Dear Nancy Marconi:

Re: Enbridge Gas Inc. (Enbridge Gas, or the Company)
EB-2024-0111 - 2024 Rebasing and IRM – Technical Conference Panels

In Procedural Order No. 2, the OEB scheduled a Technical Conference to be held starting on July 22 and running until July 23, if necessary. The OEB also directed OEB staff and intervenors to file with the OEB, and provide to Enbridge Gas, a description of the specific areas they will focus on at the Technical Conference, and time estimates by July 17.

As indicated in Enbridge Gas's letter of July 8, in order to assist parties in planning for the Technical Conference and in providing time estimates and areas of focus, Enbridge Gas writes to provide details about its plans for witness panels. In the attached table, Enbridge Gas sets out its proposed approach for Technical Conference witness panels, including the order of appearance, grouping of evidence and participation of experts. Enbridge Gas has grouped related topics and evidence. The specific Company witnesses for each topic are still being determined.

Enbridge Gas would note that certain individuals it expects to have appear as witnesses at the Technical Conference are unavailable from July 24 until early August. Enbridge Gas has ordered the panels in its proposed approach to accommodate witness availability and would request that the OEB maintain the panel order set out in the attached table.

For planning purposes, it will be helpful for Enbridge Gas to understand the time estimates and areas of focus for each party's questions of each witness panel. It will also be helpful to know whether each party has questions for the experts associated with the witness panels, so that a determination can be made about whether attendance by each expert is needed. On that subject, parties are requested to indicate if there are only a small number of questions for a particular expert that could be answered in writing following the technical conference.

Page 2

Enbridge Gas does not plan to put forward a witness panel for the Exhibit List and Administration exhibits (1.1.1 and 1.3.1 respectively). If witnesses are required for these areas, please advise.

Should you have any questions, please let us know.

Sincerely,

Joel Denomy
