**EB-2024-0125 Enbridge 2023 Utility Earnings and Disposition of Deferral & Variance Accounts
Pollution Probe Letter on Enbridge Confidentiality Request**

Dear Ms. Marconi:

On September 5, 2024 Enbridge filed the responses to Interrogatories and requested confidential treatment of certain information included in those responses. Pollution Probe is identifying two specific pieces of information that fail to meet the OEB's requirements for confidential treatment and Pollution Probe requests that those not be approved by the OEB as confidential. The two items are noted below.

Item #1 - ComTech Energy / Swift Fuel Solution proposal - EB-2024-0125, Exhibit I.PP-13, Attachment 1, Page 3. This response provide information pertaining to the CNG proposal for the Kinston IRP alternative that Enbridge has claimed as a relevant IRP account expense in this proceeding. Enbridge did not redact the cost of the proposal, but did redact the # of months which is relevant information pertaining to the time period for the IRP alternative proposal. Pollution Probe suggests that nothing in the Section 6 table, Lines Item 1 & 2 is confidential and request the OEB deny confidential treatment for that information.

Item#2 - Posterity proposal - EB-2024-0125, Exhibit I.PP-6, Attachment 1, Page 9 include Table 2 - Level of Effort and Budget. Similar information has been provided previously without confidential treatment, but in particular the column identifying "Level of Effort (hours)" provide information directly pertinent to the work conducted and does not disclose any proprietary or confidential information. Pollution Probe suggests that nothing in the Table 2 deserves confidential treatment, but should the OEB determine otherwise, Pollution Probe would suggest that the OEB consider the information in the "Level of Effort (hours)" column

Respectfully submitted on behalf of Pollution Probe.
