HYDRO ONE NETWORKS INC.

Application for the extension of the interim distribution licence issued to operate the electricity distribution system in the Township of Chapleau.

CHAPLEAU PUBLIC UTILITIES CORPORATION

Application for the extension of the electricity distribution licence

BY DELEGATION, BEFORE: Brian Hewson
Vice President,
Consumer Protection & Industry Performance

May 16, 2024

DECISION AND ORDER

Hydro One Networks Inc. (Hydro One) holds an interim electricity distribution licence issued by the Ontario Energy Board (OEB) under section 59(2) of the *Ontario Energy Board Act, 1998* (OEB Act), under which Hydro One has possession and control of the electricity distribution system owned and operated by Chapleau Public Utilities Corporation (CPUC). The interim licence (ED-2023-0144) was first issued by the OEB on May 23, 2023, and its term has since been amended and extended. CPUC's current electricity distribution licence (ED-2002-0528) was issued on December 18, 2003, and its term was extended to May 20, 2024, to align with the term of the interim licence (ED-2023-0144) issued to Hydro One.

On May 10, 2024, Hydro One and CPUC submitted a joint request, to the OEB, to extend the term of the interim licence (ED-2023-0144) of Hydro One and the electricity distribution licence (ED-2002-0528) of CPUC to October 18, 2025. This is to align with the expiry of the OEB's approval, in proceeding EB-2023-0328, where CPUC was granted leave to sell its distribution system assets to Hydro One. The applicants have stated that they are in the process of finalizing the sale of the distribution system assets and expect it to be completed prior to the expiry of the OEB's approval in the above-mentioned proceeding. Both licences provide that the term may be extended by the OEB.

The OEB is satisfied that Hydro One's management and operation of the distribution system supplying the Township of Chapleau will help ensure the continued reliability of supply to consumers in that community. Further, section 57 of the OEB Act provides that no person shall own or operate a distribution system unless licensed to do so.

The OEB finds it necessary and in the public interest to extend the term of Hydro One's interim licence (ED-2023-0144) to ensure the continuity of reliable electricity supply to consumers in the Township of Chapleau. Also, the OEB finds it appropriate to extend the term of the electricity distribution licence of CPUC in light of the ongoing process regarding the proposed sale of CPUC's distribution system assets to Hydro One. The issuance of this extension of CPUC's electricity distribution licence has no impact on the conditions set out in the ED-2023-0144 interim licence issued to Hydro One, including the requirement that CPUC surrender possession and control of its electricity distribution business.

IT IS ORDERED THAT:

1. The term of the interim electricity distribution licence issued to Hydro One, ED-2023-0144, is extended to October 18, 2025. The interim electricity distribution licence set out in Appendix A, is effective as of May 16, 2024. All other conditions of licence ED-2023-0144 remain unchanged.
2. The electricity distribution licence issued to CPUC, ED-2002-0528, is amended by extending the term of the licence to October 18, 2025. All other conditions of licence ED-2002-0528 remain unchanged.
3. Hydro One shall:
 - a. Continue to remain in possession and control of the electricity distribution system owned and operated by CPUC and continue to comply with the provisions of the interim licence set out in Appendix A.
 - b. Continue to collect revenue from customers within the service area of CPUC based on the rates and charges set out in the most current Schedule of Rates and Charges applicable to CPUC.
 - c. Record revenues collected from customers within the service area of CPUC and the costs of operation and maintenance of the system in a deferral account under the Uniform System of Accounts.
4. CPUC shall:
 - a. Continue to surrender possession and control of its distribution assets to Hydro One. CPUC will not be entitled to any compensation from the Crown, the OEB or any person for being required to surrender possession and control of its distribution assets and business.
5. In terms of the continuation of transfer of possession and control of the CPUC distribution system to Hydro One, both Hydro One and CPUC will ensure public, system and employee safety.

APPENDIX A

MARKET POWER MITIGATION REBATES

1. Definitions and Interpretations

In this Licence

“embedded distributor” means a distributor who is not a market participant and to whom a host distributor distributes electricity;

“embedded generator” means a generator who is not a market participant and whose generation facility is connected to a distribution system of a distributor, but does not include a generator who consumes more electricity than it generates;

“host distributor” means a distributor who is a market participant and who distributes electricity to another distributor who is not a market participant.

In this Licence, a reference to the payment of a rebate amount by the IESO includes interim payments made by the IESO.

2. Information Given to IESO

- a Prior to the payment of a rebate amount by the IESO to a distributor, the distributor shall provide the IESO, in the form specified by the IESO and before the expiry of the period specified by the IESO, with information in respect of the volumes of electricity withdrawn by the distributor from the IESO-controlled grid during the rebate period and distributed by the distributor in the distributor's service area to:
 - i consumers served by a retailer where a service transaction request as defined in the Retail Settlement Code has been implemented; and
 - ii consumers other than consumers referred to in clause (i) who are not receiving the fixed price under sections 79.4, 79.5 and 79.16 of the *Ontario Energy Board Act, 1998*.
- b Prior to the payment of a rebate amount by the IESO to a distributor which relates to electricity consumed in the service area of an embedded distributor, the embedded distributor shall provide the host distributor, in the form specified by the IESO and before the expiry of the period specified in the Retail Settlement Code, with the volumes of electricity distributed during the rebate period by the embedded distributor's host distributor to the embedded distributor net of any electricity distributed to the embedded distributor which is attributable to embedded generation and distributed by the embedded distributor in the embedded distributor's service area to:
 - i consumers served by a retailer where a service transaction request as defined in the Retail Settlement Code has been implemented; and
 - ii consumers other than consumers referred to in clause (i) who are not receiving the fixed price under sections 79.4, 79.5 and 79.16 of the *Ontario Energy Board Act, 1998*.

- c Prior to the payment of a rebate amount by the IESO to a distributor which relates to electricity consumed in the service area of an embedded distributor, the host distributor shall provide the IESO, in the form specified by the IESO and before the expiry of the period specified by the IESO, with the information provided to the host distributor by the embedded distributor in accordance with section 2.

The IESO may issue instructions or directions providing for any information to be given under this section. The IESO shall rely on the information provided to it by distributors and there shall be no opportunity to correct any such information or provide any additional information and all amounts paid shall be final and binding and not subject to any adjustment.

For the purposes of attributing electricity distributed to an embedded distributor to embedded generation, the volume of electricity distributed by a host distributor to an embedded distributor shall be deemed to consist of electricity withdrawn from the IESO-controlled grid or supplied to the host distributor by an embedded generator in the same proportion as the total volume of electricity withdrawn from the IESO-controlled grid by the distributor in the rebate period bears to the total volume of electricity supplied to the distributor by embedded generators during the rebate period.

3. Pass Through of Rebate

A distributor shall promptly pass through, with the next regular bill or settlement statement after the rebate amount is received, any rebate received from the IESO, together with interest at the Prime Rate, calculated and accrued daily, on such amount from the date of receipt, to:

- b consumers who are not receiving the fixed price under sections 79.4, 79.5 and 79.16 of the *Ontario Energy Board Act, 1998* and who are not served by a retailer where a service transaction request as defined in the Retail Settlement Code has been implemented; and
- c embedded distributors to whom the distributor distributes electricity.

The amounts paid out to the recipients listed above shall be based on energy consumed and calculated in accordance with the rules set out in the Retail Settlement Code. These payments may be made by way of set off at the option of the distributor.

If requested in writing by OPGI, the distributor shall ensure that all rebates are identified as coming from OPGI in the following form on or with each applicable bill or settlement statement:

"ONTARIO POWER GENERATION INC. rebate"

Any rebate amount which cannot be distributed as provided above or which is returned by a retailer to the distributor in accordance with its licence shall be promptly returned to the host distributor or IESO as applicable, together with interest at the Prime Rate, calculated and accrued daily, on such amount from the date of receipt.

Nothing shall preclude an agreement whereby a consumer assigns the benefit of a rebate payment to a retailer or another party.

Pending pass-through or return to the IESO of any rebate received, the distributor shall hold the funds received in trust for the beneficiaries thereof in a segregated account.
