As a single income household it's becoming increasingly difficult to manage all the costs of running a home in Ontario Canada. I've done everything to increase my home efficiency to save money. A increase would literally cancel out any savings I've seen on my Bill's. I cannot afford anymore increases and deeply concerned for the future and how will I be able to retire in years to come with all the financial increases.

Hopefully sooner then later will phase out natural gas supply and dependence on fossil fuels and focus globally on renewable energy.

I hope an increase will not be approved.
