LETTER OF COMMENT

Comments:

I understand we need to prepare for the future but electricity rates are going up all the time. And adding another \$80.40 to my bill annually because you want to prepare for a cloud infrastructure is stupid. Would be different if oshawa pic said if we let this go through your electricity rates will drop by an equal amount. But it won't. I firmly hope that the OEB rejects oshawa pucs request to add this charge to us.
