To Whom It May Concern: *25/1/08*

We wish to apply for Intervenor Status and legal costs to insure that we receive fair representation during the proceedings regarding the Hydro One Bruce to Milton proposal. Our land holdings include a designated environmentally sensitive area as determined by the Ministry of Natural Resources. As a business we have been diligent in our stewardship of the property and use of the surrounding property. A proposed hydro line through this area would negate our efforts to preserve the existing natural habitat.

Sincerely,

Steven Lindner  
Vice-President
