

**ONTARIO ENERGY BOARD**

**IN THE MATTER OF** the Ontario Energy Board Act,  
1998, S.O. 1998, c. 15, Schedule B, as amended;

**AND IN THE MATTER OF** an application by Enbridge Gas Inc. for an order granting leave to construct natural gas distribution pipelines and ancillary facilities that make up a Community Expansion Project to serve the community of Sandford in the Township of Uxbridge.

**AFFIDAVIT OF SERVICE**

I, Bonnie Jean Adams of the City of Vaughan, make oath and say as follows:

1. I am in the employ of Enbridge Gas Inc. (Enbridge Gas) and as such have knowledge of the matters hereinafter deposed to.
2. On or about September, 2022, a search of title forthwith sufficient to determine the owners and encumbrances with land, or registered interests in land directly affected by the construction of the proposed pipeline and related facilities was conducted (attached as part of Exhibit C to this Affidavit).
3. Pursuant to the September 11, 2023, Letter of Direction from the Ontario Energy Board (OEB), I caused to be served by courier the Notice of Hearing in (Exhibit A), Enbridge's Application including the exhibits listed below (Exhibit B) upon all property owners and encumbrances with lands or interest in lands as shown in Exhibit G, Tab 1, Schedule 1, Attachment 3 of Enbridge Gas' pre-filed evidence.
  - Exhibit B-1-1 – Project Need
  - Exhibit C-1-1 – Alternatives
  - Exhibit D-1-1 – Proposed Project
  - Exhibit E-1-1 – Cost & Economics

- Exhibit F-1-1 – Environmental Matters
  - Exhibit G-1-1 – Land Matters & Agreements
  - Exhibit H-1-1 – Indigenous Consultation
4. Attached hereto is proof in the form of UPS/Canada Post courier confirmation sheets (Exhibit C), that the relevant Notice of Hearing, and Enbridge's Application and evidence was served on those parties noted in the paragraph above as requested by the OEB in the Letter of Direction. Personal information has been redacted from the landowner and encumbrancer listing. The packages that were considered "return to sender" and undelivered are listed in Exhibit C.
5. As directed by the OEB in the Letter of Direction, attached hereto is proof in the form of an email (Exhibit D) that the relevant Notice of Hearing, and Enbridge's Application and evidence was served on the following parties:
- a) the clerk of the Township of Uxbridge and Region of Durham
  - b) all Indigenous communities that have been consulted or with lands or interest in the lands directly affected by the proposed pipeline and related facilities
  - c) the Métis Nations of Ontario, Suite 1100 – 66 Slater Street, Ottawa, ON K1P 5H1
  - d) all affected utilities and railway companies
  - e) members of the Ontario Pipeline Coordinating Committee
  - f) Lake Simcoe Region Conservation Authority
  - g) Fisheries and Oceans Canada
  - h) Transport Canada
  - i) Environment and Climate Change Canada
  - j) Indigenous Services Canada
  - k) Crown-Indigenous Relations and Northern Affairs Canada
  - l) Bereavement Authority of Ontario
  - m) Ministry of Public and Business Service Delivery
  - n) Ministry of Economic Development, Job Creation & Trade
  - o) Ministry of Indigenous Affairs
  - p) Impact Assessment Agency of Canada

6. In accordance with the Letter of Direction, I caused a copy of the Notice of Hearing and Application and Evidence to be placed in a prominent place on Enbridge's website. Attached as Exhibit E is proof of the information posted to the website.

A Commissioner for taking Affidavits

---

Bonnie Jean Adams  
Regulatory Coordinator

Enbridge Gas Inc. has applied for leave to construct natural gas pipelines in the community of Sandford, within the Township of Uxbridge.

Learn more. Have your say.

Enbridge Gas Inc. has applied to the Ontario Energy Board for an order granting leave to construct natural gas pipelines in the community of Sandford, within the Township of Uxbridge. The pipelines consist of approximately 4.9 kilometres of Nominal Pipe Size (NPS) 2-inch polyethylene (PE) distribution pipeline and approximately 8.4 kilometres of NPS 4-inch PE distribution pipeline. Enbridge Gas Inc. is also proposing to construct ancillary facilities. The location of the proposed pipelines is shown in the map.

Enbridge Gas Inc. states that the pipelines are needed to supply natural gas to approximately 183 new customers in the community of Sandford, within the Township of Uxbridge, who currently do not have access to natural gas service. Enbridge Gas Inc. states that it intends to charge the OEB-approved System Expansion Surcharge to all new customers that will be taking service from the project.

Enbridge Gas Inc. states that on June 9, 2021, the proposed project (also referred to as the Sandford Community Expansion Project), was approved to receive funding assistance under Phase 2 of the Government of Ontario’s Natural Gas Expansion Program.

Enbridge Gas Inc. is also asking the Ontario Energy Board to approve the form of agreement it offers to landowners to use their land for routing or construction of the proposed line.

Enbridge Gas Inc. is also seeking approval to cancel and supersede the existing Certificates of Public Convenience and Necessity held by Enbridge Gas Inc. for the former Town of Uxbridge, the former Township of Uxbridge and the former Township of Scott and replace them with a single Certificate of Public Convenience and Necessity to construct works to supply natural gas in the Township of Uxbridge.

Please review the application for more information about the proposed project.

A map of the proposed pipeline project is provided abelow.

THE ONTARIO ENERGY BOARD WILL HOLD A PUBLIC HEARING

The Ontario Energy Board (OEB) will hold a public hearing to consider Enbridge Gas’s application. During the hearing, we will question Enbridge Gas on the case. We will also hear questions and arguments from individual consumers, municipalities and others whose interests would be affected. At the end of this hearing, the OEB will decide whether to approve the application.

As part of its review of this application, the OEB will assess Enbridge Gas’s compliance with the OEB’s Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario.

**The OEB will also assess whether the duty to consult with Indigenous Communities potentially affected by the proposed pipeline has been discharged with respect to the application.**

More information on the types of issues that the OEB may consider are provided on the OEB’s website in the form of a standard issues list: <https://www.oeb.ca/sites/default/files/issues-list-LTC-natural-gas.pdf>

The OEB is an independent and impartial public agency. We make decisions that serve the public interest. Our goal is to promote a financially viable and efficient energy sector that provides you with reliable energy services at a reasonable cost.

BE INFORMED AND HAVE YOUR SAY

You have the right to information regarding this application and to be involved in the process.

- You can review the application filed by Enbridge Gas on the OEB’s website now
- You can find information on the OEB’s website at [www.oeb.ca/participate](http://www.oeb.ca/participate)
- You can find information on the **duty to consult with Indigenous communities** on the OEB’s website at [www.oeb.ca/industry/applications-oeb/consultation-indigenous-peoples](http://www.oeb.ca/industry/applications-oeb/consultation-indigenous-peoples)
- You can file a letter with your comments, which will be considered during the hearing
- You can become an intervenor. As an intervenor you can ask questions about Enbridge Gas’s application and make arguments on whether the OEB should approve Enbridge Gas’s request. Apply by **October 10, 2023** or the hearing will go ahead without you and you will not receive any further notice of the proceeding
- At the end of the process, you can review the OEB’s decision and its reasons on our website

LEARN MORE

Our file number for this case is EB-2023-0200. To learn more about this hearing, find instructions on how to file a letter with your comments or become an intervenor, or to access any document related to this case, please select the file number EB-2023-0200 from the [www.oeb.ca/noticeltc](http://www.oeb.ca/noticeltc) on the OEB website. You can also phone our Public Information Centre at 1-877-632-2727 with any questions.

FORM OF HEARING

There are three types of OEB hearings – oral, electronic, and written. Enbridge Gas has applied for a written hearing. The OEB is considering this request. If you have a preference with respect to the format of the hearing, you can write to the OEB to explain why by **October 10, 2023**.

PRIVACY

If you write a letter of comment, your name and the content of your letter will be put on the public record and the OEB website. However, your personal telephone number, home address and email address will be removed. If you are a business, all your information will remain public. If you apply to become an intervenor, all information will be public.

*This hearing will be held under section 90(1) and 97 of the Ontario Energy Board Act, 1998, S.O. 1998, c.15, Schedule B and sections 8(1), 9(3) and 9(4) of the Municipal Franchises Act, R.S.O. 1990, c.M.55.*

## **ONTARIO ENERGY BOARD**

**IN THE MATTER OF** the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, Schedule B; and in particular sections 90(1) and 97 thereof;

**AND IN THE MATTER OF** the *Municipal Franchises Act*, R.S.O. 1990, c.M.55, as amended;

**AND IN THE MATTER OF** an application by Enbridge Gas Inc. for an order granting leave to construct natural gas distribution pipelines and ancillary facilities that make up a Community Expansion Project to serve the community of Sandford in the Township of Uxbridge.

**AND IN THE MATTER OF** an Application by Enbridge Gas Inc. for an Order cancelling and superseding the existing Certificates of Public Convenience and Necessity held by Enbridge Gas Inc. for the former Town of Uxbridge, the former Township of Uxbridge and the former Township of Scott and replacing them with a single Certificate of Public Convenience and Necessity to construct works to supply natural gas in the Township of Uxbridge.

## **APPLICATION**

1. Enbridge Gas Inc. ("Enbridge Gas" or the "Company") hereby applies to the Ontario Energy Board ("OEB") pursuant to section 90(1) of the Ontario Energy Board Act, 1998, S.O. 1998, c. 15, Schedule B (the "Act"), for an order granting leave to construct natural gas pipelines and facilities, as described herein, in the community of Sandford, in the Township of Uxbridge, Ontario ("Project"). The pipeline facilities which the Company is seeking OEB approval through this Application consist of:

- (i) Approximately 4.9 km of Nominal Pipe Size (“NPS”) 2 polyethylene (“PE”) natural gas pipeline, and
  - (ii) Approximately 8.4 km of NPS 4 PE natural gas pipeline.
- 2. For ease of reference and to assist the OEB with preparation of the notice of application for the Project, a map of the proposed facilities is included as Attachment 1 to this Exhibit.
- 3. On June 9, 2021, the proposed Sandford Community Expansion Project was approved to receive funding assistance as part of Phase 2 of the Government of Ontario’s Natural Gas Expansion Program (“NGEP”), which provides financial support to help utilities expand natural gas distribution in communities that are not currently connected to the natural gas system. The Project will provide approximately 183 forecasted customers located in the community of Sandford in the Township of Uxbridge with access to safe, reliable, and affordable natural gas distribution services.<sup>1</sup>
- 4. With leave to construct approval from the OEB, construction of the Project is planned to commence in July 2024 and be placed into service by January 2025. The proposed construction schedule can be found at Exhibit D, Tab 2, Schedule 1.
- 5. Enbridge Gas intends to charge a System Expansion Surcharge (“SES”) to all new customers taking gas distribution service from the Project. In accordance with the OEB’s EB-2020-0094 Decision and Order, the SES will be a fixed volumetric rate of \$0.23 per cubic metre of gas to be charged in addition to Enbridge Gas’s base distribution rates as approved by the OEB. The SES is

---

<sup>1</sup> 183 customers including: 173 residential, 9 commercial/ institutional, and 1 industrial customer

proposed to be charged to all customers taking gas distribution service from the Project for a term of 40 years. Detailed information about the proposed SES and its applicability to the Project can be found in Exhibit E.

6. Enbridge Gas also hereby also applies to the OEB for an Order pursuant to Section 8 of the *Municipal Franchises Act* cancelling and superseding the existing Certificates of Public Convenience and Necessity held by Enbridge Gas Inc. for the former Town of Uxbridge, the former Township of Uxbridge and the former Township of Scott and replacing them with a single Certificate of Public Convenience and Necessity to construct works to supply natural gas in the Township of Uxbridge.
7. The Corporation of the Township of Uxbridge is a municipal corporation incorporated under the laws of the Province of Ontario which is located within in the Regional Municipality of Durham. Attachment 2 to this Exhibit is a map showing the geographical location of the Township of Uxbridge and a customer density representation of Enbridge Gas' service area. Enbridge Gas currently serves approximately 1,200 customers in the Township of Uxbridge.
8. Enbridge Gas (Consumers' Gas Company) began providing gas distribution services within the former Town of Uxbridge in approximately 1957. Enbridge Gas began providing gas distribution services within the former Township of Scott and the former Township of Uxbridge in approximately 1958.
9. In 1974, with the creation of the Regional Municipality of Durham, the former Town of Uxbridge, the former Township of Uxbridge and the former Township of Scott were amalgamated into the current Township of Uxbridge.

10. Enbridge Gas has a franchise agreement (EB-2019-0110) with the Township of Uxbridge and Certificates of Public Convenience and Necessity for the former Town of Uxbridge (FBC 160 dated December 23, 1957), the former Township of Uxbridge (FBC 161 dated December 23, 1957) and the former Township of Scott (FBC 206 dated August 19, 1958) all of which are included at Attachment 3 to this Exhibit. The proposed community expansion project to provide access to gas distribution service in the community of Sandford is located within the former Township of Scott.

11. The Natural Gas Facilities Handbook (issued March 31, 2022) states the following:

*3.6.2 Municipal Changes that do not affect another Person's Certificate Rights*

*If the boundaries of a person's existing certificate are affected by a municipal amalgamation or annexation, and no other person holds a certificate for any part of the newly amalgamated or annexed municipal territories, then the person should notify the OEB within 90 days of the date that the change takes effect to have the certificate amended to reflect the change. The OEB will not as a matter of course amend the territory covered by the person's existing certificate to include any additional service area that was added to the municipality through the amalgamation or annexation. The certificate would be amended to include the metes and bounds of the person's existing certificate. However, the certificate holder could also apply for a new certificate that would include any additional service area within the newly amalgamated territories.*

12. Enbridge Gas is not aware of any changes to the municipal boundaries of the former municipalities that now make up the Township of Uxbridge since the original Certificates of Public Convenience and Necessity were issued.

13. Enbridge Gas has Franchise Agreements with and Certificates of Public Convenience and Necessity for the Township of Brock, the Town of East Gwillimbury, the Town of Georgina, the City of Pickering, the Township of Scugog, the Town of Whitby and the Town of Whitchurch-Stouffville which are immediately adjacent to the Township of Uxbridge. There is no other natural gas distributor nearby.
14. If the OEB determines that it will conduct a hearing for this application, then Enbridge Gas requests that it proceed by way of written hearing in English.
15. Enbridge Gas requests that the OEB make the following orders:
  - (i) pursuant to section 90(1) of the Act, an Order granting leave to construct the Project; and
  - (ii) pursuant to section 97 of the Act, an Order approving the form of temporary land use agreements and easement agreements found at Exhibit G, Tab 1, Schedule 1, Attachments 1 and 2.
  - (iii) Pursuant to section 8 of the *Municipal Franchise Act*, an Order cancelling and superseding the existing Certificates of Public Convenience and Necessity held by Enbridge Gas Inc. for the former Town of Uxbridge, the former Township of Uxbridge and the former Township of Scott and replacing them with a single Certificate of Public Convenience and Necessity to construct works to supply natural gas in the Township of Uxbridge.

16. Enbridge Gas requests that copies of all documents filed with the OEB in connection with this proceeding be served on it and on its counsel, as follows:

(a) The Applicant:	Brittany Zimmer Sr Advisor, Leave to Construct Applications
Address:	P.O Box 2001 50 Keil Drive N Chatham, ON N7M 5M1
Telephone:	(519) 436-4600 x5004651
E-Mail:	<a href="mailto:EGIRegulatoryProceedings@enbridge.com">EGIRegulatoryProceedings@enbridge.com</a> <a href="mailto:brittany.zimmer@enbridge.com">brittany.zimmer@enbridge.com</a>
(b) The Applicant's counsel:	Guri Pannu Senior Legal Counsel Enbridge Gas Inc.
Address for personal service:	500 Consumers Road Toronto, ON M2J 1P8
Mailing Address:	P.O. Box 650 Scarborough, ON M1K 5E3
Telephone:	(416) 758-4761
Fax:	(416) 495-5994

## PROJECT NEED

### Introduction

1. The Sandford Community Expansion Project (“Project”) will make natural gas available to approximately 183 customers in the Township of Uxbridge.<sup>1</sup> Expansion of Enbridge Gas’s natural gas distribution system within the Township of Uxbridge will further the Government of Ontario’s efforts pursuant to its Natural Gas Expansion Program (“NGEP”) to have gas service made available to communities in Ontario that are currently not served.
2. The Project is composed of:
  - 4.9 km of Nominal Pipe Size (“NPS”) 2 polyethylene (“PE”) natural gas pipeline,
  - 8.4 km of NPS 4 PE natural gas pipeline, and
  - Ancillary facilities, including customer services (meters, regulators, and service pipelines) and the replacement of an existing distribution station.

### The Government of Ontario NGEP

3. The Project is one of those previously approved to receive funding assistance from Phase 2 of the Government of Ontario’s NGEP. The Government of Ontario describes the NGEP as follows:

The Natural Gas Expansion Program was created under the *Access to Natural Gas Act, 2018* to help expand access to natural gas to areas of Ontario that currently do not have access to the natural gas distribution system. This program encourages communities to partner with gas distributors on potential expansion projects that would not be built without additional financial support and submit

---

<sup>1</sup> 183 customers including: 173 residential, 9 commercial /institutional, and 1 industrial customer

information on these proposals to the Ontario Energy Board.<sup>2</sup>

4. As part of Phase 2 of the NGEP process, Enbridge Gas filed proposals for 207 potential community expansion and economic development projects. On June 9, 2021, the Government of Ontario announced that 28 projects across 43 communities were selected for funding under Phase 2 of the NGEP, including the Project. The press release is included as Attachment 1 to this Exhibit.
5. By proceeding with the Project, Enbridge Gas will expand access to safe, reliable, and affordable natural gas service to the Township of Uxbridge in direct support of the NGEP.

#### Delivering the Energy that Customers Want and Need

6. Enbridge Gas has conducted consultations with the Township of Uxbridge and the Durham Region. The Township of Uxbridge has emphasized its support for the Project on multiple occasions via a council resolution dated June 30, 2020, which is included at Attachment 2 to this Exhibit.

#### *Market Research*

7. Enbridge Gas also retained Forum Research, a third-party independent research supplier, to conduct surveys by telephone, online and in-person of potential customers in September 2022.
8. The survey informed residents and consumers about the proposed Project and sought information pertaining to the characteristics of dwellings/buildings, including:
  - their nature (i.e., residential, commercial or industrial space, etc.);
  - the current fuel type relied upon; and

---

<sup>2</sup> <https://www.ontario.ca/page/natural-gas-expansion-program>

- interest in converting to natural gas-fueled equipment and/or appliances.
9. A total of 108 surveys were completed. Results from the Forum Research Survey indicate that the split between fuel sources for residents in Sandford is currently approximately 57% propane, 35% oil, 3% geothermal, 4% electricity<sup>3</sup> and 1% wood. 87% of respondents indicated that they would be likely (extremely likely, very likely or likely) to convert to natural gas if it were made available. Of those likely to convert, approximately 69% indicated that they would convert within 1 year of natural gas service becoming available, 24% indicated they would convert within 1-2 years of natural gas service becoming available, and the remaining 7% would convert in 2 years or more of natural gas service becoming available. The results of this survey are summarized in Attachment 3 to this Exhibit.
10. Enbridge Gas also conducted in-person surveys of potential commercial/industrial customers within the Project area beginning in fall 2022 to gauge interest in natural gas distribution service and to obtain customer load information where possible.
11. Natural gas continues to maintain price competitiveness against other energy alternatives in Ontario. Figure 1 shows this price advantage, including the proposed \$0.23 per m<sup>3</sup> System Expansion Surcharge (“SES”). The data shown in Figure 1 is based on July 2023 QRAM rates and is calculated assuming a typical Rate 1 residential customer consuming 2,400 m<sup>3</sup> of natural gas per year. Based on the most recent prices available, a typical residential Rate 1 customer saves 58% compared to heating oil, 24% compared to electricity and 32% compared to

---

<sup>3</sup> 4% includes 2% of respondents that indicated their primary energy source was Electricity (1% Electric Forced Air and 1% Electric Heat Pump) + 2% of respondents that indicated their primary energy source was Air Source Heat Pumps.

propane.<sup>4</sup> Importantly, the electricity prices utilized in Figure 1 include the Ontario Electricity Rebate which effectively suppresses the cost of electricity.

---

<sup>4</sup>Oil and propane prices are based on the latest available retail prices at the time of comparison. Electricity rates are based on Hydro One Distribution rates (Med-density R1) as of January 1, 2023 and RPP customers that are on TOU pricing effective as of May 1, 2023. Electricity rates include the new Ontario Electricity Rebate (OER) and exclude fixed charges. Electric cold climate air source heat pumps are available but not included in the savings calculations. Costs have been calculated for the equivalent energy consumed and include all service, delivery and energy charges. The Federal carbon charge is included for all energy types based on the July 1, 2023 rate. The Federal carbon charge is expected to increase annually depending on government policies.

**Figure 1: Annual Energy Costs & Savings Versus Natural Gas, Including SES**

**Rate 1  
Annual Space & Water Heating Cost**

Notes: Natural gas price is based on Rate 1 rates in effect as of July 1, 2023, and includes the \$0.23 per m³ expansion surcharge. Oil and propane prices are based on the latest available retail prices. Electricity rates based on Hydro One Distribution rates (Mid-density R1) as of Jan. 1, 2023, and Regulated Price Plan (RPP) customers that are on Time-Of-Use (TOU) pricing. It includes the Ontario Electricity Rebate (OER). Electric cold climate air source heat pumps are available but not included in the savings calculations. Costs have been calculated for the equivalent energy consumed and include all service, delivery and energy charges. The Federal carbon charge is included for all energy types as reported and expected to increase annually depending on government policies. HST is not included.

- Recent pricing data for natural gas and alternative fuels continue to show cost savings despite the \$0.23/m³ SES. Table 1 below estimates the average customer savings in the Project area of approximately \$1,329 through conversion to natural gas. Annual energy costs by fuel type are based on the calculations used to develop Figure 1.

Table 1: Estimated Annual Fuel Costs & Fuel Cost Savings for a Typical Rate 1

Residential Customer

Primary Fuel	Penetration Rate	Annual Bill (\$)	Annual Natural Gas Savings (\$)
Natural Gas	-	\$1,852	NA
Electricity	4%	\$2,445	\$593
Heating Oil	35%	\$4,372	\$2,520
Propane	57%	\$2,727	\$875
Wood	1%	No data available	No data available
Geothermal/Ground Source Heat Pumps	3%	No data available	No data available
Average Annual Natural Gas Savings ( <i>compared to alternative fuel sources</i> )			\$ \$1,329

Note – Customers using wood and geothermal heat-pumps as their primary fuel source have been excluded from this table due to lack of accurate Annual Billing information and the low penetration rate within the project area.

13. Enbridge Gas has promoted and will continue to promote the efficient use of natural gas, current offers, and incentives to all residents and businesses in the Project and surrounding areas. The Company will work cooperatively with local heating contractors to encourage early conversion to natural gas.

*Growth Forecast*

14. Table 2 below provides the Company's expected ten-year growth forecast for customer additions in the Project area. The ten-year growth forecast has been informed by the ongoing price advantage of natural gas over other energy sources, current Municipal Property Assessment Corporation ("MPAC") data and survey results discussed above, indicating that a high level of conversions is likely.

Table 2: Forecasted Customer Attachments for the Sandford Community

Expansion Project

Customer Additions	Year 1	Year 2	Year 3	Yer 4	Year 5	year 6	year 7	year 8	year 9	year 10	Total Forecasted
Residential Single-Family Conversion	34	34	25	18	18	9	9	9	9	8	173
Commercial	3	2	2	1							8
Institutional		1									
Industrial		1									
Total	37	38	27	19	18	9	9	9	9	8	183

Related Enbridge Gas Projects

15. While the Project is one of many community expansion projects proposed by Enbridge Gas, the Project itself does not contain any planned future phases and is not dependent upon any previously filed leave to construct application by Enbridge Gas. This Project is designed exclusively to serve the project areas discussed above and throughout the balance of this application.

Conclusion

16. The Project is required to support the NGEP and is designed to expand access to safe, reliable, and affordable natural gas to areas of Ontario that do not currently have it. The need for the Project is directly supported by the Township of Uxbridge through their request for natural gas for their constituents, and by the interest in natural gas service within the community as derived from the market research and in-person survey results.

## ALTERNATIVES

### Integrated Resource Planning Alternatives

1. The Decision and Order for Enbridge Gas's Integrated Resource Planning Framework Proposal (EB-2020-0091) was issued on July 22, 2021. This decision was accompanied by an Integrated Resource Planning Framework for Enbridge Gas ("IRP Framework")<sup>1</sup>. The IRP Framework provides guidance from the OEB about the nature, timing and content of IRP considerations for future identified system needs. The IRP Framework provides Binary Screening Criteria in order to focus IRP assessments on identified system needs where there is reasonable expectation that an IRP alternative could efficiently and economically meet a system need.
2. Accordingly, Enbridge Gas has applied the Binary Screening Criteria and determined this Project meets the definition of a community expansion project, as defined in the IRP Framework, as the Project has been approved by the Government of Ontario as part of the Phase 2 NGEP, to provide access to natural gas services in the Township of Uxbridge. The IRP Framework Decision explains that "Given the goal of the Ontario Government's Access to Natural Gas legislation to extend gas service to designated communities, the OEB will not require Enbridge Gas to develop an IRP Plan or consider alternatives to the infrastructure facilities to meet this need."<sup>2</sup>
3. Consequently, per the IRP Binary Screening Criteria (iv) the need underpinning the Project does not warrant further IRP consideration or assessment:

**iv. Community Expansion & Economic Development** – If a facility project has been driven by government legislation or policy with related funding explicitly aimed at delivering natural gas into communities, then an IRP evaluation is not required.<sup>3</sup>

---

<sup>1</sup> EB-2020-0091, Decision and Order, July 22, 2021, Appendix A

<sup>2</sup> Ibid., p.10

<sup>3</sup> Ibid., p.11

Facility Alternatives

4. As discussed in Exhibit B, the Project was designed in response to the Government of Ontario's *Access to Natural Gas Act, 2018* and NGEF (Phase 2) which called for communities and natural gas distributors to work together to expand access to natural gas in unserved areas of Ontario. Accordingly, a description of the proposed Project (including preliminary facility design and estimated Project costs) was submitted to the OEB and the Government of Ontario. On the basis of this proposal on June 9, 2021, the Government of Ontario announced that the Project (along with 27 others) was selected for funding under Phase 2 of the NGEF.
5. Considering that the proposed Project was previously reviewed and approved by the Government of Ontario and the OEB for the purposes of granting funding under Phase 2 of the NGEF, Enbridge Gas did not assess other facility alternatives.

## PROPOSED PROJECT, ENGINEERING AND CONSTRUCTION

### Proposed Project

1. The Project will tie into the existing NPS 4 Intermediate pressure (“IP”) polyethylene (“PE”) Enbridge Gas system at the intersection of Concession Road 6 and Bolton Drive. The pipeline will extend northwest along Concession Road 6 to Sandford Road before heading southwest into the Community of Sandford.
2. The Project consists of approximately 4.9 km of NPS 2 PE natural gas pipeline, approximately 8.4 km of NPS 4 PE natural gas pipeline, and ancillary facilities including customer services (meters, regulators and service pipelines) as well as the replacement of an existing distribution station at the corner of Concession road 6 and Bolton drive.
3. The route and location for the proposed facilities associated with the Project were reviewed by an independent environmental consultant through the process outlined in the Ontario Energy Board’s *“Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Projects and Facilities in Ontario”* (8<sup>th</sup> Edition, 2023) (the “Guidelines”). Input from the public was sought during the route selection process and was incorporated into the final route design. Details on the route selection and the Environmental and Socio-Economic Impact Assessment of the proposed facilities can be found in the Environmental Report found at Attachment 1 to Exhibit F. A map of the proposed Project can be found at Attachment 1 to Exhibit A, Tab 2, Schedule 1.

### Project Construction

4. Enbridge Gas will ensure that all piping components for the Project will be designed, installed, and tested in accordance with specifications outlined in Enbridge Gas's Construction and Maintenance Manual ("Specifications"). This manual meets or exceeds the requirements of *CSA Z662 – Oil and Gas Pipeline System standard and Ontario Regulation 210/01, Oil and Gas Pipeline Systems*.
5. Enbridge Gas will construct the Project using qualified construction contractors and Enbridge Gas employees. Each of these groups will follow approved construction Specifications that reflect the site specific conditions of the Project as per the findings in the Environmental Report and the Environmental Protection Plan discussed in Exhibit F. All construction, installation and testing of the Project will be witnessed and certified by a valid Gas Pipeline Inspection Certificate Holder.
6. Pipe may be installed using either the trench method or the trenchless method or a combination of both. Restoration and monitoring will be conducted to ensure successful environmental mitigation for the Project.
7. Pipeline construction is divided into several crews that create a mobile assembly line. Each crew performs a different function, with a finished product left behind when the last crew has completed its work.
8. Contractors are required to erect safety barricades, fences, signs or flashers, or to use flag persons as may be appropriate, around any excavation across or along a road.
9. Construction of the pipeline includes the following activities:

(a) Locating Running Line

The location where the pipeline is to be installed (the running line) is established initially. For pipelines within road allowances, the adjacent property lines are identified, and the running line is set at a specified distance from the property line. For pipelines located on private easement, the easement is surveyed, and the running line is set at the specified distance from the edge of the easement. The distance from the start of the pipeline (or other suitable point) is marked on the pipeline stakes and the drawings.

(b) Clearing and Grading

The right-of-way is prepared for the construction of the pipeline. When required, bushes, trees and crops are removed and the ground is leveled. When required, the topsoil is stripped and stored, and/or sod is lifted.

(c) Stringing

The joints of pipe are laid end-to-end on supports that keep the pipe off the ground to prevent damage to the pipe, where applicable.

(d) Installation

Pipe may be installed using either the trench method or the trenchless method dependant on site geology. All utilities that will be crossed or paralleled by the pipeline within the identified construction area will be located by the appropriate utility owner prior to installing the pipeline. Prior to construction, all such utilities will be hand-located or hydro vacuumed to identify their location.

*Trench Method:* Trenching is done by using a trenching machine, backhoe or excavator depending upon the ground conditions. Provisions are made to allow residents access to their property, as required. All drainage tiles that are cut during the trench excavation are flagged to signify that a repair will be required. All tiles are measured and recorded as to size, depth, type and quality, and this information is kept on file.

*Rock Excavation:* Rock in solid beds or masses will be fractured and removed using either a Hoe Ram and/or an approved blasting method. The blasting will be permitted in accordance with Enbridge Gas's construction procedures and the federal Explosives Act. The contractor shall obtain all necessary permits and shall comply with all legal requirements in connection with the use, storage and transportation of explosives as well as abiding by Enbridge Gas Specifications for rock excavation.

*Trenchless Method:* Trenchless methods are alternate methods used to install pipelines under railways, roads, sidewalks, trees and environmentally sensitive areas and watercourses. One of the trenchless methods proposed for this Project is directional drilling. This method involves setting up a receiving hole and an exit hole, drilling a pilot hole on the design path, reaming the pilot hole larger by passing a cutting tool and pulling the pipe back through the bored hole. Other common methods are boring and ploughing which may also be utilized in the installation of the infrastructure for the Project.

(e) Tie-Ins

The sections of pipelines that have been buried using either the trench or trenchless method are joined together (tied-in).

(f) Cleaning and Testing

To complete the construction, the pipeline is cleaned and tested in accordance with Enbridge Gas Specifications and placed into service.

(g) Backfilling and Restoration

The final construction activity is restoration of lands. The work area is backfilled and leveled, sod is replaced in lawn areas and other grassed areas are re-seeded. After the trench is backfilled, drainage tile is repaired as applicable. Where required, concrete, asphalt and gravel are replaced and all areas affected by the construction of the pipeline are returned to as close to original condition as possible. As a guide, to show the original condition of the area, photos and/or a video will be taken before any work commences. When the clean-up is completed, the approval of landowners or appropriate government authority is obtained.

Design Specifications & Testing Procedures

10. The design specifications for the Project are provided in Tables 1 below. The specifications are representative of the entire Project. Higher wall thickness or higher category piping may also be used in railway and water crossings pending final engineering assessment and calculations. Testing procedures for the Project are discussed below.

Table 1: NPS 4 and NPS 2 Intermediate Pressure (IP) Polyethylene (PE) Pipeline  
Design Specifications

<u>Description</u>	<u>Design Specification</u>		<u>Unit</u>
Pipe	NPS 2	NPS 4	-
External Diameter	60.3	114.3	mm
Standard Dimension Ratio (SDR)	11		-
Material Specification	CSA B137.4, latest edition		-
Material Designation	Medium Density PE (PE 2708)		-
<u>Components</u>			
Fittings	CSA B137.4		-
Flanges	N/A		-
Valves	CSA B16.40		-
<u>Design Data</u>			
Class Location	4		-
Design Pressure	440		kPa
Maximum Operating Pressure	440		kPa
Minimum Depth of Cover	0.9		m
Method of Construction	Open Cut/Horizontal Directional Drill/Plough		-
<u>Concurrent Strength and Leak Test Data</u>			
Test Medium	Air or Nitrogen		
Test Pressure (Min/Max)	700/770		kPa
Min Test Duration	- 8 hrs for Approved Digital Instrument - 24 hrs for Approved Mechanical Pressure and Temperature Chart Recorder		Hr

11. The NPS 4 and NPS 2 PE pipeline will be concurrently strength and leak tested after the installation of the pipe, for a minimum duration as shown in Table 2.

TSSA Correspondance

12. Enbridge Gas has sent the application for the design for the proposed facilities to the Technical Standards & Safety Authority ("TSSA") for review and are awaiting a response.

Timing

13. The construction schedule is shown at Exhibit D, Tab 2, Schedule 1. As proposed, the construction schedule will enable residents to use natural gas for the 2025/2026 heating season. To meet the planned in-service date, Enbridge Gas must commence construction by July 2024 and plans to place the Project into service in January 2025.

## PROJECT COST AND ECONOMICS

### Project Cost

1. The total cost for the proposed Sanford Community Expansion Project is estimated to be \$7.2 million (as set out in Table 1 below), of which \$5.1 million is attributed to pipeline facilities for which the Company is seeking leave to construct via the current Application, and \$2.2 million is attributed to Ancillary Facilities for which the Company is not seeking leave to construct.

Table 1: Estimated Project Costs (\$CAD)

Item No	Description	Project Cost		
		Pipeline Costs	Ancillary Costs	Total
1.0	Material	176,007	156,789	332,797
2.0	Labour and Construction	2,649,531	1,689,405	4,338,936
3.0	Outside Services	1,270,960	36,771	1,307,731
4.0	Land, Permits, Approvals and Consultations	37,507	0	37,507
5.0	Direct Overheads	336,925	104,050	440,976
6.0	Contingency	428,965	163,868	592,833
7.0	Sub-Total	4,899,896	2,150,884	7,050,779
8.0	Interest During Construction	150,601	1,390	151,990
9.0	Total Project Costs	5,050,496	2,152,273	7,202,770

2. The Project cost estimate set out in Table 1 above, includes a 10% contingency applied to all direct capital costs commensurate with the current design stage of the Project and related risks/uncertainties. This contingency amount has been calculated based on the risk profile of the Project and is consistent with contingency amounts calculated for other Phase 2 NGEP projects.
3. The cost estimate set out above is higher than the amount estimated in the

Company's original project proposal to the Government of Ontario (2019/2020) for funding under Phase 2 of the NGEF by approximately \$0.57 million (EB-2019-0255). This cost variance is attributed primarily to an increase in the residential and commercial customer forecasts driven by updated market research and field verification.

### Project Economics

4. As set out in Table 1 above, the total estimated cost of the Sandford Community Expansion Project is \$7.2 million (including both pipeline and ancillary facilities). These costs include materials, construction and labour, external costs, contingencies and interest during construction ("IDC").
5. An economic analysis has been completed in accordance with the OEB's recommendations in its E.B.O 188 Report of the Board on Natural Gas System Expansion ("E.B.O. 188"). A Discounted Cash Flow ("DCF") analysis for the Project is included at Attachment 2 to this Exhibit.
6. The DCF analysis for the Project has been prepared based on the Company's latest feasibility parameters (i.e., long-term debt rates, discount rates, tax rates, etc.), and includes a SES and funding to be obtained from Phase 2 of the Ontario Government's NGEF. Attachment 1 to this Exhibit shows the key inputs, parameters and assumptions used in completing the DCF analysis.
7. The Project time horizon is 40 years in accordance with E.B.O. 188 guidelines.

### *NGEF Funding*

8. On July 1, 2019, section 36.2 of the Act came into effect pursuant to the Access to

*Natural Gas Act, 2018*, which establishes a framework for the funding of natural gas expansion projects by natural gas ratepayers. *Ontario Regulation 24/19, Expansion of Natural Gas Distribution Systems* (“Regulation”) sets out projects that are eligible for financial support subject to receiving any necessary OEB approvals, the mechanism by which funding is collected from ratepayers and distributed to the project proponents. The Regulation also requires that rate-regulated natural gas distributors charge each of their customers \$1 per month (for each account that the customer has with the natural gas distributor) to provide funding for the eligible expansion projects. Schedule 2 of the Regulation establishes the Project as one to receive funding up to \$4,392,566.

9. The DCF analysis includes this \$4.4 million of funding, which is treated similarly to a contribution in aid of construction (“CIAC”). The total capital cost net of funding over the 10 year attachment horizon is \$2.8 million.

#### *System Expansion Surcharge*

10. To assist with the economic feasibility of the Project, Enbridge Gas intends to charge a SES of \$0.23 per m<sup>3</sup> to customers attaching to the Project for a term of 40 years. The proposed SES is consistent with the criteria and mechanism contemplated in Enbridge Gas’s EB-2020-0094 application for a harmonized SES:

- The SES is proposed for a community expansion project with a Profitability Index (“PI”) of less than 1.0; and
- The SES is proposed for a project providing first-time natural gas access to more than 50 potential customers.

11. As described below, the Project PI prior to inclusion of the proposed SES and NGEP funding is 0.25. The Project is expected to connect approximately 183 new customers to Enbridge Gas’s system.

### *Rate Stability Period*

12. Also consistent with the direction in the OEB's EB-2020-0094 Decision,<sup>1</sup> upon placing the Project into service, Enbridge Gas will apply a 10-year Rate Stability Period ("RSP") during which the Company will bear the risk of the Project customer attachment and capital expenditure forecasts. In its 2024 Rate Rebasing application (EB-2022-0200), Enbridge Gas has included the forecasted customer additions and capital cost of the Project as outlined in the Company's EB-2019-0255 submission for NGEP funding. At the next rebasing application after the ten-year RSP expires, Enbridge Gas will use actual revenues and actual capital costs of the Project to determine any revenue sufficiency or deficiency for rate-setting purposes. If the expiry of the ten-year RSP occurs during an incentive rate mechanism ("IRM") and not a rebasing year, any excess revenue or shortfall in rates would form part of the utility revenue that is subject to earnings sharing until the next rebasing, depending on the approved IRM framework at the time.

### *Economic Feasibility*

13. Detailed calculations of Project feasibility including the SES and NGEP funding are included at Attachment 2 to this Exhibit. Based on the forecast of costs and revenues before SES and NGEP funding, the Project has a PI of 0.25, which improves to 0.46 with the inclusion of the SES. The Company will require the NGEP funding to support the economic feasibility of the Project. After SES and NGEP funding, the Project currently has a net present value ("NPV") of \$0 and a PI of 1.0. .

14. The primary factors affecting the current estimated PI calculation as compared to the estimated PI in the Company's EB-2019-0255 submission include an increase in the capital cost estimate, and a reduction in forecasted large volume industrial customers

---

<sup>1</sup> EB-2020-0094 Decision and Order, November 5, 2020, pp. 8-9

partially offset by an increase in the residential and commercial customer forecast.

The estimates of Project NPV and PI are subject to change as the Project progresses through the design and construction phase. Any variances from forecasted Project capital cost or revenues, including variances in the customer attachment forecast for the Project, will be managed by Enbridge Gas during the RSP. The final actual PI will be determined using actual information and will be communicated at the next rebasing application after the expiry of the RSP.

## ENVIRONMENTAL MATTERS

### Environmental Report

1. Enbridge Gas retained WSP Canada Inc. (“WSP”) to undertake a route evaluation and environmental and socio-economic impact study, which included a cumulative effects assessment and Stage 1 Archaeological Assessment (“AA”), to select the Preferred Route (“PR”) for the Project. As part of the development of the study, Enbridge Gas and WSP implemented a consultation program to receive input from interested and potentially affected parties including Indigenous communities. The consultation program input was evaluated and integrated into the study. Mitigation measures designed to minimize environmental and community impacts resulting from construction and operation of the Project were also developed as part of the study.
2. The results of the study are documented in the Environmental Report (“ER”) entitled *Sandford Community Expansion Project: Environmental Report* included at Attachment 1 to this Exhibit. The ER conforms to the OEB’s Guidelines.
3. Enbridge Gas supports WSP findings.
4. The objective of the ER is to outline various environmental mitigation and protection measures for the construction and operation of the Project while meeting the intent of the OEB Guidelines. To meet this objective, the ER was prepared to:
  - Undertake a route evaluation process.
  - Identify a PR, that reduces potential environmental impacts.

- Complete a detailed review of environmental features along the PR and assess the potential environmental impacts of the Project on these features.
  - Establish mitigation and protective measures that may be used to minimize or eliminate potential environmental impacts of the project.
  - Develop and implement a consultation and engagement program to receive input from interested and potentially affected parties.
  - Identify any necessary supplemental studies, monitoring and contingency plans.
5. An initial Notice of Study Commencement for the Project was emailed to Indigenous communities on March 8, 2023. The Notice of Study Commencement was also emailed to the Ontario Pipeline Coordinating Committee (“OPCC”), and various federal, provincial, and municipal government agencies on March 8, 2023. Letters describing the Project and the environmental study process, providing a map showing the PR and alternative routes, information regarding the virtual open house and Project contact details were mailed to identified interest groups on March 10, 2023 (in addition to being sent by e-mail). The Notice of Project Commencement was published in The Uxbridge Cosmos on March 16, 2023 and March 23, 2023.
6. During the consultation process for development of the ER, Enbridge Gas and WSP received comments from the public, agencies, interest groups, municipal and elected officials, and Indigenous communities. Information pertaining to the input received can be found in Section 4.5 of the ER.

7. The ER identifies at least two areas along the Preliminary Preferred Route ("PPR") (and four for the Alternate Route ("AR")) where HDD installation methods are to be used. The PPR study area overlaps the Sandford Wetland Complex Provincially Significant Wetland ("PSW"), as well as several unevaluated wetlands. Mitigation measures associated with water crossings via HDD can be found in Section 6.0, Table 10 of the ER. The necessary permits will be obtained from the Lake Simcoe Region Conservation Authority ("LSRCA") prior to the start of construction. Measures to protect fish and fish habitat will also be implemented, it is anticipated that the conditions in the Fisheries and Oceans Canada ("DFO") and Enbridge Gas Inc. Agreement dated March 2022 will be met. If the conditions in the Fisheries and Oceans Canada ("DFO") and Enbridge Gas Inc. cannot be met, consultation with Fisheries and Oceans Canada ("DFO") will be warranted.
8. Enbridge Gas sent an email with a link to access the ER to OPCC members, Municipalities, and Conservation Authority, on June 1, 2023, with a request for comments by July 13, 2023. The ER was sent to indigenous communities on June 5<sup>th</sup>, 2023 with a request for comments. Enbridge Gas commits to addressing comments received from indigenous communities through out the entirety of the Project. All correspondence is set out in the consultation log set out at Attachment 2 to this Exhibit.

#### Routing

9. Enbridge Gas retained WSP to review the potential route for the Project using existing municipal right of way (where possible) and with consideration for environmental and socio-economic constraints. Details on the route evaluation and selection process can be found in Section 3.0 of the ER.

### Environmental Protection Plan

10. Construction of the Project will be conducted in accordance with Enbridge Gas's Construction and Maintenance Manual, the recommendations in the ER, and recommendations from permitting agencies. An Environmental Protection Plan ("EPP") will be developed for the Project prior to mobilization and construction. The EPP will incorporate recommended mitigation measures contained in the ER and those mitigation measures obtained from agency consultation for the environmental matters associated with the proposed works. These mitigation measures will be communicated to the construction contractor prior to the commencement of construction of the Project. A qualified Environmental Inspector or suitable representative will be available to assist the Construction Supervisor in seeing that mitigation measures identified in the EPP as well as requirements established by permitting agencies and any OEB conditions of approval are adhered to and that commitments made to the public, landowners and agencies are honored. The Environmental Inspector and Project Manager will also mitigate any unforeseen environmental circumstances that arise before, during and after construction.
11. Recommended mitigation measures for potential effects have been developed in the ER to address environmental and socio-economic features found along the PR. A summary of potential effects and recommended mitigation measures and protective measures can be found in Section 6.0, Table 10 of the ER.
12. Using the mitigation measures and monitoring and contingency plans found within the ER, EPP and additional mitigation measures provided by regulatory agencies through the permitting and approval process, construction of this Project will have

negligible impacts on the environment. No significant environmental or cumulative effects are anticipated from development of the Project.

#### Cultural Heritage Assessment

13. A Cultural Heritage Checklist was completed by WSP for the Project prior submission of this Application and it was recommended based on the checklist that a “Cultural Heritage Report: Existing Conditions and Preliminary Impact Assessment” be completed for the Project. A report is anticipated to be completed prior to the commencement of construction.

#### Archaeological Assessment

14. A Stage 1 AA was completed by WSP on May 3, 2023 and was submitted via an expedited review request on June 28, 2023. Depending on specific pipeline alignments along the preferred route, Stage 2 and Stage 3 archaeological assessments may be required. Any mitigation or recommendations for construction from the Stage 2 and 3 AA's will be outlined in the EPP for the Project.

### LAND MATTERS & AGREEMENTS

1. The Preferred Route ("PR") for the Project is summarized in Exhibit D, as well as in Section 3 of the ER at Attachment 1 to Exhibit F.
2. The PR and directly affected parcels (17) will require that Enbridge obtain municipal consent from the Region of Durham, and The Corporation of the Township of Uxbridge. There are 5 non-Right of Way ("ROW") parcels owned by the The Corporation of the Township of Uxbridge which may require a permanent easement.
3. Temporary working areas may be required along the PR where the road allowance is too narrow or confined to facilitate construction. These areas will be identified with the assistance of the contractor that will perform the construction. Agreements for temporary working rights will be negotiated where required.

### Authorizations and Permits Required

4. Enbridge Gas's preliminary work on the Project has identified the following potential required authorizations:

#### Federal

- Environment and Climate Change Canada; and
- Fisheries and Oceans Canada.

#### Provincial:

- Ontario Energy Board;
- Infrastructure Ontario;

- Ministry of Tourism, Culture and Sport;
- Ministry of Environment, Conservation and Parks;
- Ministry of Energy; and
- Lake Simcoe Region Conservation Authority.

Municipal:

- Regional Municipality of Durham (Sandford Road)
- Township of Uxbridge

Other:

- Indigenous engagement; and
- Landowner agreements.

5. Other authorizations, notifications, permits and/or approvals may be required in addition to those identified above.
6. Enbridge Gas will obtain all required permits, easements and temporary land use agreements if and as required for the route and location of the proposed facilities prior to the commencement of construction.
7. Attachment 1 to this Exhibit contains the standard form Temporary Land Use Agreement that will be provided to landowners for temporary working space requirements. This standard form Temporary Land Use Agreement is the same

agreement approved for use in Enbridge Gas's Haldimand Shores Community Expansion Project.<sup>1</sup>

8. Attachment 2 to this Exhibit contains the standard form Easement Agreement that will be provided to landowners. The standard form Easement Agreement is the same agreement approved for use in Enbridge Gas's Haldimand Shores Community Expansion Project.<sup>2</sup>

#### Landowner List

9. Attachment 3 to this Exhibit identifies the directly and indirectly impacted landowners. Indirectly impacted landowners are those landowners with property adjacent to the PR (for example, those bordering the municipal road allowance), where no land rights are required as part of the proposed Project. Directly impacted landowners are those landowners whose lands are directly impacted by the Project work and therefore are those from which the Company requires land rights for the proposed Project. Enbridge Gas will provide notice of this Application to all landowners listed in Attachment 3.

### INDIGENOUS<sup>1</sup> CONSULTATION

1. Enbridge Gas is committed to creating processes that support meaningful engagement with potentially affected Indigenous groups (First Nations and Métis). Enbridge Gas works to build an understanding of project related interests, ensure regulatory requirements are met, mitigate or avoid project-related impacts on Indigenous interests including rights, and provide mutually beneficial opportunities where possible.
2. Pursuant to the OEB's Guidelines, Enbridge Gas provided the Ontario Ministry of Energy ("MOE") with a description of the Project to determine if there are any duty to consult requirements and, if so, if the MOE would delegate the procedural aspects of the duty to consult to Enbridge Gas. This correspondence, dated December 1, 2022, is set out in Attachment 1 to this Exhibit.
3. Enbridge Gas received a letter ("Delegation Letter") from the MOE on February 10, 2023, indicating that the MOE had delegated the procedural aspects of consultation to Enbridge Gas for the Project. The Delegation Letter identified 9 Indigenous communities to be consulted. A copy of the Delegation Letter is provided in Attachment 2 to this Exhibit.
4. This Indigenous Consultation Report ("ICR") was provided to the MOE on the date of this filing. The MOE will review Enbridge Gas's consultation with Indigenous groups potentially affected by the Project and provide its decision as to whether Enbridge Gas' consultation has been sufficient. Upon receipt of the MOE's decision regarding the sufficiency of Indigenous consultation on the Project,

---

<sup>1</sup> Enbridge Gas has used the terms "Aboriginal" and "Indigenous" interchangeably in its application. "Indigenous" has the meaning assigned by the definition "aboriginal peoples of Canada" in subsection 35(2) of the *Constitution Act, 1982*.

Enbridge Gas will file it with the OEB. The sufficiency letter provided by the MOE will be included as Attachment 3 to this Exhibit.

#### Indigenous Engagement Program Objectives

5. The design of the Indigenous engagement program was based on adherence to the OEB's Guidelines and Enbridge Inc.'s company-wide *Indigenous Peoples Policy* ("Policy") (set out in Attachment 4 to this Exhibit). The Policy lays out key principles for establishing relationships with Indigenous groups, which include:
  - Recognizing the importance of the United Nations Declaration on the Rights of Indigenous Peoples (UNDRIP) in the context of existing Canadian law.
  - Recognizing the legal and constitutional rights possessed by Indigenous Peoples in Canada and the importance of the relationship between Indigenous Peoples and their traditional lands and resources.
  - Engaging early to achieve meaningful relationships with Indigenous groups by providing timely exchanges of information, understanding and addressing Indigenous project-specific concerns, and ensuring ongoing dialogue regarding its projects, their potential impacts and benefits.
  - Aligning Enbridge's interests with those of Indigenous communities through meaningful, direct Indigenous economic activity in projects corresponding to community capacity and project needs, where possible.
6. The Indigenous engagement program for the Project recognizes the rights of Indigenous groups and assists Enbridge Gas in engaging in meaningful dialogue

Filed: 2023-08-16  
EB-2023-0200

Page 3 of 4  
Plus Attachments

with potentially affected Indigenous groups to address any Project-related concerns and interests. It also assists Enbridge Gas in meeting the procedural aspects of consultation that may be required by the Crown and the OEB's Guidelines.

#### Overview of Indigenous Engagement Program Activities

7. Enbridge Gas conducts its Indigenous engagement generally through phone calls, in-person meetings, Project mail-outs, open houses and email communications. During these engagement activities, Enbridge Gas representatives will provide an overview of the Project, respond to questions and concerns, and address any interests or concerns expressed by Indigenous communities to appropriately mitigate any Project-related impacts. In order to accurately document Indigenous engagement activities and ensure follow-up, applicable supporting documents are tracked using a database. In addition, capacity funding is offered to assist Indigenous communities to meaningfully participate in engagement activities.

#### Ongoing Indigenous Engagement Activities

8. Enbridge Gas will continue to actively engage all identified Indigenous groups in meaningful ongoing dialogue concerning the Project and endeavor to meet with each Indigenous group, provided they are willing, for the purpose of exchanging information regarding the Project and to respond to inquiries in a timely manner. Enbridge Gas will hear and address concerns as is feasible and seek information on the exercise of, and potential impacts to, Aboriginal or treaty rights, traditional use in the Project area and how any potential Project-related impacts can be mitigated. Enbridge Gas also engages as appropriate with MOE to ensure they are kept apprised of rights assertions by communities.
9. Attachment 5 to this Exhibit contains a summary of Enbridge Gas's Indigenous

engagement activities for the Project. Attachment 6 to this Exhibit contains the ICR and associated attachments for the Project.

10. The information presented in Attachment 5 and Attachment 6 reflects Enbridge Gas's Indigenous engagement activities for the Project up to and including July 19, 2023; however, Enbridge Gas will continue to engage throughout the life of the Project to ensure any impacts on Aboriginal or treaty rights and interests are addressed, as appropriate.

---

Good Morning,

On August 16, 2023, Enbridge Gas Inc. (Enbridge Gas) filed an application with the Ontario Energy Board (OEB) for an order granting leave to construct natural gas pipelines in the community of Sandford, within the Township of Uxbridge.

On September 11, 2023, the OEB issued the Notice of Hearing (Notice) and the Letter of Direction for the proceeding. The OEB has directed Enbridge Gas to send the Notice to the clerk of the Township of Uxbridge.

Attached please find the OEB's Notice, along with Enbridge Gas' Application and the evidence (listed below) as filed with the OEB for Enbridge Gas' Sandford Community Expansion Project:

- Exhibit B-1-1 – Project Need
- Exhibit C-1-1 – Alternatives
- Exhibit D-1-1 – Proposed Project
- Exhibit E-1-1 – Cost & Economics
- Exhibit F-1-1 – Environmental Matters
- Exhibit G-1-1 – Land Requirements & Agreements
- Exhibit H-1-1 – Indigenous Consultation Matters

A complete paper copy of the evidence filed in this proceeding is available upon request, or alternatively available on the Enbridge Gas website (along with the Environmental Report) by accessing the link below and navigating to "Regulatory Information".

## Home / About Enbridge Gas / Projects

### Sandford Community Expansion Project

Sandford residents in the Township of Uxbridge will soon be able to benefit from access to the most affordable and reliable energy source for their homes and businesses.

The Sandford Community Expansion Project (the Project) will enable Enbridge Gas to provide natural gas to approximately 185 customers over a 10-year period.

The Project is funded by \$6.4 million from the Ontario government's natural gas expansion program. In addition to the system expansion surcharge (OS enbr185) to be paid over a term of 40 years for all customers served by the project.

There are two routes being considered for the project, these include the Preferred Route (PR) and the Alternative Route (AR). Both routes are located in the Township of Uxbridge. The PR and AR would begin at the intersection of 6th Concession Road and Balton Drive and would head north along the 6th Concession Road to Davis Drive. The PR would continue northwards along 6th Concession Road to Sandford Road, and then west along Sandford Road towards the community of Sandford. Alternatively, the AR would extend westwards along Davis Drive to Concession Road 4, and then north along Concession Road 4 towards the community of Sandford. Both the PR and AR include existing portions of Davis Drive and Bal Road. To accommodate the increased supply of natural gas, the project may also involve the building of a new distribution station, the location of which is to be determined.

[View larger map](#)

The study is being conducted in accordance with the Ontario Energy Board (OEB) Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Pipelines and Facilities in Ontario. The Guidelines. Once the study is complete, Enbridge Gas will apply to the OEB for approval to construct the project, otherwise identified as a Leave To Construct (LTC).

We're working in many project areas across Ontario as we prepare for future natural gas community expansion projects as part of the Ontario government's natural gas expansion program. Area residents may see our crews completing soil sampling, land surveying, test digs and holding land meetings, which are all activities that help inform our project routes and timelines for construction. This process is ongoing, and you may occasionally notice equipment in operation, and some noise. We apologize for any inconvenience this might cause. This work is being conducted by Enbridge Gas employees, or contractors working on our behalf. All employees and contractors carry identification at all times.

#### Regulatory information

The Sandford Community Expansion Project is regulated by the Ontario Energy Board (OEB), an independent government agency that regulates the electricity and natural gas sectors. After a public review and hearing, the OEB is able to approve our application. In this section, you can review all regulatory files about the project.

#### Environmental report

In accordance with the OEB's "Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario, 11th Edition 2016", Enbridge Gas has retained the services of WSP, an independent environmental consultant, to complete an environmental assessment for the proposed project.

The purpose of the environmental assessment is to identify any potential impacts of the proposed project on the social, economic and natural environments; identify local or provincial concerns regarding the proposed project; determine preferred routing of the pipeline segments; gather input from agencies, stakeholders, First Nations and Métis affected landowners, and the public. As well, it will recommend mitigation measures to limit impacts on the social, economic and natural environments. It is important to minimize potential negative impacts of the proposed natural gas distribution pipelines and associated facilities on the environment. The data, analysis and results of the environmental assessment will be detailed in an environmental report.

[Read the environmental report](#)

#### Leave to construct application

In Q3 2025, Enbridge Gas applied to the OEB for approval to construct approximately 10km of a collection or service and 2-km of natural gas pipeline to supply the community of Sandford in the Township of Uxbridge.

The leave to construct application is posted [here](#).

On Sept. 11, 2025, the OEB issued the [Notice of Hearing](#) for the project.
