

LETTER OF COMMENT

Comments:

We are already in a unstable economic situation. Sky high inflation, unemployment, uncertainty of job market, kids school, university expenses, high grocery bills, already high utility bills -all these making it impossible to survive. So we don't agree this proposal to increase the rate rather please decrease it. Will the increase be applied to: Electricity chare or delivery charge or Regulatory charge Now I am paying: Delivery \$56.20 and Regulatory Charges \$5.80 Why we need an increase of residential 750 kWh \$6.08 per month. We are becoming a profit driven 3rd world country.

Name: Syed Moniruzzaman
