**EB-2022-0335 Enbridge IRP Pilots
Pollution Probe Comments on Abeyance Request**

Dear Ms. Marconi:

Pollution Probe is in receipt of Enbridge's correspondence dated February 29, 2024 for the above-noted proceeding requesting that the IRP Pilot proceeding remain in abeyance. As the OEB is aware, the OEB Decision in EB-202-0091 issued July 22, 2021, the OEB order Enbridge to develop and implement two IRP Pilots prior to the end of 2022. The Pilot application was filed by Enbridge July 19, 2023 and was placed in temporary Abeyance November 10, 2023. There have been no tangible IRP results since the IRP Decision and related Framework was put in place in 2021 and there is agreement that more is needed.

Pollution Probe is unaware of any valid reason why this proceeding should remain in Abeyance. Pollution Probe recommends that the OEB reject the request for the ongoing Abeyance and issue a procedural order to move this process forward in 2024. Further delay without a plan to get IRP on track is not recommended.

Respectfully submitted on behalf of Pollution Probe.
