**EB-2024-0067 - Enbridge 2024 Gas Supply Plan
Pollution Probe Correspondence**

Dear Ms. Marconi:

Pollution Probe is in receipt of the OEB's notice dated April 15, 2024 initiating a Consultation to Review the 2024 Annual Update to the Five-Year Natural Gas Supply Plan of Enbridge Gas Inc. (Enbridge). This notice informed stakeholders that a Stakeholder Conference is scheduled for June 10-11. Pollution Probe is also in receipt of a letter from Enbridge dated April 17, 2024 indicating that June 10-11 is a conflict for Enbridge and suggesting June 24-25 as an alternative. Pollution Probe assumes that Enbridge's conflict relates to one or more employees that would not be available on June 10-11. The purpose of the Stakeholder Conference is to provide responses to written questions submitted by stakeholders by May 28, 2024.

June 24-25 poses a schedule conflict for Pollution Probe and Pollution Probe recommends that the OEB consider the following options.

Option 1: proceed with June 10-11 – Not Recommended

Option 2: proceed with June 24-25 – Not recommended

Option 3: Select a date between June 12 and June 20 (for example June 17-18)

Option 4: Enbridge provides written responses to questions submitted and the OEB solicit stakeholders following receipt of the responses on whether a Stakeholder Conference is required. - Recommended

Respectfully submitted on behalf of Pollution Probe.
