Ontario Energy Board
Hydro One file # 2008-0272

Dear Sir

We are a seniors club and are very opposed to the increase in Transmission rates.

Many of us are on fixed incomes and do everything possible to decrease the cost of our hydro bills.

The increase of hydro rates on January 1, 2009 will be an added burden and to increase other charges is just too much for seniors or others on low incomes. At present many seniors are surviving below the poverty line. Increases may help others, but it causes seniors to have less for the necessities of life.

Sincerely,
Aline Charron - President
