IN THE MATTER OF the *Ontario Energy Board Act, 1998*;

AND IN THE MATTER OF an Application by Hydro One pursuant to s. 97 of the Act for an Order granting approval of the forms of land use agreements offered or to be offered to affected landowners.

1. The Applicant is Hydro One, a subsidiary of Hydro One Inc. The Applicant is an Ontario corporation with its head office in the City of Toronto. Hydro One carries on the business, among other things, of owning and operating transmission facilities within Ontario.
2. Hydro One hereby applies to the OEB pursuant to s. 92 of the Act for an Order or Orders granting leave to construct a 230 kV double-circuit transmission line from Lambton TS, connecting to Wallaceburg TS and terminating at Chatham SS in the West of London area. The approximate length of the transmission line facilities is 64 km.
3. These facilities are required to increase long-term transmission supply capacity to the West of London area as recommended by the IESO in their report entitled the “*Need for Bulk Transmission Reinforcements West of London*”. That IESO Report is provided as **Attachment 2** in **Exhibit H, Tab 1, Schedule 1**. The Project has

1 been identified as a non-discretionary development project in **Exhibit B, Tab 4,**
2 **Schedule 1.**

3

4 4. In accordance with s. 96.1 of the Act and Order in Council 876/2022, the Lieutenant
5 Governor in Council declared that the SCTL Project is a priority project. In
6 accordance with Order in Council 875/2022, the Minister of Energy directed Hydro
7 One to develop and seek all necessary approvals for the construction of the SCTL
8 Project. Copies of the Orders in Council and the Minister of Energy's Directive are
9 found at **Exhibit B, Tab 3, Schedule 1, Attachments 1 to 3.**

10

11 5. Hydro One is committed to working with Indigenous governments and communities
12 in a spirit of cooperation and shared responsibility. The company acknowledges
13 that Indigenous governments and communities have unique historic and cultural
14 relationships with their land and a unique knowledge of the natural environment.
15 Forging meaningful relationships with Indigenous governments and communities
16 based upon trust, confidence, and accountability is vital to advancing reconciliation
17 and achieving Hydro One's corporate objectives. Hydro One has been engaging
18 with Indigenous governments and communities since early in the development
19 process and will continue that engagement and involvement in project decisions
20 throughout the life cycle of the Project. Additionally, Hydro One has, and will
21 continue to throughout the life cycle of the Project, engage in economic
22 participation negotiations with impacted Indigenous communities including
23 employment, training, contracting and equity participation in the Project. Hydro
24 One expects that after completion of the SCTL Project, ownership of the applied-
25 for transmission line facilities will be transferred and owned by a limited partnership
26 that will include ownership interests held by impacted First Nations. As of the time
27 of this Application, the limited partnership has not yet been finalized. As
28 negotiations are ongoing, Hydro One is not currently able to provide commercial
29 details. However, those details will be provided to the OEB once the limited
30 partnership is formed and through subsequent transmission licence and asset

1 transfer applications made to the OEB. In light of these circumstances, Hydro One
2 is proposing costs associated with the transmission line facilities are accounted for
3 in the OEB-approved ATP regulatory account¹ and not form part of Hydro One's
4 rate base. For reference purposes, further information on the ATP regulatory
5 account is provided at **Exhibit B, Tab 10, Schedule 1**. Hydro One is not
6 anticipating the limited partnership to impact the Project cost estimates provided
7 at **Exhibit B, Tab 7, Schedule 1**.

8
9 6. The 230 kV conductor selected by Hydro One to complete the Project has been
10 predicated on Hydro One's commitment to minimize transmission line losses
11 where feasible. Further information regarding the transmission line loss analysis
12 for this Project is provided in **Exhibit B, Tab 5, Schedule 1**.

13
14 7. An overview map of this area is provided in **Exhibit B, Tab 2, Schedule 1**,
15 **Attachment 1**, and schematic diagrams of the proposed Project can be found at
16 **Exhibit B, Tab 2, Schedule 1, Attachments 2 to 4**.

17
18 8. New permanent land rights on properties between Lambton TS and Chatham SS
19 will be required to accommodate the proposed transmission facilities. Temporary
20 rights for construction purposes will also be required at specific locations along the
21 corridor. Further information regarding the real estate needs to complete this
22 project are provided in **Exhibit E, Tab 1, Schedule 1**.

23
24 9. The Project is subject to the applicable Class EA process in accordance with the
25 *Ontario Environmental Assessment Act*. On February 5, 2024, Hydro One filed the
26 Final ESR and Statement of Completion with the MECP.

27
28 10. The proposed in-service date for the Project is December 2028, assuming a
29 construction commencement date of March 2025 and an OEB approval of this

¹ EB-2021-0169

1 Application by December 2024. A project schedule is provided at **Exhibit B, Tab**
2 **11, Schedule 1.**

3

4 11. The IESO has completed a Draft SIA. The final version is expected from the IESO
5 shortly and will be filed upon receipt. The Draft SIA concludes that the Project is
6 expected to have no material adverse impact on the reliability of the integrated
7 power system and recommends that a *Notification of Conditional Approval for*
8 *Connection* be issued. The IESO's Draft SIA is provided as **Exhibit F, Tab 1,**
9 **Schedule 1, Attachment 1.**

10

11 12. Hydro One has completed a Draft CIA in accordance with Hydro One's connection
12 procedures. A copy of the Draft CIA is provided as **Exhibit G, Tab 1, Schedule**
13 **1, Attachment 1.** The final version is expected to be completed shortly and will be
14 filed upon completion. Hydro One will fulfill all requirements of the SIA and the
15 CIA, and will obtain all necessary approvals, permits, licences, certificates,
16 agreements, and rights required to construct the Project.

17

18 13. The forecast total capital cost of the Project transmission facilities is \$469 million².
19 Details pertaining to these costs are provided at **Exhibit B, Tab 7, Schedule 1.**

20

21 14. The Project will enable up to 450 MW of supply capacity into the West of Chatham
22 area. Subsequently, the expected rate impact associated with the Project (using
23 2024 OEB-approved uniform transmission rates as filed in **Exhibit B, Tab 9,**
24 **Schedule 1)** is a \$0.14/month decrease on a typical residential customer's bill
25 under RPP.

26

27 15. This Application is also seeking approval of the forms of the agreement offered or
28 to be offered to affected landowners, pursuant to s. 97 of the Act. The majority of
29 these agreements are in the same form as previously approved in prior Hydro

² There will be an additional \$2.9M of OMA removal costs associated with constructing this Project.

1 One's leave to construct proceedings. Any agreements that have not been
2 previously approved by the OEB or have been altered from their last approval have
3 all been explicitly identified in the Application. The forms of the applied-for
4 agreements are found as attachments to **Exhibit E, Tab 1, Schedule 1**.

5

6 16. The Application is supported by written evidence which includes details of the
7 Applicant's proposal for the transmission line. The written evidence is prefiled and
8 may be amended from time to time prior to the Board's final decision on this
9 Application.

10

11 17. Based on the foregoing, and the information provided in the prefiled evidence,
12 Hydro One submits that the Project is in the public interest. The Project meets the
13 need of the transmission system and improves quality of service and reliability and
14 reduces the price paid by ratepayers.

15

16 18. Hydro One consents to the conditions outlined in the OEB's standard conditions of
17 approval for electricity transmission leave to construct applications³ for this Project.

18

19 19. Hydro One requests that a copy of all documents filed with the Board be served

Hydro One Networks Inc. has applied for approval to build a high-voltage transmission line in Southwestern Ontario

The application seeks:

- Permission for Hydro One Networks Inc. (HONI) to construct a 230 kilovolt double-circuit transmission line from the Lambton Transformer Station, connecting to the Wallaceburg Transformer Station and ending at the Chatham Switching Station. The approximate length of the transmission line facilities is 64 km.
- Permission for HONI to convert the Wallaceburg Transformer Station from a 115 kilovolt supply to a 230 kilovolt supply to repurpose the existing 115 kV transmission supply line corridor for the new transmission line.
- Approval to complete any associated any station facility expansions or upgrades required at the terminal stations.
- Approval of the forms of agreement that HONI will offer affected landowners.

The OEB hearing is not the only approval process required before a line is built.

Environmental issues, or issues related to the Crown's duty to consult Indigenous peoples, are not part of the OEB's review unless there is a direct impact on price and the reliability and quality of electricity service.

A map of the proposed route for the transmission line is provided on the right:
