**Re: 2025 Price Cap IR Rates Application – Draft Decision and Order Acceptance  
Board File No.: EB-2024-0018**

Dear Ms. Marconi,

Entegrus Powerlines Inc. (“Entegrus”) has reviewed the Draft Decision and Order issued December 3, 2024, in respect of the above noted file.

Entegrus noted the following discrepancies regarding the Entegrus – St. Thomas rate zone as shown in Schedule A:

1. The Allowances section is showing on the bottom of the microFIT Service Classification Tariff Sheet. This should be on the following page, above Specific Service Charges.

Entegrus noted the following discrepancies regarding the Entegrus – Main rate zone as shown in Schedule B:

1. As approved in Entegrus’ 2016 Cost of Service (EB-2015-0061), the Tariff of Rate and Charges should contain a “Notes” section at the end of the Tariff of Rates and Charges. The “Notes” section is missing from the draft 2025 tariff sheet. It should read as follows:

*“The Billing Demand for Line and Transformation Connection Services and Low Voltage Services is defined as the Non-Coincident Peak demand (MW) in any hour of the month. The customer demand in any hour is the sum of (a) the loss-adjusted demand supplied from the distribution system plus (b) the demand that is supplied by embedded generation installed after October 1998, which have installed capacity of 2MW or more for renewable generation and 1 MW or higher for non-renewable generation. The term renewable generation refers to a facility that generates electricity from the following sources: wind, solar, Biomass, Bio-oil, Bio-gas, landfill gas, or water. The demand supplied by embedded generation will not be adjusted for losses.”*

2. The General Service 50 to 4,999 kW Service Classification Tariff Sheet appears to have an unintentional page break, resulting in the rates appearing on three separate pages.

Entegrus respectfully requests the Draft Decision and Tariff of Rates and Charges be updated for these changes.
