Dear Ms. Long:

Re: Alectra Microgrid Services Project (LNR) LP - Section 80 Notice and Section 57(c) and (d) Applications for Electricity Generation and Retailer Licenses

Alectra Microgrid Services Project (LNR) LP (AMSP LP) is a newly formed Ontario limited partnership, the general partner of which is Alectra Microgrid Services Project (LNR) GP ("AMSP GP"). AMSP LP and AMSP GP have been established for the purposes of acquiring, owning, and operating seven behind-the-meter natural gas generation facilities, with a total installed capacity of 13.95 MW, located in Guelph, Ontario. The generation facilities, which are being acquired from Duke Energy Services Canada ULC, are currently nearing completion of construction and are expected to commence commercial operation on May 1, 2021. One of the facilities, totaling 4 MW, is currently included in a generation licence held by Duke Energy Services Canada ULC and the remainder are not yet licensed. The parties are proposing to close the transaction by no later than April 30, 2021.

In connection with the acquisition and planned ownership and operation of the generation facilities, AMSP GP on behalf of AMSP LP is hereby filing applications with the Ontario Energy Board (OEB) pursuant to subsections 57(c) and (d) of the *Ontario Energy Board Act, 1998* (the "Act") for an electricity generation licence and an electricity retailer licence. In addition, AMSP GP on behalf of AMSP LP is hereby filing a notice pursuant to section 80 of the Act. This is because AMSP GP and AMSP LP are, as a result of being under the common control of Alectra Inc., affiliates of Alectra Utilities Corporation, which is a licensed Ontario electricity distributor. The licence applications and section 80 notice are attached as appendices hereto.

Given the in-service timing for the generation facilities and the planned closing date for the transaction, AMSP LP requests that the OEB issue the licences and process the notice by no later than the end of March 2021. This timing is also critical for AMSP LP because of its plans to

participate in available demand response programs and the upcoming base year under the Industrial Conservation Initiative, which starts May 1, 2021. Being able to participate in those programs will enable the host facilities, which are owned and operated by a leading auto parts manufacturer (Linamar Corporation), to optimize their energy costs and contribute in a meaningful way to their post-pandemic economic recovery efforts.

Please note that, in order to expedite the application review process, AMSP LP has already obtained instructions from the OEB for paying the applicable filing fees by electronic funds transfer, which was processed in advance of these applications. If the OEB requires any further information in connection with the applications and notice, please contact the undersigned.

Sincerely,

Indy J. Butany-DeSouza, MBA
Vice President, Regulatory Affairs

APPENDIX 'A'

ELECTRICITY GENERATION LICENCE APPLICATION

Application for an Electricity Generation Licence

Application Instructions

1. Purpose of this Form

Use this form to apply, under section 60 of the *Ontario Energy Board Act, 1998* (OEB Act), for an “electricity generation” licence. An electricity generation licence issued by the Ontario Energy Board (OEB) enables the licensee to generate electricity or provide ancillary services for sale through the IESO-administered markets or directly to another person; purchase electricity or ancillary services in the IESO-administered markets or directly from a generator; and, sell electricity or ancillary services through the IESO-administered markets or directly to another person, other than a consumer.

Feed-in Tariff program generators should use the licence application form specified for Feed-in Tariff program generators, which can be found on the "Apply for a Licence" page of the "Industry" section of the OEB's website at www.oeb.ca.

2. Completion Instructions

This form is in writeable PDF and can be completed electronically. If necessary, **responses may be continued on additional pages**. The applicant is encouraged to complete the form electronically, save the completed form and file it, along with any attachments, by e-mail to: boardsec@oeb.ca.

THE APPLICANT MUST ALSO SEND TWO PAPER COPIES OF THE COMPLETED AND SIGNED APPLICATION FORM, ALONG WITH TWO PAPER COPIES OF ANY ATTACHMENTS AND THE APPROPRIATE APPLICATION FEE TO:

Board Secretary
Ontario Energy Board
P.O. Box 2319
27th Floor
2300 Yonge Street
Toronto ON M4P 1E4

The OEB uses the following three main criteria to assess applicants for an electricity generation licence:

- The applicant's ability to be a financially viable entity with respect to the activities the applicant intends to undertake;
- The applicant's technical capability and experience with respect to the activities the applicant intends to undertake; and
- The applicant and its key individuals' past business history and conduct such that they afford reasonable grounds for belief that the applicant will carry on business in accordance with the law, integrity and honesty.

The information requested in this application form relates to the above noted criteria. The applicant must complete and file the information requested in this application form. The OEB may require information that is additional to the information filed in this application form. Also, filing of a completed application form does not preclude the applicant from filing additional information.

Any questions regarding the completion of this application should be directed to the OEB at IndustryRelations@oeb.ca.

3. Application and Registration Fees

A non-refundable application fee is required to process this application. Please enclose a cheque or money order made payable to the **ONTARIO ENERGY BOARD**. If a licence is issued, the licensee may be required to pay an annual registration fee. The amounts of the application fee and the annual registration fee are indicated on the "Apply for a Licence" page of the "Industry" section of the OEB's website at www.oeb.ca.

4. Confidentiality

Information filed as part of or in support of sections 12 to 16 of this application will be treated as confidential. All other information filed as part of or in support of this application will be placed on the public record. Where the applicant objects to public disclosure of information filed as part of or in support of sections other than sections 12 to 16, the applicant must follow the procedure set out in the OEB's Practice Direction on Confidential Filings.

5. Important Information

Applicants should consider the timelines required to process applications to avoid submitting applications too early or too late. Submitting applications too early without reasonable certainty of the proposed licensed activities will impede regulatory efficiency while submitting applications too late will leave the applicant to bear the risk of delayed commencement of licensed activities. Processing timelines are indicated on the "[Apply for a Licence](#)" page of the OEB's website at www.oeb.ca. If submitted incomplete, there may be a delay in processing the application.

Applicants must make a copy of the non-confidential sections of the application available to any person who requests a copy of the application.

8. Intended Services and Markets

- (a) The OEB Act defines “ancillary services” as services necessary to maintain the reliability of the IESO-controlled grid, including frequency control, voltage control, reactive power, and operating reserve services. Does the applicant intend to sell electricity or ancillary services into the IESO administered market?

☒ Yes

☐ No

- (b) Does the applicant intend to settle with an electricity distributor for the electricity injected into the distribution system in accordance with the retail settlement system?

☒ Yes, please identify the electricity distributor Alectra Utilities Corporation

☐ No

- (c) Does the applicant intend to sell electricity to another person?

☒ Yes

☐ No

If yes, is this person a consumer (i.e., a person who uses, for the person's own consumption, electricity that the person did not generate)?

☒ Yes. The applicant may require a retailer licence. The application form can be found at www.oeb.ca

☐ No

9. Facility Description

Is the applicant applying to be licensed for more than one facility?

☒ Yes, please make a copy of sections 9, 10 and 11 for each facility and provide information for each facility

☐ No

Generation Type

☐ Diesel ☐ Natural Gas ☐ Water ☐ Wind

☐ Other, please specify See Attachment A-1 for summary.

Installed Capacity _____ MW

Number of Units _____

If the applicant is selling ancillary services, please describe: _____

Facility name: _____

Facility Address: _____

Licence Responsibility/Qualification Sought

- ☐ Owner and Operator
- ☐ Owner Only. Please identify operator _____
- ☐ Operator Only. Please identify owner _____

If the applicant is applying for only one of the two qualifications, please provide information on the status of the other qualification. The information should include confirmation as to whether or not the person or entity seeking the other qualification is licensed; if licensed, please provide the licence number and, if not, indicate when an application for the other qualification will be filed with the OEB.

10. Facility History and Status

Is the facility in commercial service?

- ☐ Yes, proceed to section 10(a)
- ☒ No, proceed to section 10(b) or 10(c) as applicable.

(a) Existing Facility in Commercial Service

When did this facility achieve commercial operation? _____

Is the applicant the original owner and operator?

- ☐ Yes
- ☐ No, identify previous owner and operator: _____

(b) New Facility

Has facility construction commenced?

- ☐ Yes
- ☐ No

What is the expected commercial in service date? See Attachment A-1.

(c) Existing Facility **NOT** in Commercial Service

What is the expected commercial in service date? See Attachment A-1.

Please provide a list of all other regulatory approvals required (e.g. environmental, municipal, etc.). Please identify the status of each approval.

11. Connection

What is the voltage at the perimeter of the applicant's property from the output of the generation facility?

- ☐ 50 kV or less, proceed to section 11(a)
☐ greater than 50 kV, proceed to section 11(b)

- (a) The OEB Act defines a "distribution system" as a system for distributing electricity, and includes any structures, equipment or other things used for that purpose. "Distribute", with respect to electricity, means to convey electricity at voltages of 50 kV or less.

Describe the existing or future distribution system from the output of the generation facility to the connection point with the electricity distributor or to the connection point with the transmission system (e.g., length of line, transformers, etc.).

See Attachment A-1 for summary.

Does (or will) the applicant own and/or operate the distribution system?

- ☐ Yes
☐ No, identify the owner and/or operator of the distribution system _____

If yes, does the applicant own and/or operate the distribution system only for the purpose of conveying electricity from the generation facility to the IESO-controlled grid?

- ☐ Yes
☐ No, describe the purpose of the distribution system _____
-

If the answer to the question above is no, the applicant may require a distribution licence. The application form can be found at www.oeb.ca.

Does (or will) the distribution system connect the generation facility to an electricity distributor?

- ☐ Yes, identify the electricity distributor _____
☐ No, proceed to section 11(b)

- (b) The OEB Act defines a "transmission system" as a system for transmitting electricity, and includes any structures, equipment or other things used for that purpose. "Transmit", with respect to electricity, means to convey electricity at voltages of more than 50 kV.

Describe the existing or future transmission system from the output of the generation facility or applicant's distribution system to the connection point with the transmission network (e.g., length of line, transformers, etc.).

Does (or will) the applicant own and/or operate the transmission system?

☐ Yes

☐ No, identify the owner and/or operator of the transmission system _____

If yes, does the applicant own and/or operate the transmission system only for the purpose of conveying electricity from the generation facility to the IESO-controlled grid?

☐ Yes

☐ No, describe the purpose of the transmission system _____

If the answer to the question above is no, the applicant may require a transmission licence. The application form can be found at www.oeb.ca.

17. Notice

The OEB is authorized, under section 4.14 of the OEB Act, to collect personal information for the purpose of carrying out its duties and exercising its powers under the OEB Act or any other Act.

The information provided both on this form and attached to this form is being collected by the OEB for the purpose of determining whether the applicant is qualified to receive the licence for which it is applying.

In order to verify the information on this form and/or determine whether the applicant is qualified to receive the licence for which it is applying, it may be necessary for the OEB to collect additional information from some or all of the following sources: federal, provincial/state, or municipal governments; licensing bodies; law enforcement agencies; credit bureaus; and banks. Only information relevant to the application or the OEB's determination of the application will be collected by the OEB.

The public official who can answer questions about the collection of the information is:

Board Secretary
Ontario Energy Board

Tel: 416-481-1967 or 1-888-632-6273

Applicants are reminded that the OEB is subject to the *Freedom of Information and Protection of Privacy Act* (FIPPA). FIPPA addresses circumstances in which the OEB may, upon request, be required to release information that is in its custody or under its control, and generally prohibits the OEB from releasing personal information. "Personal Information" has the meaning given to it under FIPPA.

18. Certification and Acknowledgement

- (a) I certify that the information contained in this application and in the documents provided are true and accurate.
- (b) I understand and acknowledge that, as a licensee, I must provide information as the OEB may require from time to time.
- (c) I understand and acknowledge that the issuance of an electricity generation licence does not guarantee registration with the IESO or connection to a transmission or distribution system.
