Toronto, Ontario M4P 1E4

For Our Grandchildren, a climate change activist group based in Peterborough county, which includes Selwyn township, has been actively opposing the gas pipeline expansion in Selwyn since it was announced. At that time I and other members submitted our comments to the OEB opposing the Selwyn Pipeline. We considered registering as an intervenor in the case but chose not to when we saw that Environmental Defense had already done so.

We have past experience as an intervenor at the OEB opposing the sale of our Local Distribution Company (PDI) to Hydro One. From that experience we learned that our organization does not have the knowledge or the resources to be effective as an intervenor.

I am writing on behalf of For Our Grandchildren to confirm that we have collaborated with Environmental Defense on this issue and have been relying on Environmental Defense to pursue this cause. It is important to us that Environmental Defense be provided a full and fair opportunity to participate and to provide evidence.
