

## **New Rate Information**

**October 2008**

**Residential Customers - Rate 1 (System customers)**

### **Natural gas prices have changed**

The Ontario Energy Board ("OEB") has approved a decrease to Enbridge Gas Distribution's Gas Supply Charge and an increase to the Delivery Charge effective October 1, 2008. For a typical residential customer, these changes will result in a decrease of approximately \$157 annually, excluding the Gas Cost Adjustment. The decrease is primarily due to lower North American natural gas prices. The effect on your bill will depend on how much gas you use.

### **Gas Supply Charge**

The Gas Supply Charge has decreased from 39.0121 cents per cubic metre (" $\text{¢/m}^3$ ") to 33.7551  $\text{¢/m}^3$ . This price is based on a forecast of market prices for the next 12 months. The forecast price is reviewed every three months and, if necessary, adjusted accordingly to reflect market changes. If our forecasts are over or under our actual costs, we reimburse or collect the difference from customers through gas cost adjustments.

There is a new Gas Cost Adjustment surcharge of 1.7008  $\text{¢/m}^3$  for the period October 1, 2008 through March 31, 2009. This surcharge is to recover the cost of gas we purchased and stored this spring and summer when prices were higher. This surcharge combined with the Gas Supply Charge results in a new total effective Gas Supply rate of 35.4559 cents per cubic metre.

Enbridge Gas Distribution does not make a profit on the cost of natural gas. The price we charge is the same as our cost to purchase natural gas.

### **Delivery Charge**

The Delivery Charge will increase by approximately \$4 per year for a typical customer due to higher costs to transport natural gas to Ontario.

### **Residential Rates**

Your current bill has been calculated for gas used from October 1, 2008 using the new approved rates as identified below. The annualized impact is based on a typical residential heating and water heating customer who uses 3,064 cubic metres per year.

**Gas Cost Adjustment**

The OEB has approved a new Gas Cost Adjustment surcharge of 1.5905  $\text{¢}/\text{m}^3$  for the period October 1, 2008 through March 31, 2009. This charge combined with the Gas Supply Charge results in a new total effective Gas Supply rate of 35.2989  $\text{¢}/\text{m}^3$ .

**Delivery Charge and Load Balancing Charges**

The Delivery Charge has decreased due to lower commodity-related costs that decrease the cost of gas losses on the storage and distribution systems. The Load Balancing Charge has gone up due to higher costs to transport natural gas to Ontario.
