-- Name --

Denis L'Heureux

-- Do you reside in the impacted service area? -- Yes

-- Comments --

In this economy where people are barely scraping by, there is absolutely no reason to increase electricity distribution rates yet again. Considering that these same rates were just increased less than a year ago. If Hydro Ottawa requires to cut costs then perhaps they should cut spendings within their own organization like any other publicly regulated institution. These less-than-yearly increases are ridiculous and unjustified.
