Dear Ontario Energy Board,

I'm writing to oppose Hydro Ottawa's proposed rate increase. The \$73 annual jump—over \$6 monthly—is a real burden for Ottawa residents, especially with food bank use up 90% since 2019. Families are already stretched thin.

Hydro Ottawa's \$1.195 billion investment plan lacks clear budgets or timelines, making it hard to see how this benefits everyday ratepayers. Features like heat pumps and EV chargers sound great, but they mostly help wealthier homeowners, not renters or low-income households.

I urge the OEB to reject this increase and demand a transparent, equitable plan that puts all residents first. Please make the full investment details public and give us more time so we can weigh in properly.

Thank you.
