VIA EMAIL & COURIER

Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
P.O. Box 2319, 27th Floor
2300 Yonge Street
Toronto, ON M4P 1E4

Dear Ms. Walli:

**Re: Request for Intervenor Status and Cost Award Eligibility
Ontario Power Generation Inc.
Reliability Must-Run Contract for the Lennox Generating Station
Board File No. EB-2008-0298**

I am writing pursuant to the Board's Notice of Application and Hearing dated October 17, 2008 for the above proceeding, to respectfully request that the Board grant AMPCO intervenor status in this application. I am also requesting that the Board confirm AMPCO's eligibility for an award of costs in this matter. I understand that our submission in this regard was due on October 27. I regret that we were unable to file this letter with the Board on that date, and I respectfully request that the Board grant our late request.

AMPCO is a not-for-profit consumer interest advocacy organization representing a cross-section of Ontario's major industries: forestry, chemical, mining and minerals, steel, petroleum products, cement, automotive and manufacturing and business consumers in general. AMPCO members are major investors, major employers and a major part of communities in which we operate, across Ontario.

AMPCO, and its member companies, are well known to the Board. AMPCO participates in many proceedings, working groups, consultations and initiatives of the Ontario Energy Board (OEB). AMPCO works as far as possible with other industry and consumer interest organizations, both outside and within OEB proceedings.

AMPCO is interested in issues related to the interest of consumers with respect to price, adequacy, reliability and quality of electricity service. We are also interested in the costs and operational effectiveness of the assets that are the subject of this application and the efficiency of rates, charges or levies that would result from the Board's approval of it. AMPCO will seek through this proceeding to examine the historic fuel mix and cost assumptions for the Lennox station underpinning its RMR contracts and to compare those with actual experience. AMPCO is

also interested in examining the requirements for Lennox capacity in light of the updated Ontario load information and near term forecasts issued by the IESO and potentially other sources. AMPCO will also address the fuel supply plans for Lennox.

Notice

I respectfully ask that copies of all documents and correspondence pertaining to this proceeding be served on AMPCO and its consultants and legal counsel as follows:
