated from ious Study ⁽¹⁾ | % | located Class nue Requirement (1) (7A) | % |
|--|-------|---|--------------------|---|---------|
| 1 Residential | \$ | 8,064,053 | 79.54% | \$ 13,891,076 | 79.55% |
| 2 GS<50 kW | \$ | 835,151 | 8.24% | \$ 1,687,481 | 9.66% |
| 3 GS 50 to 4999 kW | \$ | 958,338 | 9.45% | \$ 1,585,701 | 9.08% |
| 4 Sentinel Lighting | \$ | 43,848 | 0.43% | \$ 30,648 | 0.18% |
| 5 Street Lighting | \$ | 194,479 | 1.92% | \$ 232,502 | 1.33% |
| 6 Unmetered Scattered Load | \$ | 21,269 | 0.21% | \$ 21,095 | 0.12% |
| 7 Embedded Distributor 8 9 0 | \$ | 21,270 | 0.21% | \$ 13,387 | 0.08% |
| Total | \$ | 10,138,408 | 100.00% | \$ 17,461,890 | 100.00% |
| | Servi | ce Revenue Requireme | ent (from Sheet 9) | \$ 17,461,890.08 | |

- (1) Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost | RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 Low Voltage (LV) Costs are also excluded.
- (2) Host Distributors Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.
- (3) Customer Classes If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

B) Calculated Class Revenues

| Name of Customer Class | | Forecast (LF) X t approved rates | F X current proved rates X (1+d) | LF) | X Proposed Rates | Revenues | | |
|---|----------|-------------------------------------|--|------|------------------|----------|-----------|--|
| | | (7B) | (7C) | | (7D) | | (7E) | |
| 1 Residential | \$ | 10,972,014 | \$ 11,409,616 | \$ | 11,409,280 | \$ | 2,919,063 | |
| 2 GS<50 kW | \$ | 1,358,579 | \$ 1,158,491 | \$ | 1,158,504 | \$ | 328,902 | |
| 3 GS 50 to 4999 kW | \$ \$ | 1,346,890 | \$ 930,172 | \$ | 1,050,897 | \$ | 238,811 | |
| 4 Sentinel Lighting | \$ | 23,484 | \$ 43,208 | \$ | 29,614 | \$ | 7,164 | |
| 5 Street Lighting | \$ | 165,477 | \$ 316,240 | \$ | 211,971 | \$ | 67,025 | |
| 6 Unmetered Scattered Load | \$ \$ | 16,300 | \$ 23,055 | \$ | 20,518 | \$ | 4,796 | |
| 7 Embedded Distributor 8 9 10 11 12 13 14 15 16 17 18 | • | 11,527 | \$ 13,486 | \$ | 13,486 | \$ | 1,860 | |
| Total | \$ | 13,894,270 | \$ 13,894,270 | \$ | 13,894,270 | \$ | 3,567,620 | |

⁽⁴⁾ In columns 7B to 7D, LF means Load Forecast of Annual Billing Quantities (i.e., customers or connections, as applicable X 12 months, and kWh, kW or kVA as applicable. Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.

⁽⁵⁾ Columns 7C and 7D - Column Total should equal the Base Revenue Requirement for each.

⁽⁶⁾ Column 7C - The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current Rates.

⁽⁷⁾ Column 7E - If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19,

C) Rebalancing Revenue-to-Cost Ratios

| Name of Customer Class | Previously Approved Ratios | Status Quo Ratios | Proposed Ratios | Policy Range |
|-----------------------------|-------------------------------|-------------------|------------------|--------------|
| | Most Recent Year: | (7C + 7E) / (7A) | (7D + 7E) / (7A) | |
| | % | % | % | % |
| 1 Residential | 99.44 | 103.15% | 103.15% | 85 - 115 |
| 2 GS<50 kW | 103.54 | 88.14% | 88.14% | |
| 3 GS 50 to 4999 kW | 98.41 | 73.72% | 81.33% | |
| 4 Sentinel Lighting | 102.71 | 164.36% | 120.00% | |
| 5 Street Lighting | 120.00 | 164.84% | 120.00% | |
| 6 Unmetered Scattered Load | 98.41 | 132.02% | 120.00% | |
| 7 Embedded Distributor 8 | 99.41 | 114.64% | 114.63% | |
| 9 | | | | |
| 10 | | | | |
| 11 | | | | |
| 12 | | | | |
| 13 | | | | |
| 14 | | | | |
| 15 | | | | |
| 16 | | | | |
| 17 | | | | |
| 18 | | | | |
| 19 | | | | |
| 20 | | | | |

⁽⁸⁾ Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant rebased in 2019 with further adjustments to move within the range over two years, the most recent year would be 2022. However, the ratios in 2022 would be equal to those after the adjustment in 2021.

⁽⁹⁾ Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".

⁽¹⁰⁾ Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

(D) Proposed Revenue-to-Cost Ratios (11)

| Name of Customer Class | Propose | d Revenue-to-Cost Ratio | | Policy Range |
|------------------------------------|-----------|-------------------------|---------|--------------|
| | Test Year | Price Cap IR P | eriod | |
| | | 1 | 2 | |
| 1 Residential | 103.15% | 103.15% | 103.15% | 85 - 115 |
| 2 GS<50 kW | 88.14% | 88.14% | 88.14% | |
| 3 GS 50 to 4999 kW | 81.33% | 81.33% | 81.33% | |
| 4 Sentinel Lighting | 120.00% | 120.00% | 120.00% | |
| 5 Street Lighting | 120.00% | 120.00% | 120.00% | |
| 6 Unmetered Scattered Load | 120.00% | 120.00% | 120.00% | |
| 7 Embedded Distributor 8 9 0 1 2 3 | 114.63% | 114.63% | 114.63% | |
| 5 4 5 | | | | |
| 6 7 | | | | |
| 8 9 | | | | |
| 0 | | | | |

⁽¹¹⁾ The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2024 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2025 and 2026 Price Cap IR models, as necessary. For 2025 and 2026, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2025 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

Rate Design and Revenue Reconciliation

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and voluemtric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design and as proposed by the applicant. However, the RRWF does not replace the rate generator model that an applicant distributor may use in support of its application. The RRWF provides a demonstrative check on the derivation of the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/PILs, etc.

| otes: | | | | | | | | | | | | | Tales recover revenue | roquiionioni | Difference | Ciliont | \$ 593.3 |

¹ Transformer Ownership Allowance is entered as a positive amount, and only for those classes to which it applies.

% Difference

0.004%

The Fixed/Variable split, for each customer class, drives the "rate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calcutated as: [MSC x (average number of customers or connections) x 12 months] / (Class Allocated Revenue Requirement).

The Volumetric rate is calculated as [(allocated volumetric revenue requirement for the class + transformer allowance credit for the class)/(annual estimate of the charge determinant for the test year (either kW or kVA for demand-billed customer classes, or kWh for non-demand-billed classes)]

Tracking Form

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

Notes to the Table:

1. Historical "previous plan" data is not required unless a plan has previously been filled. However, use the last OEB-approved, at least on a Total (Capital) Expenditure basis for the last cost of service rebasing year, and the applicant should include their planned budget in each subsequent historical year up to and including the Bridge Year.

2. Indicate the number of months of 'actual' data included in the last year of the Historical Period (normally a 'bridge' year):

3. System O&M contains the following accounts: 5005, 5010, 5012, 5014, 5015, 5016, 5017, 5020, 5025, 5030, 5035, 5040, 5045, 5050, 5055, 5060, 5065, 5070, 5075, 5085, 5096, 5096, 5105, 5110, 5112, 5114, 5120, 5125, 5130, 5135, 5145, 5150, 5155, 5160, 5165, 5170, 5172, 5175, 5176, 5195

Appendix C - Updated Appendix 2-BA: 2023 Fixed Asset Continuity Schedules

| File Number: | EB-2023-003 |
|--------------|-------------|
| Exhibit: | |
| Tab: | |
| Schedule: | |
| Page: | |
| | |
| Date: | 2023-05-1 |

Appendix 2-BA Fixed Asset Continuity Schedule 1

- 1 Tables in the format outlined above covering all fixed asset accounts should be submitted for the Test Year, Bridge Year and all relevant historical years. At a minimum, the applicant must provide data for the earlier of: 1) all historical years back to its last rebasing; or 2) at least three years of historical actuals, in addition to Bridge Year and Test Year forecasts. If this is the first application where the applicant is rebasing under MIFRS, contact OEB staff for further guidance on the appropriate fixed asset continuity schedules to complete (i.e. applicable years and accounting standard for each schedule).
- 2 The "CCA Class" for fixed assets should generally agree with the CCA Class used for tax purposes in Tax Returns. Fixed Assets sub-components may be used where the underlying asset components are classified under multiple CCA Classes for tax purposes. If an applicant uses any different classes from those shown in the table, an explanation should be provided. (also see note 3).
- 3 The table may need to be customized for a utility's asset categories or for any new asset accounts announced or authorized by the OEB.
- 4 The additions in column (E) must not include construction work in progress (CWIP).
- Effective on the date of IFRS adoption, customer contributions will no longer be recorded in Account 1995 Contributions & Grants, but will be recorded in Account 2440, Deferred Revenues.

 Amortization of deferred revenue will be removed from the depreciation expense shown on this fixed asset continuity schedule as it should be included as income in Appendix 2-H Other Revenue
- The applicant must ensure that all asset disposals have been clearly identified in the Chapter 2 Appendices for all historic, bridge and test years. Where a distributor for general financial reporting purposes under IFRS has accounted for the amount of gain or loss on the retirement of assets in a pool of like assets as a charge or credit to income, for reporting and rate application filings, the distributor shall reclassify such gains and losses as depreciation expense, and disclose the amount separately.
- 7 This account includes the amount recorded under finance leases for plant leased from others and used by the utility in its utility operations.
- 8 The applicant must establish the continuity of historical cost for gross assets and accumulated depreciation by asset class by ensuring that the opening balance in the year agrees to the closing balance in the prior year.

| Accounting Standard | MIFRS |

${\bf Appendix}\; {\bf D} - {\bf Bill}\; {\bf Impacts}\; {\bf Settlement}$

Tariff Schedule and Bill Impacts Model (2023 Cost of Service Filers)

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filing Requirements For Electricity Distribution Rate Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2017 of \$0.1036/kWh (IESO's Monthly Market Report for May 2017, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
- 2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

In the manager's summary, discuss the reasoning for the change in RTSR rates

Appendix E – Draft Tariff of Rates and Charges

Effective and Implementation Date

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to residential customers residing in detached, semi detached, townhouse (freehold or condominium) dwelling units, duplexes or triplexes. Supply will be limited up to a maximum of 200 amp @ 240/120 volt. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

| Service Charge | \$ | 45.85 |

| Standard Supply Service - Administrative Charge (if applicable) | \$ | 0.25 |
| | | |

Effective and Implementation Date

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification refers to a non-residential account taking electricity at 750 volts or less whose monthly peak demand is less than or expected to be less than 50 kW. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

| Service Charge | \$ | 46.24 |

| Standard Supply Service - Administrative Charge (if applicable) | \$ | 0.25 |
| | | |

Effective and Implementation Date

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

GENERAL SERVICE 50 TO 4.999 KW SERVICE CLASSIFICATION

This classification refers to a non-residential account whose monthly average peak demand is equal to or greater than, or expected to be equal to or greater than 50 kW but less than 5,000 kW. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Effective and Implementation Date

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EMBEDDED DISTRIBUTOR SERVICE CLASSIFICATION

This classification applies to an electricity distributor licensed by the Ontario Energy Board that is provided electricity by means of this distributor's facilities. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Effective and Implementation Date

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to a non-residential account taking electricity at 240/120 or 120 volts whose monthly peak demand is less than, or expected to be less than, 50kW and the consumption is unmetered. A detailed calculation of the load will be calculated for billing purposes. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

STREET LIGHTING SERVICE CLASSIFICATION

This classification refers to accounts concerning roadway lighting for a Municipality, Regional Municipality, and/or the Ministry of Transportation. This lighting will be controlled by photocells. The consumption for these customers will be based on the calculated connected load times as established in the approved Ontario Energy Board Street Lighting Load Shape Template. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

| Total Loss Factor - Primary Metered Customer < 5,000 kW | 1.0713 |

${\bf Appendix} \; {\bf F-Pre-Settlement} \; {\bf Clarification} \; {\bf Questions}$

Reference: Pole Condition Results

Ref 1: 2-Staff-13

2: 2-Staff-19

Question:

METSCO has reported the percentage of wood poles in poor and very poor condition to be 21% of the total population in the 2021 asset condition assessment. In InnPower's last Distribution System Plan as part of the EB-2016-0085 proceeding, InnPower reported that 4% of wood poles were in poor and very poor condition (2016 asset condition assessment). InnPower stated in response to 2-Staff-19 that the number of poles in poor condition increased as a result of pole testing and the asset condition assessment. InnPower noted that the testing methodology had not changed from the last Distribution System Plan.

- a) Please provide further detail beyond the asset condition assessment results as to why the condition of poles worsened five-fold since 2016.
- b) InnPower stated in Staff-13 that pole outages are classified as foreign interference.
 - i. Please confirm that all pole-related outages are recorded under foreign interference and if not, please explain what other cause codes pole outages are recorded under.
 - ii. Please provide a breakdown of pole-related outages separate from foreign interference.

Response:

a. In the 2015 poles ACA, there was a substantial number of poles in the fair condition that over the last seven years moved into the poor and very poor condition. As it was stated in Section 4.1.1.3 of the Distribution Asset Condition Assessment back in 2015 it was observed that the overall pole condition is much better than what would be expected from the age profile. This is mainly due to the fact that a great number of old poles, that have reached more than 45 years of service, received "fair" rating. It should be noted that these poles, constituting over 85% of the fair poles, are expected to significantly deteriorate to poor condition or worse if the corresponding remaining strength drops below 80% or they start to reveal severe damage on the civil structure. Thus, these poles would require more frequent diagnostic testing and possible remedial work or replacement depending on criticality.

b. i. and ii. pole related outages were only recorded under and due to foreign interference. InnPower did not have pole related outages in any other category.

Reference: Switchgear Replacements

Ref 1: 2-Staff-23

Question:

According to the METSCO asset condition assessment, no switchgears appear to be in poor condition. InnPower noted in response to 2-Staff-23 that it found multiple switchgears to be inoperable during inspections.

a) When was the inspection last conducted?

i. If the inspection was conducted before the asset condition assessment, why are the inspection results not reflected within the asset condition assessment?

b) Please provide the latest inspection summary report that includes switchgears as well as switches.

Response:

a) The last inspection was conducted in the summer of 2022. Currently, there is an ongoing 2023 inspections (as part of InnPower's three-year cycle).

 The ACA was conducted using 2021 data. The inoperable switchgears were identified in the 2022 switchgear inspection.

| b) | InnPower does not have summary reports. Switchgears are inspected individually with individual switchgear reports. Switch inspections are carried out using IR scanning, with only hot spots reported. | |

Reference: InnPower TS Project Environmental Assessment

Ref 1: 2-Staff-29

Question:

InnPower confirmed in response to 2-Staff-29 that it will capitalize the environmental assessment for the InnPower TS at the end of the year.

- a) Please explain why InnPower has not included the environmental assessment as CWIP until the InnPower TS is in-service.
- b) Please confirm whether InnPower has consulted its external auditor regarding the accounting treatment of the capitalization of the environmental assessment for the InnPower TS given its material significance.
 - i) If confirmed, please provide a confirmation from the external auditor that they agree with the capitalization accounting treatment.
 - ii) If not, please explain why not.

Response:

- a) InnPower has modified the schedule to include it in CWIP
- b) No. InnPower's auditors are unable to give accounting advice to maintain independence.

Reference: 44kV Line Extension from BATU

Ref 1: 2-Staff-38

Question:

InnPower confirmed in response to 2-Staff-38 that the 44kV line extension from BATU will not be in-service prior to December 31, 2023.

Please confirm that InnPower will adjust its 2024 Test Year in-service additions to include the 44kV line extension, while including the line extension in CWIP in the 2023 Bridge Year.

Response:

InnPower confirms that the 44kV line has been included in CWIP for the 2023 Bridge Year and as an in-service addition for the 2024 Test Year.

Reference: BATU

Ref 1: InnPower IRRS 2024 CoS, 2-Staff-39

Ref 2: Revised BATU DVA Draft Accounting Order_20230808

Ref 3: Att 2-Staff-39_BATU_Contribution_Revenue_Requirement_20230808

Question:

As stated in Reference 2 that the purpose of the new deferral account, "Batu Installment Account" is to capture the revenue requirement associated with InnPower's capital contribution installments paid to Hydro One Networks Inc. for InnPower's proportionate share of the BATU Project, as approved in EB-2018-0117, that are not included in the current rate base.

Reference 2 outlines accounting entries proposed by InnPower as follows.

USoA # Account Description

Dr: 1508 Other Regulatory Assets – Sub-Account BATU Installments Paid

Cr: 1609 Capital Contributions Paid

To record capital contribution installments paid by InnPower to Hydro One relating to the BATU project

Dr: 1508 Other Regulatory Assets – Sub-Account BATU Installments Paid, Carrying Charges

Cr: 1525 Miscellaneous Deferred Debits

To record carrying charges and PILs associated with amounts recorded in Sub-Account BATU

Installments Paid

Dr: 1508 Sub-Account BATU Installment Depreciation Expense

Cr: 1508 Sub-Account BATU Installment Accumulated Depreciation

To record depreciation expense associated with amounts recorded in Sub-Account BATU Installments

Paid

In addition, InnPower provided the 2025 balances in four sub-accounts of the proposed BATU DVA in Reference 1 as shown below.

Sub-Acct BATU Installments Paid \$6,180,000

Sub-Acct BATU Installment Depreciation Expense \$103,000

Sub-Acct BATU Installment Accumulated Deprec \$103,000

Sub-Acct BATU Installment, Carrying Charges \$9,457

- a) Based on the calculations provided in Reference 3, the accumulative incremental revenue requirements on the capital contribution payments at the end of 2025 show a debit balance of \$336,057 before the carrying charges. However, this balance is not included as part of the 2025 balances in the four sub-accounts of the proposed BATU DVA provided in Reference 1.
 - i. Please confirm whether InnPower intends to record the incremental revenue requirements in a separate sub-account.
 - ii. If confirmed, please establish a separate sub-account to record the incremental revenue requirements. Additionally, please revise the draft accounting order as necessary.

- iii. If not, please elaborate on how the incremental revenue requirements on the capital contribution installments paid will be captured in the proposed new deferral accounts.
- b) InnPower has indicated in Reference 2 that the second entry is to record carrying charges and PILs associated with amounts recorded in Sub-Account BATU Installments Paid. Additionally, staff notes that the amounts recorded in Sub-Account BATU Installments Paid are the annual capital contribution installments paid according to the first entry in Reference 2. Carrying charges should be recorded on the incremental revenue requirements calculated on the capital contribution paid, whereas the PILs are part of the incremental revenue requirements.
 - i. Please establish a new sub-account for the carrying charges on the BATU incremental revenue requirements.
 - ii. Please revise the draft accounting order accordingly.
- c) Please provide the proposed accounting entry to transfer the net book value of the capital contribution paid balance to the rate base upon the disposition in InnPower's next rebasing application.
- d) Given the incremental revenue requirements are calculated and set based on the 2025 to 2027 installments, please provide InnPower's view on the disposition of the DVA in the respective IRM applications.
- e) Please confirm that InnPower would not seek the additional recovery if Hydro One requires more installment payments than the budgeted amounts in 2025 to 2027.

Response:

a-b) As identified by OEB Staff above, the 2025 balance reported in 2-Staff-39 for Sub-Acct BATU Installment, Carrying Charges was incorrect. If the Sub-Account noted were to capture

Return on Rate Base, PILs, and interest on balances within the various appropriate Sub-Accounts, the 2025 balance would be \$243,604, as opposed to the \$9,457 previously reported.

The above said, in response to OEB Staff's questions in a) and b) above, InnPower proposes revising the Draft Accounting Order to include an additional Sub-Account, with the effect of separating Return and PILs from interest on BATU account balances. The former will be the subject of a new Sub-Account (Sub-Account BATU Installment Return and PILs), while the latter will continue to be captured in Sub-Account BATU Installment, Carrying Charges.

Based on the above change, please find as Attachment (Att Staff-

78_Revised_BATU_DVA_Draft_Accounting_Order_20230818) to this response a revised version of the Draft Account Order. Further, please see below the Debits and Balances for each sub-account over the entire 2024 to 2028 period, including a summary of balances on disposition to Gross PP&E, Accumulated Depreciation, and Recovery from Ratepayers. Finally, please find as Attachment (Att Staff-78_BATU_Contribution_RR_with_Sub-Accounts_20230818) to this response an expanded version of the DVA Approach tab of the Attachment to 2-Staff-39, in which the calculated incremental revenue requirement and other amounts have been allocated to the Sub-Accounts listed below.

| BATU Installment Sub-Accounts | | 2024 | 2025 | | 2026 | 2027 | 2028 |
|---|----|-----------|-----------------|-----|------------|------------------|------------------|

- d) InnPower has not proposed disposition of the balances in IRM proceedings, rather proposed disposition at the next Cost of Service.
- **e) Per response to 2-Staff-38 e)** " If there are cost increases for the BATU project following InnPower's cost of service application, InnPower will capture the variance between the actual capital contribution and the budgeted capital contribution for 50% of the 2024 contribution and the actual contributions in 2025 through 2027 in the DVA."

Reference: Customer Forecast

Ref 1: 3-Staff-40

Question:

InnPower's response refers to a table of new subdivisions. OEB staff cannot find the referenced table.

a) Please provide the table responding to the referenced question.

Response:

The table is provided in pre-settlement question VECC-46.

Reference: Overhead Distribution Lines/Feeders

Ref 1: 4-Staff-49

Question:

InnPower stated that the Overhead Distribution Lines/Feeders budget includes station maintenance costs, which have doubled from 2023 to 2024.

a) Please provide the new stations that have been added to InnPower's service territory since 2017, if any.

Response:

- a) Below is a list of new stations added to InnPower's service area since 2017:
- 1. Sandy Cove T2
- 2. Cedar Point T2
- 3. Belle Ewart T1
- 4. Big Bay Point T1 (expanded from 8kV to 27.6kV)

Reference: Management, Finance, Administrative, Regulatory, and Information Technology

Ref 1: 4-Staff-53

Ref 2: Chapter 2 Appendices – 2-N

Ref 3: Chapter 2 Appendices – 2-JC

Question:

InnPower showed that in 2024 it contracted \$415k in costs to InnServices for Chief Compliance Officer, Corporate Services, Information Technology, health and safety, and legal services at market price.

- a) Please provide the business case analysis for contracting out to InnServices as per the Affiliate Relationship Code.
- b) Please confirm that InnPower used a fair and competitive bidding process to establish the market price.
- c) Do InnServices costs include any markup to the market price? If so, how much is the markup?
- d) Prior to 2021, the budget for Management, Finance, Administrative, Regulatory, and Information Technology was approximately \$1.5 million. How did InnPower operate within the budget in 2021?

Response:

a)

| <u>Position</u> | Cost to Contract | Comparator Role |
|-----------------|--------------------|------------------|
| | out to External | in MEARIE Salary |
| | Services (Includes | Survey |

| | 57% Burdened Rate) | |
|-----------------------------|-----------------------|---|
| Chief Compliance Officer | \$ 266,240.60 | Average of Head of Customer Service & Head of Information Technology |
| Corporate Services | \$230,165.14 | Manager, Risk Management |
| IT Manager - Salary | \$192,571.49 | Average of Manager, Information Systems and Information Security |
| IT Analyst (Cyber Security) | \$165,044.68 | Network Specialist |
| Manager, Health & Safety | \$191,489.76 | Health & Safety Manager |
| Law Člerk | \$109,303.40 | * No comparator in Mearie Salary Survey. Source: Robert Half Salary Guide |
| Total Cost: | <u>\$1,154,815.07</u> | |

InnServices provides these positions for approximately \$415k. It would cost an additional \$739,815 if InnPower were to acquire these positions from the market. These shared services provide a substantial benefit to the ratepayers.

- b) InnPower investigated the market for the above noted positions but did not issue a request for proposal for the services. InnPower looked at the comparative salaries, noted above, to provide these services internally as well sharing those services with its affiliate on a proportional basis. As noted above the incremental cost to provide those services internally would represent an incremental cost of approximately \$740k, versus the approximate cost of \$415k using the shared resources.
- c) InnServices charges base labour and burden rate to InnPower. InnServices does not charge a markup to InnPower.

| d) | The year 2021 was lower since a number of staff left and there were vacancies positions such as President, a system analyst, a regulatory manager, and a fin analyst. When these positions were re-hired, the new hires began at a lower raprogressed through the steps in our pay bands. | ancial |

Reference: Depreciation

Ref 1: 6-Staff-62

Ref 2: 2024 Income Tax PILs Workform, August 10, 2023

Ref 3: Chapter 2 Appendix 2-BA, August 10, 2023

Question:

OEB staff notes that the Net Depreciation figures in Reference 3 do not align with the Amortization amounts recorded in Sch 1 in Reference 2 for the historical, bridge, or test years.

The Net Depreciation amounts in Reference 3 have excluded the depreciation amounts of Other Non Rate-Regulated Utility Assets.

It seems that InnPower has double-counted the deduction of the depreciation amounts of Other Non Rate-Regulated Utility Assets by excluding the amounts in the Amortization of Tangible Assets in the PILs model. OEB staff notes that the net depreciation amount in Reference 3 should match with the Amortization of tangible assets amount in Reference 2.

- a) Please confirm OEB staff's observation above.
- b) If confirmed, please update the applicable schedules.

Response:

- a) Correct
- b) See below

Reference: 1-SEC-2 (2023 & 2024 Budget), 2-SEC-22a (2017 – 2024 CWIP), 2-Staff-38d (BATU)

Question:

a) In 2-SEC-22, part (a) InnPower has confirmed the CWIP shown in the table. In 2-Staff-35d, InnPower states "Per discussion with Hydro One, the 44kV line extension from BATU will not be in-service prior to December 31, 2023. The capital costs paid to Hydro One for the construction will be in work in process and will be carried over and put inservice in 2024". In the Budget Update for 2024 (See attachment to 1-SEC-2), InnPower shows \$6,424 of the spend in 2024 as TS Expenditures WIP.

Please reconcile the above three documents and confirm the capital expenditures and in-service additions for 2023 and 2024.

Response:

a) See attached file named Att SEC-1 Capital & WIP

Reference: 1-SEC-6

Question:

a) Please confirm that based on the 2022 scorecard provided, the update targets for SAIDI and SAIFI would be 1.76 and .83.

Response:

a) As per OEB staff, "the last set of targets were applicable for 2017 to 2021 scorecards and were based off 2012-2016 data. Since 2021 scorecard marks the completion of 5-year period, the targets were again reset for 2022 scorecard based off 2017-2021 data."

Please refer to Att SEC-2_InnPower_Reliability_Targets for the OEB's calculation of InnPower's reliability targets.

Reference: 2-Staff-4a,b, 2-SEC-18

Question:

a) Please explain the difference in the capital to the end of June 2023 shown in the attachment to 2-Staff-4b (\$244k) and that shown in 2-SEC-18 (\$4575k).

Response:

a) The capital to the end of June 2023 shown in 2-Staff-4b are in service additions. The capital shown in 2-SEC-18 are in-service additions plus work in process (WIP).

Reference: Appendix 2-AA, 2-Staff-31, 2-VECC-5

Question:

With respect to the fleet costs:

- a) Is the cost of leasing the small service truck and a pool of other vehicles in 2023 shown under Fleet or under Miscellaneous.
- b) Depending on InnPower's answer for part (a) what is the other \$476k in 2023 Miscellaneous capital costs for?
- c) Please confirm that the \$470k in 2024 is for the new bucket truck in 2024.

Response:

- a) The cost of leasing the small service truck and fleet pooled vehicles are reported under Miscellaneous in Appendix 2-AA.
- b) The \$476k reported in 2023 under Miscellaneous is for the following:
 - 1. 4 small fleet vehicles (\$181,036)
 - 2. 1 small service truck (\$294,653)
- c) Correct. The \$470k budgeted in 2024 is for the new bucket truck that was ordered in 2021.

Reference: 2-Staff-29d

Question:

a) The interrogatory asked InnPower to confirm if the \$1.35 million related to the new TS environmental assessment is recorded as work in progress in 2-BA. Please respond to the interrogatory as posed.

Response:

a) The \$1.35 million relating to the new TS environmental assessment is recorded in 2-BA as an in-service addition, not work in progress.

Reference: 3-SEC-26

Question:

a) InnPower's states: "To mitigate this inappropriate outcome, InnPower has adjusted all historical data such that the five transitioning customers are included within the customer count and kWh values across all years within the 10-year historical period (plus the first half of 2023).... The result of this adjustment is that the average kWh per customer in both the GS 50kW rate classes accurately reflects inclusion of these five customers in GS >50kW." In the updated load forecast attached to 3-SEC-26, the average kWh/customer for the GS > 50 kW class is 719,088 for 2017 to 2022, versus the forecasted 682,783."

Please produce an update load forecast which does not adjust the historical data for the five transitioning GS < 50 kW customers but includes them in 2023, as is done for a new customer.

Response:

- a) Please find attached (Att SEC-6_IPC_Exhibit_3_Load_Forecast_20230817) to this response a version of the load forecast which incorporates the change requested above. InnPower would highlight the following with respect to the outcomes of the scenario requested:
 - Neither the original GS customer adjustment included in InnPower's adopted load forecast issued August 8, 2023, nor this requested scenario, alter the total forecast power purchased or forecast billed kWh in the Test Year. As such, the effect of the scenario requested is a re-allocation of forecast kWh between rate classes, with subsequent implications for forecast Test Year kW.
 - Tab "Rate Class Customer Model" demonstrates the impacts of the requested scenario on forecast customer count by rate class. In the Test Year, the net effect is an increase of one customer to the GS<50kW rate class, and a

decrease of one customer to the GS>50kW rate class. However, the result of not adjusting for the movement of customers from GS<50kW to GS>50kW is an annualized increase in GS>50kW customer count of over 15% for 2023. Given the ten-year average is closer to 3%, and the known reality that the vast majority of customer additions in 2023 were customer migrations and not new customers, this input is not reasonable or appropriate in InnPower's assessment.

 The net effect of this scenario is a decrease to forecast Residential kWh in the Test Year, and increases to forecast kWh in both the GS<50kW and GS>50kW rate classes, with corresponding increases to GS>50kW forecast kW.

Reference: 4-SEC-33; Appendix 2-K

Question:

a) For the purposes of Appendix 2-K, when are the additional positions for 2023 and 2024 assumed to start?

Response:

a) InnPower assumes a start of January 2023 and January 2024 for additional positions in Appendix 2-K.

Reference: 3-Staff-40

Question:

- a) With respect to Staff 40 a) are the annual values for "connections added" just the residential connections? If yes, are there any other connections associated with subdivision growth?
- b) The table referenced in response to Staff 40 b) appears to be missing. Please provide.

Response:

- a) Yes, the annual values for "connections added" are just the residential subdivision connections. There are temporary and streetlight connections that are in addition to the numbers provided.
- b) The following is the table of new subdivisions with connections completed or anticipated in 2023 and 2024. For those not yet connected, InnPower does not have detailed information on the stage of construction at this point in the process as it with the developers' consultants and contractors.

Question:

a) Please provide the results for load forecast model where the regression equation used to forecast power purchases includes a COVID variable that is equal to 1.0 for the months of March 2020 to March 2022 and zero for all other months.

Response:

a) Please find attached (*Att VECC-47_IPC_Load_Forecast*) a version of the load forecast (as updated during interrogatories to incorporate 2023 YTD actuals) in which a COVID Flag variable has been added to the regression for the period March 2020 through March 2022. The net impact of the variable addition is a decrease to total billed kWh of 1.5%, and a decrease to total billed kW of 1.2% relative to the updated load forecast filed August 8, 2023.

4-Staff-53

Updated Chapter 2 Appendices, Tab 2H

Question:

a) As a result of the interrogatory responses, Miscellaneous Revenues have been reduced by \$519,951 due to changes in accounts 4375 and 4380. Please explain more fully the reasons for the changes in the 2024 forecast values for these accounts and provided updated versions of the Table 6-28 and 6-29 from the original application.

Response:

a) The miscellaneous revenues were reduced by \$519,951 due to an error in the budgeting software used to forecast the 4375 and 4380 balances. The revenue balance was pre-programmed to add a 15% service fee (which InnPower no longer charges), as well as incorrectly allocating the costs to the shared services account. InnPower has taken measures to correct the error for future forecasting of shared services.

Please see below for the updated versions of Table 6-28 and Table 6-29 from the original application.

Updated Table 6-28:

Question:

a) Please clarify whether the Embedded Distributor uses any of the InnPower assets in Accounts 1820, 1830, 1835, 1840 or 1845.

Response:

a) Yes, the Embedded Distributor uses the assets in the accounts mentioned above.

Appendix G – BATU DVA Accounting Order

InnPower Corporation

Draft Accounting Order

Account 1508 – Other Regulatory Assets, Sub-account BATU Installment Deferral Account

InnPower Corporation (InnPower) shall establish the new deferral account, "BATU Installment Deferral Account", effective January 1, 2024, to record 50% of the incremental revenue requirement impact associated with five years of capital contribution installments paid to Hydro One Networks Inc. (HONI) in accordance with section 6.3.19 of the *Transmission System Code* for the Barrie Area Transformer Upgrade Project (BATU Project) as accepted by the Ontario Energy Board (OEB) in EB-2018-0117. It is currently estimated that the five years of capital contribution installments paid to HONI will total \$20.6 million.

Assuming that the BATU Project is in-service before the end of 2023, this account only concerns the incremental revenue requirement impact related to capital contribution installment payments paid by InnPower for the BATU Project for: (i) half of the 2024 capital contribution installment payments due to the OEB half year rule; and (ii) 2025 to 2027 (Incentive Period Payments). It is currently estimated that the total value of the Incentive Period Payments will total \$14,420,000 based on the updated estimates in EB-2018-0117. Installment payments in 2023 and half of the payment in 2024 have been incorporated into InnPower's rate base in the 2024 Test Year and are currently estimated at \$6,180,000. If the BATU Project is delayed and is not in-service until 2024, please see section (4) below.

As part of this settlement, the Parties agree to a modified BATU Installment Deferral Account which would record for later final disposition: (i) 50% of the revenue requirement for the Incentive Period Payments; (ii) 50% of the revenue requirement for actually installment as a result of variances in actual and estimate BATU Project costs; (iii) 100% of the revenue requirement impact of any BATU Project delays; and (iv) differences between the rate rider revenue collected and the approved amount for disposition. For clarity, the Parties in EB-2023-0033 agreed that InnPower's collection of 50% of the revenue requirement does not indicate the prudence of the capital contribution installments paid to HONI for its proportionate share of the BATU Project, which will be assessed on final disposition.

1. Sub-accounts description

The deferral account will include three sub-accounts, which will be used for disposition.

(a) Account 1508 – Other Regulatory Assets, Sub-Account BATU Installment Revenue Requirement Impact

This account will be used to record 50% of the incremental revenue requirement impact associated with the Incentive Period Payments.

(b) Account 1508 – Other Regulatory Assets, Sub-Account BATU Installments, Rate Rider Revenues

This account will be used to record the collection of revenue through BATU rate riders implemented as part of InnPower's 2026 through 2028 IRM applications, and any riders implemented thereafter to complete collection of balances in the Revenue Requirement Impact and Carrying Charges sub-accounts. The BATU rate riders are further described in Section 3 below.

(c) Account 1508 – Other Regulatory Assets, Sub-Account BATU Installment, Carrying Charges

This will be used to record interest on the sub-accounts Revenue Requirement Impact and Rate Rider Revenues. InnPower will record monthly interest using the prescribed interest rates set by the OEB. Simple interest will be calculated on the opening monthly balances of the accounts until the balances are fully disposed of.

2. Interim disposition of accounts until rebasing

InnPower will seek interim disposition of revenue requirement amounts recorded in accordance with Schedule A as part of InnPower's annual IRM applications at the earliest practical date, which is anticipated to be no earlier than InnPower's 2026 IRM application, and will be brought forward for interim disposition in each IRM thereafter up to InnPower's next Cost of Service application.

3. Final Disposition of the accounts

Final disposition including any true-ups described above will be sought as part of InnPower's next Cost of Service application.

Clearance of these true-up variances will ensure the true-up of Revenue Requirement Impact amounts owed to InnPower (or to ratepayers) relative to Rate Rider Revenues collected on an actual basis, inclusive of Carrying Charges calculated on both sub-account balances.

InnPower's entries in the BATU Installment Deferral Account will adjust for cost variances such that on final disposition as part of InnPower's next rebasing application the revenue requirement

recovered from ratepayers is reflective of 50%¹ of the revenue requirement derived from actual capital contribution installments paid.

4. Circumstance where BATU Project delayed to 2024 (or beyond)

Should the in-service date for the BATU project vary from 2023 into 2024 or beyond, InnPower will:

- a) make entries in Account 1609 Capital Contributions Paid and Account 2120 –
 Accumulated Amortization of Electric Utility Plant Intangibles which are reflective of the actual costs and timing of the BATU installment payments and their associated accumulated depreciation;
- b) reflect that the BATU installment payments currently included in 2024 rate base and rates (which is the 2023 and half of the 2024 BATU installment payments, the "Rate Based Installment Payments") should, on an actual basis, not collect any revenue requirement for periods when the BATU Project is not in-service;
- c) calculate the 2024 through 2028 revenue requirements associated with the Rate Based Installment Payments;
- d) make annual credit entries to the Revenue Requirement Impacts Sub-Account which are equal to 100% of such revenue requirement amounts in (c) equal to the period where the BATU Project is not in-service.
- e) seek final disposition of the BATU Installment Revenue Requirement Impact account as part of InnPower's next Cost of Service application equal to the net difference between the credit entries in (d) and 50% of the revenue requirement associated with the actual Incentive Period Payments.

(a) Account 1508 – Other Regulatory Assets, Sub-Account BATU Installment Revenue Requirement Impact

Should the in-service date of the BATU Project be delayed from 2023 into 2024 or beyond, InnPower will make credit entries to the BATU Installment Revenue Requirement Impact sub-account equal to 100% of the revenue requirement associated with BATU installments currently included in the 2024 rate base, which on an actual basis should not have been included due to the delayed in-service date.

¹ With the exception of any credit amount to the benefit of ratepayers resulting from a delay to the inservice date of the BATU Project. Revenue requirement amounts associated with such credits will be recorded at 100%, as opposed to 50%

4. Establishment of deferral account sub-accounts

The deferral account sub-accounts will be established as follows:

- 1) Account 1508, Other Regulatory Assets Sub-Account BATU Installment, Revenue Requirement Impact
- 2) Account 1508, Other Regulatory Assets Sub-Account Batu Installment, Rate Rider Revenues
- 3) Account 1508, Other Regulatory Assets Sub-Account BATU Installment, Carrying Charges

The following outlines the proposed accounting entries:

| Sub-Account BATU Installment Revenue Requirement Impact | | | | | | | |
|--|--|--|--|--|--|--|--|
| | | | | | | | |
| Distribution Services Revenue | | | | | | | |
| To record 50% of the incremental revenue requirement impact associated with the Incentive Period Payments. | | | | | | | |
| Sub-Account BATU Installment, Carrying Charges | | | | | | | |
| Cr: 4405+ Interest Income | | | | | | | |
| ng Charges associated with amounts recorded in Sub-Accounts BATU enue Requirement Impact | | | | | | | |
| Customer Accounts Receivable | | | | | | | |
| Sub-Account BATU Installment, Rate Rider Revenues | | | | | | | |
| llection of rate rider billings | | | | | | | |
| Other Interest Expense | | | | | | | |
| Sub-Account BATU Installments, Carrying Charges | | | | | | | |
| To record carrying charges on the rate riders collected | | | | | | | |
| | | | | | | | |
