

Annual Filing of Frequent Intervenor

Intervenor Name:

Industrial Gas Users Association (IGUA)

Mandate and Objectives:

IGUA had become the recognized voice representing the industrial user of natural gas before regulatory boards and governments at both the provincial and national levels. IGUA's mission is to be the voice of our members within the natural gas industry through intervention, advocacy, and partnerships.

Membership of the Intervenor and Constituency Represented:

IGUA is an association of industrial companies located in the Canadian provinces of Ontario and Québec, who use natural gas in their industrial operations. IGUA was first organized in 1973 and it provides a coordinated and effective public policy and regulatory voice for those industrial firms depending on natural gas as a fuel or feedstock.

Programs or Activities Carried Out by the Intervenor:

IGUA has become the recognized voice representing the industrial user of natural gas before regulatory boards and governments at both the provincial and national levels. Through regulatory intervention, government advocacy, marketing, promotion, partnerships, education and outreach, IGUA successfully represents industrial gas users.

Governance Structure:

The Association's activities are guided by a 15 member Board of Directors, constituted to assure that each industrial sector and geographic region is represented. The Board of Directors has regularly scheduled meetings at least six times each year. A full time President and other staff are based in Ottawa. The IGUA Board has established caucuses dedicated to providing direction to IGUA Staff and external advisors in each of Ontario and Quebec.
