BOMA-LPMA-WGSPG QUESTIONS TO PEG
FOR TECHNICAL CONFERENCE

1. Exhibit L, Tab 1, Schedule 2

a) Please provide revised Tables 8a, 8b, 9a, and 9b based on the period 1994 through 2003 instead of 1994 through 2004.

b) Please provide revised Tables 81, 8b, 9a, and 9b based on the period 1997 through 2004 instead of 1994 through 2004.

2. Exhibit L, Tab 1, Schedule 2, page 31 and Exhibit L1, Tab 1, Schedule 1, Question 5 (PEG's Reponses to Questions from Union Gas at the Nov. 14, 2007 meeting).

a) Please confirm that the 6 basis point increase in the X factor would be in addition to the overall X factor of 1.01 shown for Union under the COS price cap index and the 0.99 shown for Union under the GD price cap index.

b) Please confirm that the 6 basis point increase in the X factor would be in addition to the overall X factor of 2.08 shown for Enbridge under the COS revenue per customer cap and the 2.54 shown for Enbridge under the GD revenue per customer cap.

c) Other than the change in the sum of the common terms would there be any changes in the service group price cap indexes calculated as part of the ADJ factor?

d) Union is proposing a significant increase (above the price cap) in the monthly charge to the M2 rate class from \$16 per month to \$70 per month effective January 1, 2008 (Exhibit D, Tab 1, Appendix A, page 7, line 12 of Union's evidence). This increase is substantially greater than the rate redesign that took place between 2000 and 2007 for this rate class. Should some adjustment be made to the X factor or the ADJ factor specific to this rate class to reflect this significant increase in the fixed component for this rate class? If so, what should the adjustment be given Union's rate proposal for 2008?
