Dear Ms. Marconi:

**EB-2025-0090**

**Sedum Master Inc. – Application for Certification of Public Convenience and Necessity**

The Ontario Energy Board issued Procedural Order No. 1 in EB-2025-0090 on April 14, 2025. The timeline proposed in the order will delay Sedum's execution of an agreement with EGI for the construction of the Station, which increases the risk that EGI will not be able to complete construction of the Station in 2025 and Sedum will be forced to use propane to heat the Facility until construction of the station is completed in 2026. To reduce this risk, Sedum requests that the Ontario Energy Board issue a new procedural order that reduces the time allotted for Sedum to prepare its submissions as shown in the attached Schedule "A".

Sincerely,

*Cole Tavener*
