-- Comments --

To the Ontario Energy Board,

I am writing as a Hydro Ottawa customer to express my opposition to the proposed electricity distribution rate increase (EB-2024-0115).

We are living through a financially difficult time in Canada — with rising living costs, inflation and ongoing housing and affordability pressures. Many of us are already struggling to manage essential expenses like food, rent and transportation. A hydro rate increase at this time would place an additional burden on working individuals, families and seniors.

I urge the Board to reconsider this application and prioritize affordability for residents over additional increases in utility revenue.

Thank you for the opportunity to participate in this process.

Brenda S.
