Dear Ms. Nanninga:

**Re: EB-2023-0015 Enova Power Corp. Application for 2024 Rates**

The above referenced application is being processed by the Ontario Energy Board (OEB) by delegated authority, without a hearing. On December 1, 2023, Enova Power Corp. (Enova) was provided with a draft of the OEB's Decision and Rate Order and Tariff of Rates and Charges.

By letter dated December 7, 2023, Enova provided its comments on the draft, identifying that certain rate generator values do not match with the values set out in the draft Tariff. Enova noted that the issue affects both of its rate zones.

Specifically, for the Kitchener-Wilmot rate zone the following table sets out the values in the draft Tariff (which are incorrect) versus the values set out in the rate generator (which are correct). :

OEB staff appreciates the comments provided by Enova, and has confirmed that they are accurate. OEB staff has updated the tariff sheets so that the rates listed accord with the values shown in the rate generator model for each rate zone.

OEB staff has updated the following rates and charges for the Waterloo North rate zone's USL and Streetlighting rate class following an update to the evidence by Enova on December 13, 2023:

	<b>Before the update</b>	<b>After the update</b>
<b>Unmetered Scattered Load Service Classification</b>		
Service Charge (per connection) \$	11.70	11.20
Distribution Volumetric Rate \$/kWh	0.0179	0.0189
<b>Street Lighting Service Classification</b>		
Service Charge (per device) \$	0.38	0.40

A section discussing the changes above has been added to the Decision and Rate Order.

The OEB has now issued a final Decision and Rate Order, together with a final Tariff of Rates and Charges. Copies of these documents are enclosed with this letter.

Yours truly,
