Re: EB-2024-0200 St. Laurent Pipeline Replacement Project
CAFES Ottawa Correspondence related to Intervenor Evidence

CAFES Ottawa is in receipt of Procedural Order No. 1 requesting that parties submit comments on the Intervenor Evidence proposals.

CAFES Ottawa has had an opportunity to review the evidence proposals from Pollution Probe and Environmental Defence and strongly recommends that the OEB support those proposals. This application relates to a large and costly natural gas proposed pipeline in Ottawa and a thorough assessment of the proposal based on best available information is very important. The outcomes of this proceeding not only impact the costs and impacts related to the proposed pipeline, but also has the potential to impact consumers and businesses in Ottawa as they embrace the energy transition which continues to accelerate in the City of Ottawa.

Sincerely,

Angela Keller-Herzog
Executive Director
