-- Name --

R Masood

-- Do you reside in the impacted service area? -- Yes

-- Comments --

I have been a resident of Oshawa for the past 3 years, and I have only seen the rates go up. Property taxes have gone up, gas prices have gone up and now the electricity rates are going up. As a common man trying to make ends meet, and with the rates all going up, it is making it very difficult to survive. The rates are already too high and need to remain constant at the very least if cannot be dropped or reduced.
