1 8 Rate Design

2 This Exhibit documents the calculation of Welland Hydro-Electric System Corp.'s ("WHESC") proposed 3 distribution rates by rate class for the 2025 Test Year, based on the rate design as proposed in this Exhibit.

WHESC has determined its total Service Revenue Requirement to be \$13,845,188. The total revenue offsets in the amount of \$938,603 reduce WHESC's Total Service Revenue Requirement to a Base Revenue Requirement of \$12,906,586, which is used to determine the proposed distribution rates. The Base Revenue Requirement is derived from WHESC's 2025 capital and operating forecasts, weather normalized consumption and demand, forecasted customer/connection counts, and regulated return on rate base. WHESC's revenue requirement is summarized in Table 8-1 below:

10

Description	Amount
OM&A Expenses	8,823,658
Amortization Expense	2,095,996
Regulated Return on Capital	2,609,932
PILs	315,602

12 The Base Revenue Requirement is allocated to WHESC's rate classes based on the Cost Allocation study

13 outlined in Exhibit 7 of this application. The following Table 8-2 outlines the resulting allocation of the base

14 revenue requirement to the rate classes.

2 8.1.1 Current Fixed / Variable Proportion

Applying the 2024 monthly services charges from the 2024 approved IRM application (EB-2023-0056) to the forecasted number of customers for 2025 establishes fixed base revenue. The variable base revenue reflects the 2024 approved distribution volumetric charge (excluding rate riders, rate adders and funding adders) and the transformer allowance, applied to the 2025 forecasted volumes. The following Table 8-3 outlines WHESC's current split between fixed and variable distribution revenue.

10 8.1.1.1 Proposed Fixed Rates

In accordance with OEB's Board Policy: A New Distribution Rate Design for Residential Electricity
 Customers, residential rates are fully fixed.

Table 8-4 outlines the resulting fixed service charges calculated based on current fixed revenue portions. WHESC is proposing to maintain the fixed/variable portions for the Street Lighting, Sentinel Lighting and Unmetered Scattered Load rate classes. As can be seen in Table 8-5, the proposed Fixed Charge for these three rate classes is below the Customer Unit Cost per Month-Minimum System with PLCC Adjustment value. WHESC is proposing to maintain the current 2024 approved fixed charge for the GS<50 kW and GS>50 kW rate classes since the proposed Fixed Charge, assuming the fixed/variable portions is maintained, is above the Customer Unit Cost per Month-Minimum System with PLCC Adjustment value.

5 8.1.1.2 Proposed Variable Rates

6 WHESC has calculated the variable distribution charge by dividing the variable distribution portion of the

7 Base Revenue Requirement by the applicable 2025 Test Year usage (consumption or demand).

8 Table 8-6 below outlines WHESC's calculation of the proposed variable distribution charges for the 2025

9 Test Year, with consideration for Transformer Allowance. The Transformer Allowance applies solely to the

10 GS<50 and GS>50 rate classes.

As described in Section 8.1.1.1 above, the Residential rate class only receives a fixed distribution charge, and the fixed and variable portions have been maintained for the Street Lighting, Sentinel Lighting and

13 Unmetered Scattered Load rate classes. The fixed charge for the GS<50 and GS>50 rate classes was held

14 constant at the current 2024 approved rates. The variable portion of Base Revenue Requirement for these

15 two rate classes was calculated as the Total Base Revenue Requirement less the Fixed portion, as shown

16 in Table 8-4 above.

4 8.1.1.3 Proposed Adjustment for Transformer Allowance

5 Currently, WHESC provides a transformer allowance to those customers that own their own transformation 6 facilities. WHESC proposes to maintain the current approved transformer ownership allowance of \$0.70 7 per kW ("Transformer Allowance"). The Transformer Allowance is intended to reflect the costs to a distributor 8 of providing step down transformation facilities to the customer's utilization voltage level. Since the 9 distributor provides electricity at utilization voltage, the cost of this transformation is captured in and recovered through distribution rates. Therefore, when a customer provides its own step down 10 11 transformation from primary to secondary, it should receive a credit of these costs already included in 12 distribution rates.

13 The amount of Transformer Allowance expected to be provided to the customers in the General Service

14 <50 kW and the General Service >50 kW classes has been included in the volumetric charge for each class

15 through the Transformer Allowance column in Table 8-6 above.

16 8.1.1.4 Proposed Distribution Rates

17 The following Table 8-8 sets out WHESC's proposed 2025 Test Year distribution rates by rate class. These

18 rates include adjustments for the Transformer Allowance.

Table 8-8: Proposed Distribution Rates

3 8.2 Retail Transmission Service Rates (RTSRs)

4 WHESC has utilized the most recent version of the Board's RTSR Workform (issued April 11, 2024) for the

5 development of the proposed Retail Transmission Service Rates ("RTSRs"). This model has been filed in

6 live Excel format and is also included as Appendix 8-A to this Exhibit.

7 Electricity distributors are charged Ontario Uniform Transmission Rates ("UTRs") at the wholesale level and 8 subsequently pass these charges on to their distribution customers through RTSRs. For each distribution 9 rate class there are two RTSRs, one for network and one for connection. The RTSR network charge 10 recovers the UTR wholesale network service charge, and the RTSR connection charge recovers the UTR

11 wholesale line and transformation connection charges.

12 Deferral accounts are used to capture the timing and rate differences between the UTRs paid at the

wholesale level and the RTSRs billed to distribution customers. WHESC pays transmission charges to the
IESO.

15 WHESC's proposed RTSRs generated from the 2025 RTSR Workform are provided in Table 8-9. The RTSR

16 information is consistent with the working capital allowance calculation per Exhibit 2, Section 2.2.5.

1 8.3 Retail Service Charges

9

10

2 On February 14, 2019, the OEB issued its Decision and Order on Retail Service Charges (EB-2015-0304).

3 The report stated that the rates are subject to an adjustment mechanism using the annual inflation factor

- 4 applied in the OEB's incentive regulation mechanism. For the purposes of this application, WHESC is using
- 5 the OEB's 2025 inflation factor of 3.6% on 2024 charges as outlined on Tab 3. Regulatory Charges of the
- 6 OEB's 2025 Tariff Schedule and Bill Impacts Model.
- 7 Table 8-10 below provides the Proposed Retail Service Charges for WHESC's 2025 Test Year. WHESC is
- 8 not proposing any retail service charges other than those on a generic basis.

Table 8-10: Proposed Retail Service Charges

11 8.4 Regulatory Charges

12 8.4.1 Wholesale Market Service Rate

13 The Wholesale Market Service Rate ("WMS") is designed to allow distributors to recover costs charged by

14 the IESO for the operation of the IESO-administered markets and the operation of the IESO-controlled grid.

15 The WMS rate is an energy-based rate (per kWh) applicable to those customers who are not wholesale

16 market participants and is set by the OEB on a generic basis.

17 On December 7, 2023 the Board issued a Decision and Order (EB-2023-0268) establishing that the WMS

rate as of January 1, 2024 would remain unchanged at \$0.0041 per kWh. For Class B customers, a Capacity

19 Base Recovery ("CBR") component of \$0.0004/kWh is also added to the WMS rate for a total of

\$0.0045/kWh. Accordingly, WHESC proposes to continue utilizing the approved \$0.0041/kWh rate
 (\$0.0045/kWh with CBR) in this application.

3 8.4.2 Rural or Remote Rate Plan

The Rural or Remote Electricity Rate Protection ("RRRP") program is designed to reduce costs for eligible
customers located in certain rural or remote areas where the cost of distributing electricity is higher.

6 On December 7, 2023 the Board issued a Decision and Order (EB-2023-0268) establishing that the rate as

of January 1, 2024 would increase to \$0.0014 per kWh. Accordingly, WHESC proposes to continue utilizing

8 the approved \$0.0014/kWh in this application.

9 8.4.3 Standard Supply Service Charge

10 The Standard Supply Service Charge is set by the OEB as an administrative fee payable by customers who 11 purchase electricity directly from their distributor. The rate is set by the OEB on a generic basis. WHESC 12 proposes to continue utilizing the current monthly charge of \$0.25 in this application.

13 8.5 Specific Service Charges

15

14 WHESC is proposing to maintain the Specific Service Charges as approved in its 2017 cost of service

16 of \$11.00 as approved by the Board in its Decision and Rate Order (EB-2016-0110) effective May 1, 2017.

application (EB-2016-0110) with one exception. WHESC currently has a MicroFIT monthly service charge

- 17 WHESC is proposing to use the OEB's generic monthly microFIT service charge of \$4.55 as stated in the
- 18 OEB's letter dated November 29, 2023 effective May 1, 2025. The change to the MicroFIT monthly service
- 19 charge will not have a material impact to any customer group.
- 20 WHESC confirms that there are no rates and charges included in its Conditions of Service that do not 21 appear on the OEB-approved Tariff.
- WHESC is proposing a wireline pole attachment charge of \$39.14. This rate is equal to the 2024 rate of \$37.78 inflated by the OEB's 2025 inflation factor of 3.6%.
- WHESC confirms that revenue associated with the specific service charges that are included in Tariff ofRates and Charges are included in Other Revenue, as described in Exhibit 6.

26 8.6 Low Voltage Service Rates

27 WHESC does not currently have, nor incur, low voltage service charges.

1 8.7 Smart Meter Entity Charge

2 On September 8, 2022 the OEB issued a Decision and Order (EB-2022-0137) establishing the IESO's

3 Smart Metering Charge. The OEB determined that the Smart Metering Charge will be \$0.42 per smart meter

4 in the Residential and GS<50 rate classes, effective January 1, 2023 until December 31, 2027.

5 8.8 Loss Adjustment Factors

6 8.8.1 Overview

- 7 WHESC is not an embedded distributor and confirms that no partially embedded distributor status exists.
- 8 As a market participant, WHESC's electricity commodity charge is billed by the IESO.
- 9 WHESC has not been required by previous Board decisions to present details of loss studies.

10 8.8.2 Calculation of Losses

11 WHESC has calculated the total loss factor to be applied to customers' consumption based on the average

12 wholesale and retail kWh for the years 2019 to 2023. The calculations are summarized in Table 8-11 below,

13 which is consistent with Appendix 2-R of the Chapter 2 Appendices. WHESC has amended Appendix 2-R

- 14 to include more detail that shows the impacts of directly connected generation and wholesale market
- 15 participants.
- 16

- 3 wholesale meter points and is determined to be 1.0039.
- 4 The Total Loss Factor ("TLF") of 1.0415 represents a decrease to the current loss factor of 1.0476. WHESC

5 has reflected the impact of the Wholesale Market Participant ("WMP") and generation in calculating the

10 8.8.3 Materiality Analysis on Distribution Losses

WHESC's proposed loss factor is lower than 5%. Pursuant to the Filing Requirements, since WHESC's
 Distribution Loss Adjustment factor is less than 5% and is showing a decreasing trend. WHESC is not

14 8.8.4 Reconciliation of Loss Factor

- 15 Table 8-13 reconciles the loss factor calculated in Appendix 2-R to the loss factor calculated in 2.1.5 of RRR
- 16 for 2019 to 2023.
- 17

18

19 The average variance between the loss factor calculated in Appendix 2-R is partially due to the calculation

20 of a specific SFLF based on the spreadsheet methodology. The calculated SFLF is applied to the calculated

- 1 Distribution Loss Factor ("DLF") to determine the representative TLF. This methodology follows the same
- 2 approach used in the 2017 COS to arrive at a five-year average TLF. It should be noted that the calculated
- 3 historical average SFLF is used in this Application for the purpose of determining a five-year average TLF,
- 4 as apposed to a fixed amount for SFLF that was used in the 2017 COS. The WMP usage is also loss
- 5 adjusted in Appendix 2-R to account for use of the distribution system. This adjustment is not reflected in
- 6 2.1.5 RRR filings.

7 8.9 Tariff of Rates and Charges

8 WHESC's current Tariff of Rates and Charges is reflective of the OEB's approved IRM Rate Order (EB-9 2023-0056) for rates effective May 1, 2024 and has been included as Appendix 8-B of this Exhibit.

10 WHESC is proposing a Tariff of Rates and Charges effective May 1, 2025, included as Appendix 8-C of this

11 Exhibit. The current definition of rate classes and the current terms and conditions of service have been

- 12 maintained in this application.
- WHESC has filed a live Excel version of the Tariff Schedule and Bill Impacts Model as part of thisapplication.

15 8.10 Revenue Reconciliation

16 Consistent with the Board's Revenue Requirement Work Form, Sheet 13, Table 8-14 below reconciles the 17 total 2025 Service Revenue Requirement, Other Revenue (Revenue Offsets) and Base Revenue 18 Requirements per rate class. This is compared to the 2025 Base Revenue at 2024 Approved Rates per 19 Table 8-3. Table 8-15 provides a reconciliation between the revenue based on 2025 Proposed rounded 20 Distribution Rates and the Base Revenue Requirement along with detailed calculations per rate class.

3 8.11 Bill Impact Information

Table 8-16 below presents a summary of WHESC's total bill impacts. WHESC has included bill impact sheets as calculated in the OEB's Tariff Schedule and Bill Impact Model as Appendix 8-D of this Exhibit and has filed the same in live Excel format with this application. The bill impact sheets included as Appendix 8-D provide the detailed calculations of the resulting bill impacts, including the existing rates and proposed changes to rates.

9 The bill impacts associated with Table 8-16 include the following:

- 10 Distribution rates as outlined in this Exhibit
- Elimination of rate riders that expire April 30, 2025 per the current Rate Order (EB-2023-0056)
- Addition of new rate riders as outlined in Exhibit 9 of this Application
- 13 RTSRs as outlined in Section 8.2 of this Exhibit
- Commodity rates and regulatory charges have been held constant
- 15

16 Rates and charges input into the Tariff Schedule and Bill Impacts model have been rounded to the decimal 17 places as shown on the existing tariff (two decimals for fixed charges and four decimals for variable 18 charges).

WHESC has reviewed the bill impact for a residential customer at the 10th percentile consumption. In order to determine the kWh consumption at the 10th percentile, WHESC reviewed residential consumption data from the 2023 calendar year. Only data with 12 monthly bills and a minimum of 50kWh per month were used to determine the 10th percentile point. The data produced a sample size of 23,149 out of an average of 23,410 residential customers. From the data, a 10th percentile consumption point was determined to be 260 kWh per month before loss factor. The bill Impact for a 10th percentile customer is included in Table 8-16 below.

3 8.12 Rate Mitigation

4 All bill impacts resulting from this rate application are below 10%. As a result, rate mitigation is not required.

For Hydro One Subtransmission Rates, if you are charged a combined Line and Transformation Connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed. If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in red, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancies in rates.

Tariff Schedule and Bill Impacts Model DBIS Cent of Service Filers)

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. Those distributors that are still in the process of moving to fully fixed residential rates should refer to section 3.2.3 of Chapter 3 of the Filing Requirements for Incentive Rate-Setting Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through March 2024 of \$0.08917/kWh (IESO's Monthly Market Report for January 2024) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.

2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.
