Pollution Probe Letter on Confidentiality Request - Update**

Dear Ms. Marconi:

In accordance with Procedural Order No. 1, Pollution Probe filed a submission on October 5, 2023 related to the Enbridge request for confidentiality of certain information and on October 6, 2023 Enbridge filed a letter removing its request for confidential treatment of project related information in Exhibit E-1-1, except for the signature and initials of Waste Management's President. Pollution Probe submitted a letter related to Enbridge's amended request on October 11, 2023. In preparation for Interrogatories, Pollution Probe noticed that the signature and initials in E-1-1 noted by Enbridge were not actually confidential information redacted in the original version of E-1-1 Attachment 3 filed August 1, 2023 and such information is already available on the open public record under this docket. This appears to mean that nothing in E-1-1 should remain redacted given that all the E-1-1 information is available in an unredacted manner through various versions of the evidence filed by Enbridge.

Additionally, the Enbridge letter dated October 6th indicates that the updated E-1-1 was filed, although it does not appear to be accessible via RDS under this proceeding. Enbridge has provided alternative access until the document appears in the OEB RDS for this proceeding (apparently file size appears to be an issues and may require OEB Staff assistance). It is recommended that the fully unredacted version of E-1-1 be posted under this docket to provide a complete record.

Respectfully submitted on behalf of Pollution Probe.
