Dear Mr. Elson:

**Re: Enbridge Gas Inc. (Enbridge Gas) 2024 Rebasing Application, Phase 1  
Environmental Defence Letter re Extra Length Charge  
Ontario Energy Board (OEB) File Number EB-2022-0200**

The OEB received your letter of April 22, 2024, on behalf of Environmental Defence, regarding “potential non-compliance with the OEB’s orders in this case with respect to the extra length charge”, as well as Enbridge Gas’s response of April 26, 2024 and your follow-up of April 29, 2024.

We thank you for bringing this matter to our attention but in our view there is no need for the OEB to intervene. It would appear that Enbridge Gas’s approach to implementing the updated extra length charge (ELC) is consistent with the OEB’s orders. While the December 21, 2023 Decision and Order said that January 1, 2024 would be the effective date for new rates, including the ELC, it also said on page 139 that “Enbridge Gas’s current approved rates as established in EB-2023-0330 will continue to apply on and after January 1, 2024, on an interim basis, until the rates approved in Phase 1 of this proceeding are implemented.” Moreover, the Phase 1 rate order, issued April 11, 2024, specified that Rider G (which includes the updated ELC) was effective May 1, 2024.

Yours truly,

Nancy Marconi  
Registrar
