It would seem that even though the government applies reductions, it will always be that Hydro wants to increase the amount. I am totally against this rate increase! As a middle class tax payer, I feel that we are the ones gouged the most when it comes to increases. In the past 10 years since I moved into this home, my hydro bill has already doubled - and I have replaced the furnace and the air conditioner within the past 1-5 years and still my bills go up. As a consumer I have done all I can do, including an energy audit and making sure I do everything I can to make my home energy efficient; to no avail! I am about to retire within 5 years and wonder where we will be by that time and if I will afford to stay in my home.
