Dear Ms. Marconi,

RE: EB-2022-0325 – London Property Management Association Clarifying Questions on Hydro One Background Report

In preparation for the technical conference, the London Property Management Association (“LPMA”) has the following clarifying questions on the HONI Background Report.

Issue 4

1. Page 6, lines 21-26

- a) Is the “reliability risk” noted here related to the DP that is out of service for the month or to the DP that has the additional load transferred to it for the month?
- b) Is there additional wear and tear on the DP that has had the additional load transferred to it for an extended period such as a month?

2. Page 2, lines 11-15

- a) In a typical year, how many eligible double peak events/planned outages does Hydro One have?
- b) What is the typical length of a planned outage, or what is a range in days for a typical planned outage?
- c) Out of the number of planned outages from part (a), approximately how many of the outages were extended to be a calendar month at the request of the LDC?

3. Section 1.4

Which, if any, of the four options provided does Hydro One believe is the best option?

Yours very truly,

Randy Aiken
