

## 8. Intended Services and Markets

- (a) The OEB Act defines "ancillary services" as services necessary to maintain the reliability of the IESO-controlled grid, including frequency control, voltage control, reactive power, and operating reserve services. Does the applicant intend to sell electricity or ancillary services into the IESO administered market?

Yes

No

- (b) Does the applicant intend to settle with an electricity distributor for the electricity injected into the distribution system in accordance with the retail settlement system?

Yes, please identify the electricity distributor \_\_\_\_\_

No

- (c) Does the applicant intend to sell electricity to another person?

Yes

No

If yes, is this person a consumer (i.e., a person who uses, for the person's own consumption, electricity that the person did not generate)?

Yes. The applicant may require a retailer licence. The application form can be found at [www.ontarioenergyboard.ca](http://www.ontarioenergyboard.ca)

No

## 9. Facility Description

Is the applicant applying to be licensed for more than one facility?

Yes, please make a copy of sections 9, 10 and 11 for each facility and provide information for each facility

No

Storage Type

Battery       Flywheel       Compressed Air

Other, please specify \_\_\_\_\_

Installed Capacity 2 MW

Number of Units 00001

If the applicant is selling ancillary services, please describe: RSVC Contract with IESO

Facility name: Basin II

Facility Address: 440 Commissioners Street, Toronto, Ontario M4M 1A9

Licence Responsibility/Qualification Sought

- Owner and Operator
- Owner Only. Please identify operator \_\_\_\_\_
- Operator Only. Please identify owner \_\_\_\_\_

If the applicant is applying for only one of the two qualifications, please provide information on the status of the other qualification. The information should include confirmation as to whether or not the person or entity seeking the other qualification is licensed; if licensed, please provide the licence number and, if not, indicate when an application for the other qualification will be filed with the OEB.

**10. Facility History and Status**

Is the facility in commercial service?

- Yes, proceed to section 10(a)
- No, proceed to section 10(b) or 10(c) as applicable.

(a) Existing Facility in Commercial Service

When did this facility achieve commercial operation? \_\_\_\_\_

Is the applicant the original owner and operator?

- Yes
- No, identify previous owner and operator: \_\_\_\_\_

(b) New Facility

Has facility construction commenced?

- Yes
- No

What is the expected commercial in service date? November 1, 2016

(c) Existing Facility **NOT** in Commercial Service

What is the expected commercial in service date? \_\_\_\_\_

Please provide a list of all other regulatory approvals required (e.g. environmental, municipal, etc.). Please identify the status of each approval.

---

---

---

## 11. Connection

What is the voltage at the perimeter of the applicant's property from the output of the storage facility?

- 50 kV or less, proceed to section 11(a)  
 greater than 50 kV, proceed to section 11(b)

- (a) The OEB Act defines a "distribution system" as a system for distributing electricity, and includes any structures, equipment or other things used for that purpose. "Distribute", with respect to electricity, means to convey electricity at voltages of 50 kV or less.

Describe the existing or future distribution system from the output of the storage facility to the connection point with the electricity distributor or to the connection point with the transmission system (e.g., length of line, transformers, etc.).

13.8kV Connection.

---

Point of Common Connection is on the facility property .

---

Toronto Hydro's transmission station is approximately 300 meters away.

---

Does (or will) the applicant own and/or operate the distribution system?

- Yes  
 No, identify the owner and/or operator of the distribution system \_\_\_\_\_

If yes, does the applicant own and/or operate the distribution system only for the purpose of conveying electricity from the storage facility to the IESO-controlled grid?

- Yes  
 No, describe the purpose of the distribution system \_\_\_\_\_
- 

If the answer to the question above is no, the applicant may require a distribution licence. The application form can be found at [www.ontarioenergyboard.ca](http://www.ontarioenergyboard.ca).

Does (or will) the distribution system connect the storage facility to an electricity distributor?

- Yes, identify the electricity distributor \_\_\_\_\_  
 No, proceed to section 11(b)

- (b) The OEB Act defines a "transmission system" as a system for transmitting electricity, and includes any structures, equipment or other things used for that purpose. "Transmit", with respect to electricity, means to convey electricity at voltages of more than 50 kV.

Describe the existing or future transmission system from the output of the storage facility or applicant's distribution system to the connection point with the transmission network (e.g., length of line, transformers, etc.).
