To whom it may concern,

The details in this proposed increase are inadequate/lacking of any provided rationale for the rate increase and provide only a narrow window to solicit feedback in advance of granting a hearing. At a time when Hydro Ottawa has one of the highest rate prices in the country and the proposed increase introduces a significant increase to all affected households. The proposed increase and oral hearing should not be allowed to proceed without much more detail provided and consultation with affected stakeholders.

Kind regards.
