Issues:

Pollution Probe represents a consumer interest related to Toronto Hydro's 2025-2029 Customer Incentive Application. This includes the \$5.9 billion investment plan proposal specifically intended to meet Toronto energy consumer's needs during this 5 year period of Energy Transition acceleration. Pollution Probe, its partners and constituents are located in the Toronto Hydro service territory and will be directly impacted by this proceeding.

Policy Interests:

Pollution Probe also represents a policy interest related to Toronto Hydro's 2025-2029 Customer Incentive Application and has been an active participant in the related OEB proceedings, consultations and working groups (e.g. DER Connections, RPPAG, etc.) related to the specific policy issued identified by Toronto Hydro in its Application (e.g. Energy Transition, Distributed Energy Resources, municipal Net Zero alignment, cost-effective energy storage/EV enablement, etc.). This Application and related complex policy considerations will only successfully deliver cost-effective and sustainable benefits to Toronto energy consumers if they are delivered in a collaborative and transparent manner aligned with the trajectory and pace of Energy Transition change over the period and beyond. Failure to achieve this alignment will restrict the Energy Transition, fail to meet consumer needs and could result in stranded assets and increased ratepayer costs.

Hearings:

Pollution Probe recommends the use of an efficient hybrid hearing approach for this proceeding. The OEB has successfully deployed this approach for large complex proceedings similar to this one.

Evidence:

At this time Pollution Probe does not intend to commission expert evidence. However, based on the issues outlined in the application Pollution Probe may provide relevant materials to the OEB during the proceeding to enhance the public record.

Coordination with Other Intervenor:

Pollution Probe has been an active and valuable participant in OEB proceedings and will continue to coordinate its activities with impacted consumers, intervenors and other parties as appropriate.

Cost Awards:

Pollution Probe respectfully requests your acceptance of this request to participate and confirmation that it will be eligible for its costs.

Pollution Probe is a not-for-profit charitable organization. We receive individual donations as well as funding for consumer and research projects. Without the prospect of an award of costs, Pollution Probe's ability to participate in this proceeding would not be possible.

Language Preference:
