## **Issues:**

Environmental Defence intends to explore the following issues:

- Whether the project economics are consistent with OEB guidelines, including testing of the figures underlying the project economics;
- Whether the pipeline sizing and project timing is appropriate;
- Whether the project is consistent with Enbridge's plans relating to hydrogen, including the potential use with 100% hydrogen; and
- Whether IRP screening has been carried out appropriately.

## **Policy Interests:**

Environmental Defence Canada represents the public interest in environmental protection and the interests of ratepayers who want both clean and affordable energy.

## **Hearings:**

We expect a written hearing will be sufficient but we request an opportunity to request an oral hearing and/or a technical conference if the interrogatory responses uncover issues that require further exploration.

## **Evidence:**

Environmental Defence does not intend to file evidence.

## **Coordination with Other Intervenors:**

Environmental Defence intends to coordinate with other intervenors, as it has on other OEB proceedings.

## **Cost Awards:**

Environmental Defence is eligible for a cost award primarily under s. 3.03(b) of the Practice Direction as it primarily represents an interest or policy perspective relevant to the Board's mandate and to the proceeding for which cost award eligibility is sought, namely environmental and climate protection. In addition, with respect to s. 3.03(a) of the practice direction, Environmental Defence also represents the interests of consumers whose energy bills can be reduced through measures that lower both costs and environmental impacts.

## **Language Preference:**

Environmental Defence will participate in English.
