**EB-2025-0156 Consultation on the Regulatory Treatment of Local Electricity Demand-side
Management (Stream 2) Programs
Pollution Probe Participation & Cost Eligibility Request**

Dear Mr. Murray:

Pollution Probe received the notice for the above noted consultation on the regulatory treatment of electricity demand-side management (eDSM) programs delivered by local distribution companies (LDCs) that provide both local and system wide benefits. This consultation aligns with direction provided to the OEB in its 2023 and 2024 Ministerial Letters of Direction (LODs).

Pollution Probe hereby requests participation and that it be eligible for the recovery of reasonably incurred costs for its participation. Pollution Probe represents a direct consumer and policy interest related to the issues outlined in the consultation.

Pollution Probe is a frequent participant in OEB consultations including demand-side management and a copy of our current Annual Filing can be found on the Board's website at the following location:

<https://www.rds.oeb.ca/CMWebDrawer/Record/893229/File/document>

Pollution Probe is a not-for-profit charitable organization. We receive individual donations as well as funding for consumer and research projects, such as on community energy planning, future of natural gas and regulated utility innovation, from a variety of public and private sources. Without the prospect of an award of costs, Pollution Probe's ability to participate in the consultation process would not be possible.

Pollution Probe has been an active and valuable participant in OEB consultations and will continue to coordinate its activities, where appropriate, with other parties which represent consumer, municipal and environmental interests in Ontario.

Pollution Probe respectfully requests your acceptance of the request to participate and confirmation that it will be eligible for its costs.

Notice

Pollution Probe requests that further communications with respect to this matter be sent to:
