Please do not increase our electricity distribution rates. The cost of living is high enough as it is and this increase will only make life harder for working families in Oshawa. The federal and provincial governments should come through with more funding to make electricity affordable. The burden should not be on working families to pay up. I am really not sure how some people are getting by because every increase like this makes it harder to pay for food, shelter, and more. Please consider working with governments to avoid increasing our rates if that has not been done so already.
