Rate Class 16	No

Revision:

**Sheet 3 - 2007 Board-Approved Tariff of Rates and Charges - May 1, 2007**

FOR OEB STAFF USE ONLY

**Residential**

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation, and where a small business establishment exists in addition to a dwelling within one of the aforementioned dwelling units. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, or triplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building up to three units also qualify as residential customers. All customers are single-phase.

**General Service Less Than 50 kW**

This classification applies to a non residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW.

**General Service 50 to 4,999 kW**

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes over the past 12 months is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW.

**Unmetered Scattered Load**

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption.

**Sentinel Lighting**

This classification refers to all services supported to supply sentinel lighting equipment.

**Street Lighting**

This classification applies to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of transportation and private roadway lighting, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved OEB street lighting load shape template.

## Tariff OF RATES AND CHARGES

Effective July 1, 2007\*

(\*Except as otherwise noted)

**This schedule supersedes and replaces all previously approved schedules of Rates, Charges, and Loss Factors**

0

FOR OEB STAFF USE ONLY

### Residential

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation, and where a small business establishment exists in addition to a dwelling within one of the aforementioned dwelling units. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, or triplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building up to three units also qualify as residential customers. All customers are single-phase.

### General Service Less Than 50 kW

This classification applies to a non residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW.

### General Service 50 to 4,999 kW

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes over the past 12 months is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW.

### Unmetered Scattered Load

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption.

### Sentinel Lighting

This classification refers to all services supported to supply sentinel lighting equipment.

### Street Lighting

This classification applies to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of transportation and private roadway lighting, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved OEB street lighting load shape template.
