The cost of taxes in the city are going up services are being cut bills are going up in price It's very hard to support our family. More and more costs being inflated daily food shrinkages how are we supposed to survive with our kids I can't give one of them back. Food scarcity is becoming more and more common I can't even imagine seniors on fixed incomes and how they'll be able to afford this if two working parents can't support their family. These constant increases need to stop. Figure out how to save rather then hit customers yearly. And with such a large increase.
