Re: EB-2024-0111 – Enbridge Gas Inc. (EGI) 2024 Rebasing and IRM – Phase 2.

**Industrial Gas Users Association (IGUA) Submission Comment on Environmental
Defence Evidence Proposal.**

We have reviewed with IGUA the evidence proposals from Environmental Defence and Environmental Defence/Green Energy Coalition, both as described in Mr. Elson's associated letters to the Board filed yesterday.

IGUA has an interest in the topics reflected in these two proposals, including in particular;

- i. potential incentive mechanism features which consider energy transition risk mitigation;
- ii. highest and best uses for Energy Transition Technology Fund ratepayer funding;
- iii. the appropriateness of EGI's proposed low carbon gas procurement program parameters; and
- iv. EGI's response to the Phase 1 direction regarding system pruning and integrated resource planning considerations in light of energy transition concerns.

On behalf of customers who will ultimately be paying the costs of this proceeding, including the costs that would arise from these expert evidence proposals, IGUA supports the proposals to bring forward such expert evidence and encourages the Board to accept them. Whether IGUA agrees with the

positions of these experts or not remains to be seen once those positions are articulated, but IGUA does agree that the topics are important ones that should be discussed.

Yours truly,

Ian A. Mondrow
