

Re: uTrack Energy (uTrack)
Application for a Unit Sub-Metering Licence
File: EB-2024-0122

1. Section 9(a): Corporate Organization:

Please submit a corporate organization chart that outlines the applicant, its parent, and any associated affiliates of the applicant.

Please find the attachment of the revised organization chart highlighting Edgecom Energy as the parent company.

2. Section 13(b): Compliance with Legal and Regulatory Obligations:

The applicant states that its “application is for a transfer of licence from the parent company, Edgecom Energy and is already providing these services.”

Does Edgecom Energy intend on carrying out unit sub-metering services in the future? If yes, please explain what the ‘transfer of licence’ means.

If no, Edgecom Energy is required to submit a request to cancel its unit sub-metering licence (ES-2020-0099) to the Office of the Registrar and include a reason for the cancellation.

No Edgecom Energy does not want to carry out unit sub metering services, it would like to transfer it to uTrack Energy a sister company to Edgecom Energy. A request to transfer and cancel the license has been sent to the Office of the Registrar at Registrar@oeb.ca.

Section 57(c.1) of the Ontario Energy Board Act, 1998 states that no person is permitted to engage in unit sub-metering without a licence.

According to section 13(b), the applicant states that it is already providing unit sub-metering services. How long has uTrack Energy been engaging in unit sub-metering activities without a licence? Please indicate when the applicant had begun engaging in unit sub-metering activities.

To clarify the statement in section 13(b), uTrack Energy Inc. has not performed any unit sub-metering activities as an entity. uTrack was originally only a division under Edgecom Energy that was in charge of unit sub-metering, but has recently incorporated, hence the license transfer. uTrack division is still operating unit sub-metering and billing under the Edgecom Energy name.

We plan on transferring everything from Edgecom Energy to uTrack Energy Inc., such as customers, billing, etc once the license is transferred.
