Attn: Kirsten Walli, Board Secretary

Dear Sirs/Mesdames:

Re: File Number: EB-2008-0288
Triple Whisky Farms Limited – Union Gas Pipeline

Further to Procedural Order No. 1 dated October 8, 2008, we are writing in order to make the following requests for information:

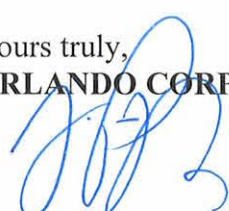

1. Are final working drawings available for the installation of the gas pipeline along the Fifth Line? If yes, please provide a copy. If not, please provide most recent up-to-date drawings available.
2. Will this gas service be made available to property owners on Fifth Line and will they be permitted to hook into this service in the future?
3. Does the Applicant have any reports, studies and/or correspondence from the Region of Halton and/or the Town of Milton regarding the impact that the location and elevation of this gas line will have on the future servicing (for storm sewers, sanitary and water mains) to be installed in the Fifth Line? If so, please provide a copy of any such reports, studies and/or correspondence.
4. Does the Applicant have any information regarding the proposed and/or final Master Servicing Plan and road elevations for the Fifth Line as proposed by the Region of Halton and/or the Town of Milton as may be applicable? If yes, please provide all such information.

5. Does the Applicant have any reports, studies and/or correspondence regarding the applicable design standards for the installation of a gas main under an arterial road crossing? If yes, please provide all such information. If no, does the Applicant have any information regarding any load restrictions or design standards for vehicular access on the Fifth Line as a result of the installation of the gas main.
6. Does the Applicant have any reports, studies and/or correspondence regarding the applicable design standards for the installation of a gas main under the watercourse crossing the Fifth Line? If yes, please provide all such information.
7. Does the Applicant have any reports, studies and/or correspondence regarding the applicable design standards for the installation of a gas main under the train tracks crossing the Fifth Line? If yes, please provide all such information.
8. Can the Applicant provide an estimate of the anticipated cost to deviate the elevation of the gas line at a later date in the event the current location of the gas line interferes with the hook up of other municipal services (i.e. sanitary, storm and/or water) on the Fifth Line?
9. Does the Applicant have any issues with agreeing to deviate the elevation of the gas line in the future in the event the gas line does interfere with the Intervenor's hook up to municipal services located with the Fifth Line? If yes, what are those issues?

If you have any questions, please do not hesitate to contact the undersigned.

Yours truly,
ORLANDO CORPORATION
