

Predict System Low Point Pressure		
Year	Without ETEE and DR (kPa)	With ETEE and DR (kPa)
2024	224	224
2025	220	222
2026	210	214
2027	197	200
2028	195	198
2029	200	202
2030	203	205
2031	207	209
2032	210	213
2033	214	217

- Minimum System Pressure (MSP) is 140 kPa
- ETEE is assumed to persist after 2026 but DR stops
- Station outlet pressures are modelled at 380 kPa
