Environmental Screening

Wolfe Island Wind Power Project

Canadian Renewable Energy Corporation (CREC) is proposing to construct approximately eighty 1.5 to 3 MW wind turbines on Wolfe Island and Simcoe Island. The study area for the proposed wind power development is shown on the map below.

An environmental screening for development of 13 wind turbines was undertaken by CREC in 2002-2003. The present proposal involves an expansion from 13 to approximately 80 turbines on the western part of Wolfe Island and Simcoe Island. New transmission lines will be required, including a new underwater cable to transmit the electricity to the provincial grid in the Kingston area.

The project is subject to the Ontario Ministry of the Environment's Environmental Screening Process for Electricity Projects and Natural Resources Canada's Screening for Inland Wind Farms. CREC has retained Acres International Limited (Acres) to undertake the environmental screening.

If you have any comments, issues or concerns related to this project please provide them to:

Cate Mee

Acres International Limited

4342 Queen Street, P.O. Box 1001

Niagara Falls, Ontario, L2E 6W1

Tel: 905-374-5200, Fax: 905-374-1157

Open houses will be held during the summer to receive input to the environmental screening. The dates will be announced in your local paper.

Attention:

Dear:

**Wolfe Island Wind Power Project
Notice of Study Commencement**

Canadian Renewable Energy Corporation (CREC) is proposing to develop a wind power generating facility on Wolfe Island and Simcoe Island. The attached notice provides more detail regarding the project.

The project is subject to the Ministry of Environment's Screening Process for Electricity Projects, under the Electricity Projects Regulation of the Ontario Environmental Assessment Act. CREC is also applying for funding for the project under Natural Resources Canada's Wind Power Production Incentive program. The financial incentives provided to a wind energy producer/developer under this program trigger the need for an environmental impact statement under the Canadian Environmental Assessment Act. CREC has retained Acres International Limited to assist them with producing one document that satisfies both provincial and federal EA requirements.

To assist our study, we ask that you provide us with any comments, concerns or background information relevant to this undertaking. For our records, we require a written response from your agency/organization and would appreciate a reply by June 4, 2004.

If you have any questions regarding the environmental assessment, please contact Cate Mee of our office, at 905-374-5200. If you have any questions pertaining to the engineering aspects of the project, please contact the undersigned at the same number noted above.

Yours very truly,

MM/cm
Encl
