Dear Ms. Marconi,

RE: EB-2024-0056 Tillsonburg Hydro Inc. Price Cap IR (“IRM”) for 2025 Electricity Distribution Charges

Tillsonburg Hydro Inc. (THI) is scheduled to submit an application for approval of its IRM rates effective May 1, 2025, on October 30th 2024. As The Board is aware THI filed a letter dated September 19, 2024 providing notice that the parties are working towards filing a full settlement of its 2024 COS application EB-2024-0053 (Settlement Agreement). THI would like to file its 2025 IRM application with the best available information and is accordingly requesting that it be moved into the fourth tranche assignment group for IRM applications. THI anticipates that a Settlement Agreement can be filed and a decision potentially issued by the OEB before the IRM filing deadline for fourth tranche electricity distributor. Therefore, THI is requesting an extension to its filing date to the fourth tranche assignment of November 20th 2024 to provide it time to incorporate any approved 2024 rates in the 2025 IRM models and application evidence.

Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Yours truly,

Graig Pettit
General Manager
